an ancient Greek named Eratosthenes first accurately determined the distance around the spherical earth In this fascinating narrative history Nicaastro takes a look at a deceptively simple but stunning achievement made by one man millennia ago with only the simplest of materials at his disposal How was he able to measure the land at a time when distance was more a matter of a shrug and a guess at the time spent on a donkey s back How could he be so confident in the assumptions that underlay his calculations that the earth was round and the sun so far away that its rays struck the ground in parallel lines Was it luck or pure scientific genius Nicaastro brings readers on a trip into a long vanished world that prefigured modernity in many ways where neither Eratosthenes reputation nor the validity of his method nor his leadership of the Great Library of Alexandria were enough to convince all his contemporaries about the dimensions of the earth Eratosthenes results were debated for centuries until he was ultimately vindicated almost 2000 years later during the great voyages of exploration from publisher website

Anderson,2021-11-29 The modern era was dominated by conflicts between claims to certainty about justice and denials that certainty is warranted The purpose of this book is to develop a postmodern alternative to both philosophies one which is universal without being absolutist The approach is dialectical in Plato s sense of that term Dialectic is both necessary and sufficient for the theoretical and the practical aspects of living The primary symbol in this book is the Athenian Socrates who spent his days in the Agora and his evenings in the houses of his friends the active professionals of the world s first democracy His questions were unabashedly philosophical concerned with the most urgent matters What is worth living for What is worth dying for Who is best suited to rule in the state How should young people be educated The nature of justice is closely connected with other questions of value so the discussion freely moves from that central focus to related matters with the primary goal of developing a dialectical philosophy that is both applicable to life and open to all Universal Justice is concerned with how to think about justice rather than what to think about justice **The Political Science Reviewer** ,1978
