Understanding the World Through Narrative Steve Bowkett, Tony Hitchman, 2023-10-02 While many educational books focus on creative and critical thinking skills this ground breaking work is the first to deal specifically with the ability to understand question and evaluate information presented broadly speaking in story form Story or narrative is central to our understanding of and interaction with the world around us We only have to think of the mini stories encapsulated in many advertisements the way that topics in science the story of human evolution for example in history and other subjects present themselves the power of myths and legends to act as guides to moral behaviour and the pervasive way that gossip rumour and superstition can spread to recognise the benefits of heightening such awareness in young learners Understanding the World Through Narrative explores the narrative structure of fiction but uses this as a template to show how the story form appears in mythology and modern urban folklore science history the media including advertising in our internal dialogues stories we tell ourselves about ourselves and others and how narrative structure can be used in curriculum planning to enhance children s learning The book contains over 160 thinking discussing researching activities for use in the classroom and as project work Chapters can be used independently although they are arranged with increasing degrees of sophistication and challenge This fascinating work is an essential resource for any teacher of upper primary and lower secondary students covering not only children s evolving intellectual ability and promoting curiosity and critical engagement but also enhancing their mental and emotional wellbeing

A Geographical Century Vladimir Kolosov, Jacobo García-Álvarez, Michael Heffernan, Bruno Schelhaas, 2022-05-31 This volume of specially commissioned interpretative essays marks the centenary of the establishment of the International Geographical Union in 1922 Written by leading human and physical geographers from all parts of the world A Geographical Century considers the history and present condition of geography as an international science Based on the latest research A Geographical Century provides new and critical analyses of the different forms of geographical internationalism that emerged during the 20th century the changing relations between geography and cognate disciplines in the natural and social sciences the geopolitics of international geographical collaboration and the prospects of geography as a 21st century international science

Paratexts James Gunn, 2013-04-18 In the mid 1980s Easton Press began publishing a series of leather bound collector editions called Masterpieces of Science Fiction and Masterpieces of Fantasy which featured some of the most important works in these genres James Gunn was commissioned to write introductions to these works which allowed him to pay tribute to many authors who inspired and influenced his own work In Paratexts Introductions to Science Fiction and Fantasy Gunn has collected the most significant essays produced for the Easton series along with prefaces he wrote for reprints of his own novels Cited here are some of the most significant works of 19th and 20th century science fiction and fantasy such as The
