Emotion in Social Relations

Brian Parkinson, Agneta Fischer, A. S. R. Manstead, 2005 Within psychology emotion is often treated as something private and personal In contrast this book tries to understand emotion from the outside by examining the everyday social settings in which it operates Three levels of social influence are considered in decreasing order of inclusiveness starting with the surrounding culture and subculture moving on to the more delimited organization or group and finally focusing on the interpersonal setting

Language Change and Sociolinguistics Jonathan Marshall, 2004-03-30 This sociolinguistic study offers a new theoretical framework for understanding the diffusion of language change within a community Advanced statistical analysis methods are used in rigorously testing the supposed norm enforcement effect of social networks Revisions to the social network model are proposed allowing the effects of various social factors operating simultaneously on the individual to be considered in evaluating the process of resistance to language change

Rational Choice Theory Margaret S. Archer, Jonathan Q. Tritter, 2013-04-03 Rational Choice Theory is flourishing in sociology and is increasingly influential in other disciplines Contributors to this volume are convinced that it provides an inadequate conceptualization of all aspects of decision making of the individuals who make the decisions of the process by which decisions get made and of the context within which decisions get made The critique focuses on the four assumptions which are the bedrock of rational choice rationality the theory's definition of rationality is incomplete and cannot satisfactorily incorporate norms and emotions individualism rational choice is based upon atomistic individual decision makers and cannot account for decisions made by couples groups or other forms of collective action process the assumption of fixed well ordered preferences and perfect information makes the theory inadequate for situations of change and uncertainty aggregation as methodological individualists rational choice theorists can only view structure and culture as aggregates and cannot incorporate structural or cultural influences as emergent properties which have an effect upon decision making The critique is grounded in discussion of a wide range of social issues including race marriage health and education
