## Realities Of Images:

**Mixed Reality Images** Lars C. Grabbe, Patrick Rupert-Kruse, Norbert M. Schmitz, 2025-02-25 The interplay of physical reality and digital media technologies is getting enhanced by new interfaces The age of hyper reality turns into the age of hyper aesthetics and immersive image technologies like mixed reality enable a completely novel form of interaction and user relation with the virtual image structures the different screen technologies and embedded physical artefacts for interaction Mixed Reality Images contributes to the wide range of the hyper aesthetic image discourse to connect the concept of mixed reality images with the approaches in modern media theory philosophy perceptual theory aesthetics computer graphics and art theory as well as the complex range of image science This volume monitors and discusses the relation of images and technological evolution in the context of mixed reality within the perspective of an autonomous image science Augmented Images Lars C. Grabbe, Patrick Rupert-Kruse, Norbert M. Schmitz, 2022-09-07 Common boundaries between the physical reality and rising digital media technologies are fading The age of hyper reality becomes an age of hyper aesthetics Immersive media and image technologies like augmented reality enable a completely novel form of interaction and corporeal relation to and with the virtual image structures and the different screen technologies Augmented Images contributes to the wide range of the hyper aesthetic image discourse to connect the concept of dynamic augmented images with the approaches in modern media theory philosophy perceptual theory aesthetics computer graphics and art theory as well as the complex range of image science This volume monitors and discusses the relation of images and technological evolution in the context of augmented reality within the perspective of an autonomous image science *Images, Reality, and Digital Culture* Krešimir Purgar, 2025-09-30 Focusing on the moment of transition from the pictorial to the post pictorial condition this book advocates the opinion that what fundamentally distinguishes pictorial representation in Western civilization is one's ability to distinguish what the picture shows from what the picture refers to and to that extent the reality inside the picture cannot be confused with what is outside it The contributions in this book serve as kind of a missing link connecting the genealogy of traditional images with contemporary environmental visualizations in the world that in this very moment undergoes a transition into a new exciting age in which many old knowledges are rapidly becoming obsolete and new ones are seeking their legitimacy Instead of leading the reader to reconciliation with the fatal diagnosis of the world under the rule of technological determinism this book indicates the key points of transition between the pictorial representation that traditionally belonged to the history of art and the virtual presence that is approached in quite different ways today This book will be of interest to scholars working in art history image philosophy image studies and digital studies Mechanics and Faith Charles Talbot Porter, 1886 **War, Technology, Anthropology** Koen Stroeken, 2011-12-01 Technologies of the allied warfare in Iraq and Afghanistan such as remote controlled drones and night vision goggles allow the user to virtualize human targets This coincides with increased civilian casualties and a perpetuation of the very insecurity these technologies are

meant to combat This concise volume of research and reflections from different regions across Asia the Middle East Latin America and Africa observes how anthropology operates as a technology of war It tackles recent theories of humans in society colluding with imperialist claims including anthropologists who have become involved professionally in warfare through their knowledge of cultures renamed as human terrain systems The chapters link varied yet crucial domains of inquiry from battlefields technologies military driven scientific policy and economic warfare to martyrdom cosmology shifts media coverage of distant wars and the virtualizing techniques and war porn soundtracks of the gaming industry

**Mimesis** Gunter Gebauer, Christoph Wulf, 1995 A fundamental historical account of the much cited but little studied concept of mimesis and an essential starting point for all future discussions of this crucial critical concept Hayden White

**The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1907 An international journal of general philosophy

*Painting and Reality* Etienne Gilson, 2023-08-15 A classic study of the art of painting and its relationship to reality In this book Etienne Gilson puts forward a bold interpretation of the kind of reality depicted in paintings and its relation to the natural order Drawing on insights from the writings of great painters from Leonardo Reynolds and Constable to Mondrian and Klee Gilson shows how painting is foreign to the order of language and knowledge Painting he argues seeks to add new beings to nature not to represent those that already exist For this reason we must distinguish it from another art that of picturing which seeks to produce images of actual or possible beings Though pictures play an important part in human life they do not belong in the art of painting Through this distinction Gilson sheds new light on the evolution of modern painting A magisterial work of scholarship by an acclaimed historian of philosophy *Painting and Reality* features paintings from both classical and modern schools and includes extended selections from the writings of Reynolds Delacroix Gris Gill and Ozenfant
