Realms Meaning:

Realms of Meaning Thomas Hofmann, 2015-05-12 *Realms of Meaning* presents an accessible introduction to semantics. It provides an understanding of the way meaning works in natural languages against a background of how we communicate with language. Avoiding theoretical terminology and linguistic theories, it concentrates instead on the analysis of meaning and looks in depth at such subjects as opposites and negatives, modal verbs, prepositions, and word meanings. Examples are chosen mainly from English to provide material for the wider discussion of the principles of the subject, but European, East Asian, and other languages also provide illuminating examples. Meaning and Power in a Southeast Asian Realm Shelly

Errington, 2014-07-14 The ruler in the Indic States of Southeast Asia was seen not as the head of state but as the center or navel of the world. Like polities, persons, and houses were and are viewed as centered spaces, locations where spiritual potency can gather. Shelly Errington explores the politics of constituting and maintaining such centered socio-political spaces in a former Indic State called Luwu, which lies in South Sulawesi, Celebes, Indonesia. The meaning of political life and the ways its cultural forms were and are sustained depend on locally construed ideas of power or spiritual potency and the person which the author explores in detail. She views the polity neither as a frame in which political actors pursue advantage nor as a structure for extracting wealth but as a hierarchical system of signs ultimately backed by force, but force which was not fully centralized and whose import must be understood within ideas about spiritual potency widespread in the region. Although focused on Luwu, the book's theoretical scope is wide and it ranges comparatively over a broad geographical area, making a contribution to ethnographic, historical, and regional studies as well as to the study of politics in nonsecular societies. Part One traces how the person, the house, and the polity are constituted symbolically in everyday practices as centered spaces. Part Two examines how centers can be de-centered, while Part Three explores the structure that tended to hold centers together in Luwu and other Indic States. The introduction and the three conclusions, each of the three being broader than the last, in comparative scope locate the author's views with respect to other current theoretical approaches to power and culture. Short, 2019-10-11 This book exhibits a collection of proposals for how school curriculum may be conceived, designed, and realized. These proposals are drawn from writers both past and present who have presented some particular vision of what curriculum could be like for Pre-K-12 schools and have sought to convince others to adopt their proposal for use in some actual school situation. The proposals differ from one another in a variety of ways, including in their purposes, their contents,

and their perspectives and thus pose a wealth of options for consideration by those who are planning to change their school curriculum to something new and more suitable for their particular clientele Readers will need to weigh the appeal of various proposals presented here against criteria they have for locating an optimum model for their particular situation The proposals selected for inclusion in this book address the whole of the curriculum all levels all subjects all age groups they deal with entire program change rather than with incidental changes in content program arrangements teaching approaches or other limited alterations This book is intended to be a useful resource for those responsible for making decisions in a particular school or school district or at a broader policy making level about what the entire curriculum should be and should include It draws attention to the work of many thoughtful persons who have dealt with the issue of what a coherent curriculum might be like and who in some instances have set up actual programs based on their ideas

A Contemporary Nursing Process Rozzano C. Locsin, Marguerite Purnell, Marguerite J. Purnell, 2009-04-10 This book speaks against thinking that we can only understand nursing from a traditional logical empirical approach suggesting we need a contemporary process for exploring nursing I can't agree more Journal of Christian Nursing Nurse scholars from across the globe contribute essays to this unique philosophical exploration of today's nursing This book presents an emerging view that requires nursing to look at its work through a broader and less structured lens Challenging the structure of the traditional nursing process the book considers nursing as reflective and thoughtful Doody's *A Contemporary Nursing Process* reenvision the practice of nursing by configuring caring in terms of the person the nurse cares for Locsin and Purnell stress the importance of knowing the patient and differentiating the person from the disease This text addresses this highly relevant issue and provides a wealth of insight on how to care for the patient on a personal level while still professionally administering clinical treatment Chapters discuss How to appreciate persons as participants in their care rather than as objects of care The ideal of care versus the practical demands of care Technological advancements shaping human life and nursing The consequences of not knowing the patient on a personal level

In the wake of the renewed interest in the philosophy of Immanuel Kant the neo Kantian theories of Heinrich Rickert 1863 1936 are increasingly drawing attention This monograph is an attempt to rescue Rickert from an undeserved oblivion by an analysis of his systematic philosophy of values The author discusses Rickert s epistemology and ontology which lay the foundation for a methodology of the Natural Sciences and the Humanities In Rickert s view these types of science are not in opposition to each other but operate on a continuum between two extremes a generalizing natural scientific and an individualizing cultural scientific approach to reality The social sciences in particular operate on this continuum in a flexible manner sometimes close to the natural scientific pole as in the case of experimental psychology or econometrics sometimes close to the cultural scientific approach as in the case of cultural sociology or cultural history Thus there is in Rickert s logic of science no room for any methodological quarrel **Into the Realm of Wonder** Pasquale De Marco,2025-07-25
