Reason, Ethics, and Society Jerome B. Schneewind, 1996 Since 1948 Kurt Baier has been producing some of our century's most stimulating seminal and meticulous work in ethics. His quest for a rational justification of morality has centered on the human predicament that although most of us want to live in association with others we always find ourselves coming into conflict with one another. These challenging and ground-breaking essays together with Kurt Baier's careful and illuminating responses constitute contemporary moral theory at its very best. James P. Sterba, University of Notre Dame

Superson, 2009-03-13 Anita Superson challenges the traditional picture of the skeptic who asks Why be moral While holding that the skeptic's position is important she builds an argument against it by understanding it more deeply and then shows what it would take to successfully defeat it Superson argues that we must defeat not only the action skeptic but the disposition skeptic who denies that being morally disposed is rationally required and the motive skeptic who believes that merely going through the motions in acting morally is rationally permissible We also have to address the amoralist who is not moved by moral reasons he recognizes Superson argues for expanding the skeptic's position from self interest to privilege to include morally unjustified behavior targeting

disenfranchised social groups as well as revising the traditional expected utility model to exclude desires deformed by patriarchy as irrational. Lastly she argues that the challenge can be answered if it can be shown that it is in an important way inconsistent and therefore irrational to privilege oneself over others. The Moral Skeptic makes an important contribution to both metaethics, moral theory and feminist philosophy and brings feminist thinking into the larger discussion of the skeptical challenge.

Dialogue, Politics and Gender Jude Browne, 2013-05-23 Examines the relationship between gender discourse and deliberation focusing on how far consensus achieved through deliberation can reflect gender differences.

Kant's Impact on Moral Philosophy Paul Guyer, 2024 This book examines Immanuel Kant's impact on moral philosophy from his time to our own. Kant's moral philosophy can seem complicated but at the most basic level it is driven by the simple idea that the greatest possible freedom for each combined with an equal degree of freedom for all is the fundamental principle of philosophy.

Philosophical Reflections on Mothering in Trauma Melissa Burchard, 2018-07-20 *Philosophical Reflections on Mothering in Trauma* examines the lived experience of mothering children who have been seriously harmed by others. Using an interdisciplinary approach that employs a feminist phenomenology and an emphasis on narrative theory, this groundbreaking work gives voice to experiences of trauma and of mothering not ordinarily heard in philosophical discourses. With a philosophical lens, Melissa Burchard examines the challenges faced by families during the adoption and parenting of abused children. In doing so, Burchard argues that the investigation of traumatic experience poses questions that philosophers must address if we are to improve collective understanding of the human condition. These questions centre around the epistemological implications of traumatic experience, the role of power and privilege in abusive relationships and the interconnected issues of morality and moral agency in trauma, problematic desires engendered in traumatic circumstances and therapeutic responses to trauma. The book expresses ways in which mothering wounded children can, if we are deeply engaged and reflective, shift our understandings of what it means to be parents, to be children, to love, to know, to construct a self, to feel, desire, to nurture, to coerce and to live in the ambiguity of not knowing which decisions are right and which are wrong.
