Recent Social Trends In Bulgaria 1960 1995:

Recent Social Trends in Bulgaria, 1960-1995 Nikolai Genov, Anna Krasteva, 2001-01-01 The introduction by Nikolai Genov looks at the challenges posed by two transformations the experiment with communism which ended in failure and the current transition to a market economy and pluralist politics Genov concludes that the major reason for Bulgaria's critical situation is the powerlessness of its state institutions Considering life style fertility leisure and consumption inequality religion economic institutions ethnicity norms of conduct and family as well as other trends Recent Social Trends in Bulgaria 1960-1995 is the first comprehensive presentation of the major transformations that characterize Bulgaria at the turn of the century The contributors not only consider a broad range of social phenomena but provide an in depth analysis of social change This national profile provides more data supporting the hypothesis of diversification rather than convergence in modern societies a hypothesis proposed by the Comparative Charting of Social Change group after documenting social change in many countries

Recent Social Trends in Canada, 1960-2000 Lance W. Roberts, 2005 Canadian society has changed dramatically since 1960 This work captures the scope and range of these changes through a systematic documentation of seventy eight social trends The introduction summarizes and locates the major waves of change The authors then document each trend in relation to eighteen thematic groups that include age community women labour management stratification social relations the state mobilizing institutions social forces ideologies households lifestyle leisure education integration and attitudes and values In contrast to many recent works and journalistic reports Recent Social Trends in Canada concentrates on the trajectory of change rather than on current events It provides a longitudinal context in which unfolding events can be interpreted in a broader historical and international context Comparable volumes in the McGill Queen's Comparative Charting of Social Change series describe similar tendencies in the United States Quebec France Germany Italy Greece Russia and Bulgaria making it possible to situate the Canadian experience in a global context

Recent Social Trends in France, 1960-1990 Michel Forsé, International Research Group on the Comparative Charting of Social Change in Advanced Industrial Societies, 1993 Over the three decades from 1960 to 1990 French society underwent a spectacular transformation due to the baby boom which was particularly broad based and prolonged in France and caused the population to climb by a full one third At the same time the French economy expanded and the pace of modernization picked up with the result that the wealth of the French quadrupled in a single generation The turning point between the reconstruction and development period and the period of profound social change appears to have been 1965 The baby boom was over by then and the production system was shifting in orientation No longer dominated by the growth of basic industries production was now starting to focus on consumer goods and services

Recent Social Trends in Greece, 1960-2000 Dimitris Charalambis, Laura Maratou-Alipranti, Andromachi Hadjiyanni, 2004-02-25 The newest volume in the Comparative Charting of Social Change series highlights the main elements of demographic social political and economic development in Greece

during the period 1960-2000. Based on a systematic analysis of available information and data, this volume provides an overview of Greece's socio-economic profile, which changed significantly during the studied period. The collapse of the dictatorship in 1974 and Greece's entry into the European Union (EU) in 1980 have led to a consolidation of democratic institutions and the improvement of living standards. During the 1960s and 1970s, the country experienced high rates of economic development and relatively low unemployment rates. However, this increase in economic development has slowed since the early 1980s, and the unemployment rate has risen, particularly among young people. Consistent with recent social trends in other Western societies, Greek society has become more tolerant and permissive, with more diverse and flexible moral norms. However, the prevailing family model remains traditional, and the Greek Orthodox Church continues to have a strong influence on many aspects of Greek society, including social, political, and cultural life. The organization of work also follows traditional patterns, despite the introduction of new and flexible forms of employment. Female participation in the labour market remains relatively low, despite legislation and regulations that promote equality of opportunities between the sexes. Consistent with recent social trends in other Western societies, Greece's population is aging, and the birth rate has stabilized at a relatively low level.

Leviathan Transformed Theodore Caplow, 2002-01-16. The authors, using these goals as a checklist, found that each of the seven states performs well in some areas and badly in others. They discovered that all states approached these goals in a style shaped by their own history and, in particular, by how they have been affected by the troubles of the twentieth century. Their investigations offer a new, informative way of looking at these nation-states and detail the social and political conditions in each state. Changing Structures of Inequality Yannick Lemel, Heinz-Herbert Noll, 2002. The international sociological community has engaged recently in a controversial discussion on social inequality. There is a vigorous debate on whether the traditional concepts of social class and social stratification are still useful. Some researchers argue that social classes still offer a key explanation to

social inequalities while others challenge the long standing tradition of class analysis New approaches have been proposed to describe recent social changes in the stratification system vanishing middle class two thirds societies cosmographic inequality and classless society among others *Multicultural Variations* Lance W. Roberts, Barry Ferguson, Mathias Bös, 2013-02-01 Contrary to mid twentieth century predictions ethnic pluralism has increased dramatically in North America and significantly in Europe Neither the post 9 11 emphasis on international border security nor anti immigration and anti multiculturalism movements have affected the fifty year trend of increasing labour mobility and sustained levels of migration The ethnic pluralism accompanying this powerful trend has fueled academic research and public debate Contributors report on and develop a conceptualization of ethnic social incorporation and multiculturalism in Canada the United States Germany Greece Bulgaria and Italy This group of countries displays a remarkable variety of both ethnic diversity and public policy responses to ethnic social incorporation over the past four decades It includes two countries Canada and the United States built upon very large scale immigration over the course of more than a century two countries Greece and Italy which until recently were characterized by large scale emigration but now are grappling with immigration one country Bulgaria that was until the 1990s insulated from extensive migration and faces a demographic slump and one Germany that has experimented with isolating temporary populations but is now addressing the responsibilities of permanent immigration *Multicultural Variations* includes national reports describing each of the six countries under investigation and is book ended by introductory and concluding chapters that present a new understanding of and synthesis on multiculturalism that is distinct from either enthusiastic support or ideological critiques Contributors include Mathias Bös Philipps Universität Marburg Germany Antonio Chiesi Università degli Studi di Milano Italy Jason Edgerton University of Manitoba Canada Barry Ferguson University of Manitoba Canada Nikolai Genov Freie Universität Berlin Germany Louis Hicks St Mary's College of Maryland USA Paul Kingston University of Virginia USA Laura Maratou Alipranti National Centre for Social Research Athens Greece Lance W Roberts University of Manitoba Canada Sonia Stefanizzi Università degli Studi di Milano Bicocca Italy and Susanne von Below Johann Wolfgang Goethe Universität Frankfurt Germany *Historical Dictionary of Bulgaria* Raymond Detrez, 2014-12-18 Bulgaria is a country of extraordinary beauty with high wild mountains and gentle valleys and with picturesque cities and idyllic villages It's bordered by Romania Serbia Macedonia Greece Turkey and the Black Sea After many years of communist rule Bulgaria adopted a democratic constitution and began the process of moving toward political democracy and a market economy while combating inflation unemployment corruption and crime The country joined NATO in 2004 and the EU in 2007 This third edition of *Historical Dictionary of Bulgaria* covers its history through a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has over 700 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Bulgaria **Unequal under Socialism** Miglena S.

Todorova, 2021-08-31 *Unequal under Socialism* examines the formation of racial gender and national identities and relations in the socialist state. With a specific focus on Bulgaria, a former socialist country in the Balkans, Miglena S. Todorova traces the intertwined local and global forces driving racialization, socialist state policies, and Eurocentric Marxist and Leninist ideologies, all of which led to valued and devalued categories of women: Roma women, Muslim women, ethnic Bulgarian women, sex workers, and female factory and office workers. These groups were among those marked by socialist authorities for prosperity, accommodation, violent reformation, or erasure. Covering the period from the 1930s to the present and drawing upon original archival sources as well as a constellation of critical theories, *Unequal under Socialism* focuses on the lives of different women to articulate deep doubt about the capacity of socialism to sustain societies where all women prosper. Such doubt, the book suggests, is an under-recognized but important force shaping how women in former socialist countries have related to one another and to other women in the global North and South.

The Cultural Communication of Emigration in Bulgaria
Nadezhda Sotirova, 2021-11-11 In *The Cultural Communication of Emigration in Bulgaria*, Nadezhda Sotirova weaves disparate threads of Balkanism, complaining practices, and the myth of the Bulgarian Situation in order to illuminate local discourses on emigration in Bulgaria. Utilizing ethnography of communication and cultural discourse analysis, the author examines and contextualizes the lived experiences of Bulgarian communities through ethnographic observations, interviews, and cultural discourse analysis. Based on assumptions of communication as infused with voices of the past, reflective, constitutive, and active, this case study of emigration discourses highlights the local social reality as navigated through interaction. Sotirova examines local discourses on emigration as cultural currency available to the members of the community, where discussion of issues in Bulgaria serve to communicatively enact larger cultural notions of being Bulgarian, social relations, *oplakvane* (dwelling), Bulgarian Situation, and action, emigration.
