Religion And Technology A Study In The Philosophy Of Culture:

Religion and Technology Jay Newman, 1997-04-30 Religion and technology have always been at the heart of any civilization says Newman and the changing relations between them have and will continue to have a powerful influence on social and personal development Newman begins with a look at religious criticism of technology most specifically the view that technology undermines religious world views religious practices and spirituality in general But what the religious antitechnologist might be misunderstanding he argues are the essence of technology its relation to progress and its significance as a religious endeavor Indeed religion may be a form of technology or both may be the same as culture itself

Beyond Cutting Edge? Paul C. Heidebrecht, 2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change As a myriad of articles and advertisements demonstrate not only are we preoccupied with technology but we are bombarded with numerous reminders that the cutting edge is in constant motion Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest Indeed it is often assumed that the church has no choice but to find ways to cope with its new technological context This book does not make the same assumptions Building on the work of Mennonite theologian John Howard Yoder it argues that the practices of the church make it possible for Christians to conscientiously engage technology This happens when we recognize that marks of the church such as patience vulnerability and servanthood can put technological ideals such as speed control and efficiency in their proper place In the course of grappling with three examples of morally formative technologies automobiles genetically modified food and the Internet this book goes beyond Yoder's thought by emphasizing that the church also plays a crucial role in our moral formation

Science, Technology, and Society Sal Restivo, 2005-05-19 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture Science Technology and Society contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index

Technology and Culture, 1999 **Science, Technology and Society**, 1996 **Science, Religion, the Humanities and Hope** Anne Runehov, Michael Fuller, 2024-03-19 This book collects a multidisciplinary range of contributions focusing on the prolific and seminal work of Willem Drees in the fields of philosophy of religion philosophy of the humanities and science and theology religion Trained in both theoretical physics and theology philosophy of religion Drees holds doctoral degrees in both theology and in philosophy and amongst other distinguished positions held professorships at the University of Leiden and at the University of Tilburg Drees was also Editor in Chief of Zygon Journal of Religion Science between 2008 and 2018 and served as President of the European Society for the Study of Science and Theology ESSSAT between 2002 and 2008 In 2018 he was elected as member of the Royal Holland Society of Sciences and Humanities KHMW This contributed volume

builds on Drees expansive and provocative scholarly contributions notably around the concept and meaning of naturalism and the humanities to the fields of science and religion as exemplified by his works *Religion Science and Naturalism* 1996 and *What Are the Humanities For* 2021 In a time where more and more young people across the globe are entering higher education such cross disciplinary explorations and re evaluations are vital to the field Accordingly by approaching his work from a variety of disciplines this collection illuminates the broad reach of Drees work and provides scholars from various fields with many new and rich opportunities avenues for research

Science, Technology & Society ,1996 Power Failure Albert Borgmann,2003-06-01 We live in a culture shaped and fueled by technology Usually we equate access to technology with opportunity and the chance to pursue the good life Power Failure raises some crucial if disconcerting questions about technology If technology liberates us what kind of liberation does it promise Are we prospering and by what definition Albert Borgmann looks at the relationship between Christianity and technology by examining some of the invisible dangers of a technology driven lifestyle Specifically he points out how utility and consumption have replaced connection to physical things and meaningful practices in everyday life Power Failure calls us to redeem and restrain technology through simple Christian practices including citizen based decision making shared meals and daily Scripture reading *Historical Abstracts* ,2000

Religion and Technology in the 21st Century: Faith in the E-World George, Susan Ella,2006-05-31 This book examines the unique synergy between religion and technology and explores the many ways that technology is shaping religious expression as well as ways that religion is coming to influence technology Provided by publisher *The Catholic Faith and the Social Construction of Religion* Peter Stuart,Allan M. Savage,2011-09-02 The intent behind this book is to provide grist for the mill for research students and other interested readers Chapter one by author Allan Savage presents an understanding of the social construction of religious activity which maintains that social construction of religion arises from a dialectical engagement within the world from a phenomenological philosophical point of view Co author Peter Stuart presents a classical and traditional point of view and readers expecting academic accord between the authors will be disappointed A further rationale for writing this book is that both Savage and Stuart desire to express their personal convictions in the public forum Both have interests in the ebb and flow of civilization especially as it pertains to the place of faith religion politics and a variety of social phenomena including economics culture gender ethnicity and the family as well as the ebb and flow of money power property and prestige as articulated throughout history They believe that writing about the place of faith and religion in French Canada is crucial if one is to understand the place that this keystone civilization occupies within confederation and its enduring ambivalence regarding its belonging or not to Canada Cognitive Systems and Signal Processing Fuchun Sun,Huaping Liu,Dewen Hu,2019-04-26 This two volume set CCIS 1005 and CCIS 1006 constitutes the refereed proceedings of the 4th International Conference on Cognitive Systems and Signal Processing ICCSIP2018 held in Beijing China in November and December 2018 The 96 revised full papers presented were carefully

reviewed and selected from 169 submissions The papers are organized in topical sections on vision and image algorithms robotics human computer interaction deep learning information processing and automatic driving

The Humanities and the Dynamics of African Culture in the 21st Century John Ayotunde Isola Bewaji, Kenneth W. Harrow, Eunice E. Omonzejie, 2017-05-11 That Africa is at a crossroads in an increasingly globalised world is indisputable Equally unassailable is the fact that the humanities as a broad field of intellection research and learning in Africa appears to have been pigeonholed in debates of relevance in the development aspirations of many African nations Historical experiences and contemporary research outputs indicate however that the humanities in its various shades is critical to Africa's capacity to respond effectively to such problems as security corruption political ineptitude poverty superstition and HIV AIDS among many other mounting challenges which confront the people of Africa The vibrancy and resilience of Africa's cultures against these and other odds of globalisation episodes in the course of our history demand the focused attention of academia to exploit their relevance to contemporary issues This collection provides a comprehensive overview of issues in the humanities at the turn of the 21st century which create a veritable platform for the global redefinition and understanding of Africa's rich cultures and traditions Such areas covered include ruminations in metaphysics and psychology pathos and ethos cinematic and literary connections and historical conceptualisations

Index to Book Reviews in Religion, 1999 The Disunity of American Culture John C. Caiazza, 2017-07-28 The Disunity of American Culture describes culture now when different forces are influencing it than in the past altering it to near incomprehensibility Identity issues have an effect on culture and politics more influential is the question of what support the state is obligated to provide the individual John C Caiazza seeks to explain how this situation came to be He begins with an explanation of the origins of Protestantism in America Caiazza describes how the American religion has declined and the recent responses the decline has provoked Caiazza follows with an analysis of science as it presently exists in American culture The work of three scientists prominent in their respective fields Steven Weinberg in physics E O Wilson in biology and Stanley Milgram in psychology are examined with respect to how their work has influenced culture The author examines the failure of America's school of philosophy pragmatism to explain the relationship between religion science and general culture even though its founders Charles S Peirce and William James made serious efforts to do so He concludes by making the case that there is a contradiction between scientific reason and the claim of state power Caiazza argues that cultural disharmony will guarantee that the secular state never achieves the dominance over culture and political life it desires

Work in Ancient and Medieval Thought B. van de Hoven, 2023-01-16 The main object of this study is to find out whether the differences between classical and medieval thinking about work occupations and technology are so significant that we are justified in speaking of a real break between Antiquity and the Middle Ages in this connection or whether there is a possible continuity of ideas From a comparative perspective five themes are being researched to shed light on this question In the first two chapters the author looks into the traditional view of negative ideas

about work in Antiquity Chapter three subsequently deals with monks and their attitude towards labour In chapter four the place of the so called artes mechanicae in medieval classifications of knowledge is being studied In chapter five we find an analysis of twelfth century sermons ad status These three chapters principally deal with the question whether Christianity brought about a change in attitude towards work Asian Religions, Technology and Science István Keul, 2015-03-27 Over the past five decades the field of religion and science scholarship has experienced a considerable expansion This volume explores the historical and contemporary perspectives of the relationship between religion technology and science with a focus on South and East Asia These three areas are not seen as monolithic entities but as discursive fields embedded in dynamic processes of cultural exchange and transformation Bridging these arenas of knowledge and practice traditionally seen as distinct and disconnected the book reflects on the ways of exploring the various dimensions of their interconnection Through its various chapters the collection provides an examination of the use of modern scientific concepts in the theologies of new religious organizations and challenges the traditional notions of space by Western scientific conceptions in the 19th century It looks at the synthesis of ritual elements and medical treatment in China and India and at new funeral practices in Japan It discusses the intersections between contemporary Western Buddhism modern technology and global culture and goes on to look at women s rights in contemporary Pakistani media Using case studies grounded in carefully delineated temporal and regional frameworks chapters are grouped in two sections one on religion and science and another on religion and technology Illustrating the manifold perspectives and the potential for further research and discussion this book is an important contribution to the studies of Asian Religion Science and Technology and Religion and Philosophy **America, History and Life** , 2005 Article abstracts and citations of reviews and dissertations covering the United States and Canada

Thinking Jewish Culture in America Ken Koltun-Fromm, 2013-12-11 Thinking Jewish Culture in America argues that Jewish thought extends our awareness and deepens the complexity of American Jewish culture This volume stretches the disciplinary boundaries of Jewish thought so that it can productively engage expanding arenas of culture by drawing Jewish thought into the orbit of cultural studies The eleven contributors to Thinking Jewish Cultures together with Chancellor Arnold Eisen s postscript position Jewish thought within the dynamics and possibilities of contemporary Jewish culture These diverse essays in Jewish thought re imagine cultural space as a public and sometimes contested performance of Jewish identity and they each seek to re enliven that space with reflective accounts of cultural meaning How do Jews imagine themselves as embodied actors in America Do cultural obligations limit or expand notions of the self How should we imagine Jewish thought as a cultural performance What notions of peoplehood might sustain a vibrant Jewish collectivity in a globalized economy How do programs in Jewish studies work within the academy These and other questions engage both Jewish thought and culture opening space for theoretical works to broaden the range of cultural studies and to deepen our understanding of Jewish cultural dynamics Thinking Jewish Culture is a work about Jewish cultural identity reflected through literature visual

arts philosophy and theology But it is more than a mere reflection of cultural patterns and choices the argument pursued throughout *Thinking Jewish Culture* is that reflective sources help produce the very cultural meanings and performances they purport to analyze

The Body in Culture, Technology and Society Chris Shilling, 2005 Once in a while a manuscript stops you in your tracks What we are offered here is no recovering of old ground but a step change in perspectives on body matters that is both innovative and of fundamental importance to anyone working on this sociological terrain This text is groundbreaking and simply has to be read *Acta Sociologica* This is Shilling at his creative best these are seminal observations of the classical theories drawn together as never before Moreover as a framework this monograph provides a genuinely new and fertile way of reconsidering not just classical sociology but contemporary forms as well Sport Education Society This is a comprehensive theoretically sophisticated and ambitious treatise on the body that draws from and applies both classical and contemporary sociological theory in a manner that is innovative and thought provoking This book is engaging and thought provoking but Shilling's greatest achievement is his ability to illustrate the importance and continued relevance of classical and contemporary sociological theory to real world concerns It is a book worthy of widespread attention It reinvigorated my interest in the sociological classics and contained countless nuggets of interesting information that led me to conclude that it would be a worthy book to recommend to a broad sociological audience *Teaching Sociology* Shilling's book like his earlier *The Body and Social Theory* is crucial reading a further valuable contribution in a field where he has provided so much *Theory Psychology* This is an impressive book by one of the leading social theorists working in the field of body studies It provides a critical summation of theoretical and substantive work in the field to date while also presenting a powerful argument for a corporeal realism in which the body is both generative of the emergent properties of social structure and a location of their effects Its scope and originality make it a key point of reference for students and academics in body studies and in the social and cultural sciences more generally Ian Burkitt *Reader in Social Science* University of Bradford Chris Shilling is as always a lucid guide through the dense thickets of the sociology of the body and his chapters on the fields of work sport eating music and technology brilliantly show how abstract theoretical debates relate to the real world of people's lives Professor Stephen Mennell *University College Dublin* What I find very useful and without any doubt valuable not only in Shilling's *The Body in Culture Technology and Society* but in his work in general is the breadth and profoundness of his discussion about the body the style Shilling maintains is crucial for further development of the sociology of the body as a discipline for it provides us with a rich intellectual environment about the body *Sociology* For any colleague wanting to have a clear idea of how studies of the body can be empirically grounded as well as theoretically rich Chris Shilling's *The Body in Culture Technology and Society* is the book to read To my mind it offers the best account thus far of not only how social action is embodied and must be recognised as such but also of how social structures condition and shape embodied subjects in a variety of social arenas This is wonderful insightful stuff the ideas and intricate thoughts of a

scholar such as Shilling who has been immersed in thinking about the complexities of the body in society as well as sociology for a number of years *Sociology of Health and Illness* This is a milestone in the sociology of the body The book offers the most comprehensive overview of the field to date and an innovative framework for the analysis of embodiment It is founded on a revised view of the relation of classical works to the body It argues that the body should be read as a multi dimensional medium for the constitution of society Upon this foundation the author constructs a series of analyses of the body and the economy culture sociality work sport music food and technology
