Jean-Michel Le Bot, 2021-07-27 D s la naissance de l ecologie politique les liens entre religion et crise ecologique ont fait l objet de discussions souvent passionn es Les uns la suite de l historien Lynn Townsend White Jr d non aient le caract re excessivement anthropocentrique de la religion chr tienne tandis que d autres appelaient un renouveau spirituel permettant de retrouver une harmonie avec la Terre contre la s cularit et la technicit excessives du monde moderne Cet ouvrage entend apporter un clairage sur une expression r gionale de ce d bat Il s int resse aux discours qui en Bretagne partir des ann es 1970 et dans le cadre du mouvement culturel breton ont associ ecologie celtisme et d nonciation de l emprise de l glise catholique Mais il montre aussi que des catholiques la cs ou religieux anticipaient largement l appel la conversion ecologique lanc en 2015 par le pape Fran ois Il avance l hypoth se in fine que ces questionnements et r flexions au sujet du christianisme r pondaient leur mani re dans une sorte de qu te panenth iste au souhait de White lui m me de trouver une solution religieuse la crise ecologique **L'écologie et la Bible** Albert Hari, 1995 **L'étude de la religion au Québec** Guy Ménard, Eric Bellavance, 2001 *Ecologie et économie en crise : qu'en disent les religions ?* Thierry Magnin, 2011-03-01 La crise financi re conomique et sociale remet en question nos mani res de vivre notre vision du progr s de la croissance et de la solidarit Devant ces immenses d fis sur quelles valeurs et

quelles spiritualités s'appuient pour vivre une économie qui mette l'homme au centre en intégrant l'écologie de l'environnement et l'écologie humaine. Économistes, chefs d'entreprise, écologistes et représentants des grandes religions juive, catholique, protestante, musulmane, bouddhiste en débattent et proposent des pistes. **RELIGIONS, ENVIRONMENT AND ECOLOGY** GÜLHAN KARADAĞ AĞKURT, The egocentric approach places humans at the center of nature leading to the exploitation of natural resources. However, humans are only a part of nature and are entrusted with the responsibility of protecting it. Nature is the Creator's work and humans are its caretakers. In contrast to the materialistic worldview, most religions emphasize respect for nature. This work explores the perspectives on nature and the universe in major world religions such as Islam, Christianity, Judaism as well as in the philosophical belief systems of Buddhism and Hinduism. The first chapter examines the relationship between ecology and religion, analyzing environmental issues. The second chapter discusses the value of nature in mystical beliefs such as Buddhism and Hinduism. The third chapter focuses on the monotheistic religions, Islam, Christianity, and Judaism, and the importance they place on nature. **Vers une écologie intégrale** Martin Kopp, 2023-11-22. Ce livre interroge la racine spirituelle du bouleversement écologique. Si les causes matérielles de ce bouleversement sont pour la plupart connues, l'auteur relie également l'anthropocentrisme et la démesure, un certain imaginaire de la nature, des retraits spirituels et une éthique utilitariste. Autant d'aspects dans lesquels le christianisme a joué un rôle certain. La conscience de ce rôle le justifie et exige une reprise de l'écologie de la création. Devant le défi de sauvegarder l'habitabilité de la Terre, la pensée de Dieu comme Créateur et du monde et des vivants peut être mobilisée. Nouveaux frais. Vers une écologie intégrale montre non seulement l'interdépendance des éléments du vivant entre eux, mais aussi l'interdépendance des enjeux écologiques et de la justice humaine. D'ailleurs, l'auteur déploie les promesses que réserve une conversion écologique, davantage que les menaces de l'immobilisme. *Penser l'écologie dans la tradition catholique* Fabien Revol, 2018-10-24. Après la diffusion de l'Encyclique *Laudato si* du pape François, il semble que le catholicisme ait pris bras le corps la question écologique. Est-ce un fait nouveau? Le but de cet ouvrage est de donner des éléments substantiels et représentatifs de la tradition théologique et spirituelle catholique au fil des siècles afin de mettre en valeur l'originalité du rapport de l'homme à la nature et les représentations de la création véhiculées par la révélation chrétienne reçue et vécues par la tradition catholique. **Crise écologique, crise des valeurs?** Dominique Bourg, Philippe Roch, 2010. L'origine des menaces écologiques actuelles repose pour une grande part sur les conceptions spirituelles et culturelles que l'Occident nourrit. L'égard de la nature. Les matrices grecques et judéo-chrétiennes ont fini par supporter dans leurs ultimes conséquences l'idée selon laquelle l'humain est un être d'exception auquel tout est dû. Malgré les avertissements lancés depuis le milieu du XXe siècle par toute une série d'experts, la course au développement écologique s'accroît au point qu'il s'agit désormais de remettre en discussion les substrats culturels et spirituels de notre civilisation. Les 22 auteurs de ce plaidoyer vont dans ce sens. Leurs contributions s'organisent en trois parties. La première traite des héritages d'un paradigme chrétien autour du célèbre texte prophétique du prophète d'histoire américaine Lynn White Jr. Les racines historiques

de notre crise écologique 1967 reproduit dans ce livre Puis l'ouvrage évoque les apports actuels de l'anthropologie quant aux conséquences de l'hégémonie de la culture occidentale Enfin plusieurs expériences de terrain et d'observations diverses complètent le propos d'un livre qui accueille notamment des critiques de Nicolas Hulot Philippe Descola Dominique Bourg et Philippe Roch

Dieu et l'écologie, *Inherited Land* Whitney A. Bauman, Richard R. Bohannon, Kevin J. O'Brien, 2011-08-04 Religion and ecology has arrived What was once a niche interest for a few academics concerned with environmental issues and a few environmentalists interested in religion has become an established academic field with classic texts graduate programs regular meetings at academic conferences and growing interest from other academics and the mass media Theologians ethicists sociologists and other scholars are engaged in a broad dialogue about the ways religious studies can help understand and address environmental problems including the sorts of methodological terminological and substantive debates that characterize any academic discourse This book recognizes the field that has taken shape reflects on the ways it is changing and anticipates its development in the future The essays offer analyses and reflections from emerging scholars of religion and ecology each addressing her or his own specialty in light of two questions 1 What have we inherited from the work that has come before us and 2 What inquiries concerns and conversation partners should be central to the next generation of scholarship The aim of this volume is not to lay out a single and clear path forward for the field Rather the authors critically reflect on the field from within outline some of the major issues we face in the academy and offer perspectives that will nurture continued dialogue

Les philosophies de l'écologie Guillaume Lejeune, 2023-08-01 Il existe bien des façons de penser le rapport de l'humain à l'environnement et de répondre par conséquent au problème climatique actuel Tandis que certains courants à l'antiprécisme l'hypothèse Gaïa l'écologie profonde rassemblent ceux qui considèrent que notre conception de la nature et du vivant est repenser d'autres l'cosocialisme l'cofminisme la sobriété volontaire ont pour objet d'interroger l'humain et sa façon de faire société Enfin certains mouvements la permaculture les villes en transition l'copdagogie se centrent sur l'idée même de relation en faisant valoir l'importance de préserver une diversité de liens à l'environnement l'oppose de ces visions critiques de l'écologie il existe aussi des personnes qui considèrent qu'il ne faut pas remettre en cause la façon dont on se lie au monde mais qu'on peut agir sur les effets de nos comportements travers la mise au point de techniques diverses L'objectif de ce livre est de fournir un panorama des différentes mouvances écologistes En les articulant les unes aux autres il s'agit aussi d'en faire ressortir les enjeux respectifs Docteur en Philosophie ancien boursier du FNRS et de la Fondation Alexander von Humboldt Guillaume Lejeune est animateur Philo au CAL Charleroi

Religious Environmental Activism Jens Köhrsen, Julia Blanc, Fabian Huber, 2022-12-20 This volume explores how religious and spiritual actors engage for environmental protection and fight against climate change Climate change and sustainability are increasingly prominent topics among religious and spiritual groups Different faith traditions have developed green theologies launched environmental protection projects and issued public statements on climate change Against this background

academic scholarship has raised optimistic claims about the strong potentials of religions to address environmental challenges Taking a critical stance with regard to these claims the chapters in this volume show that religious environmentalism is an embattled terrain Tensions are an inherent part of religious environmentalism These do not necessarily manifest themselves in open clashes between different parties but in different actions views theologies ambivalences misunderstandings and sometimes mistrust Keeping below the surface these tensions can create effective barriers for religious environmentalism The chapters examine how tensions are manifested and dealt with through a range of empirical case studies in various world regions Covering different religious and spiritual traditions they reflect on intradenominational interdenominational interreligious and religious societal tensions Thereby this volume sheds new light on the problems that religions face when they seek to take an active role in today's societal challenges The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Écologie et société Yanni Gunnell, 2009-09-16 Contrairement aux époques révolues où l'écologie n'était ni une science ni même une conscience la société actuelle se passionne pour une nature qui est tant une ressource tant un processus tant un patrimoine et demande des réponses aux problèmes environnementaux de la planète Pourtant de l'empirisme insatiable des naturalistes l'inflation des modèles mathématiques la littérature biologiste est foisonnante et susceptible de susciter la perplexité plutôt que de stimuler l'action Tout en offrant des perspectives sur l'histoire de l'idée de nature ainsi qu'une grille de compréhension de l'écologie scientifique ce livre examine comment le savant observateur et comptable de ce qui existe et le politique artisan de ce qui n'existe pas encore peuvent concilier utilitarisme éthique environnementale et objectivité scientifique Il s'appuie sur une large palette d'exemples et de retours d'expérience en biologie de la conservation et en préservation et restauration des systèmes naturels Assorti d'un chapitre de mises au point didactiques il propose des pistes pour une meilleure conciliation dans les décennies venir de l'écologie et du pragmatisme
