Religion Philosophy Yoga:

Religion, Philosophy, Yoga Jean Filliozat, 1991-01-01 Yoga as Philosophy and Religion Surendranath

Dasgupta, 1947-01-01 However dogmatic a system of philosophical enquiry may appear to us it must have been preceded by a criticism of the observed facts of experience The details of the criticism and the processes of self argumentation by which the thinker arrived at his theory of the Universe might indeed be suppressed as being relatively unimportant but a thoughtful reader would detect them as lying in the background behind the shadow of the general speculations but at the same time setting them off before our view An Aristotle or a Patanjali may not make any direct mention of the arguments which led him to a dogmatic assertion of his theories but for a reader who intends to understand them thoroughly it is absolutely necessary that he should read them in the light as far as possible of the inferred presuppositions and inner arguments of their minds it is in this way alone that he can put himself in the same line of thinking with the thinker whom he is willing to follow and can grasp him to the fullest extent In offering this short study of the Patanjali metaphysics I shall therefore try to supplement it with such of my inferences of the presuppositions of Patanjali's mind which I think will add to the clearness of the exposition of his views though I am fully alive to the difficulties of making such inferences about a philosopher whose psychological social religious and moral environments differed so widely from ours An enquiry into the relations of the mental phenomena to the physical has sometimes given the first start to philosophy The relation of mind to matter is such an important problem of philosophy that the existing philosophical systems may roughly be classified according to the relative importance that has been attached to mind or to matter There have been chemical mechanical and biological conceptions which have ignored mind as a separate entity and have dogmatically affirmed it to be the product of matter only There have been theories of the other extreme which have dispensed with matter altogether and have boldly affirmed that matter as such has no reality at all and that thought is the only thing which can be called Real in the highest sense All matter as such is non Being or M y or Avidya There have been Nihilists like the Nyayadi Buddhists who have gone so far as to assert that neither matter nor mind exists Some have asserted that matter is only thought externalized some have regarded the principle of matter as the unknowable Thing in itself some have regarded them as separate independent entities held within a higher reality called God or as two of his attributes only and some have regarded their difference as being only one of grades of intelligence one merging slowly and imperceptibly into the other and held together in concord with each other by pre established harmony Underlying the metaphysics of the Yoga system of thought as taught by Patanjali and as elaborated by his commentators we find an acute analysis of matter and thought Matter on the one hand mind the senses and the ego on the other are regarded as nothing more than two different kinds of modifications of one primal cause the Prakriti But the self intelligent principle called Purusha spirit is distinguished from them Matter consists only of three primal qualities or rather substantive entities which he calls the Sattva or intelligence stuff Rajas or energy and Tamas the factor of obstruction or mass or inertia It is

extremely difficult truly to conceive of the nature of these three kinds of entities or Gu as as he calls them when we consider that these three elements alone are regarded as composing all phenomena mental and physical In order to comprehend them rightly it will be necessary to grasp thoroughly the exact relation between the mental and the physical What are the real points of agreement between the two How can the same elements be said to behave in one case as the conceiver and in the other case as the conceived Thus V caspati says The reals gu as have two forms viz the determiner or the perceiver and the perceived or the determined In the aspect of the determined or the perceived the gu as evolve themselves as the five infra atomic potentials the five gross elements and their compounds In the aspect of perceiver or determiner they form the modifications of the ego together with the senses

A Student's Guide to the History and Philosophy of Yoga Peter Connolly,2014 The word yoga conjures up in the minds of many Westerners images of people performing exercises and adopting unusual contortive postures Such exercises and postures do have a

place within the practice of yoga but it is much more than that Indeed the early literature on yoga describes and defines it as a form of mental rather than physical discipline Yoga is also associated with the Indian subcontinent and the religions of Hinduism and Buddhism This revised edition of a classic textbook concentrates on the evolution of yoga in the context of Indian culture although the final chapters also explore its links with non Indian mystical traditions and its developments outside India during the modern period The book is aimed at both university students taking courses in comparative religion and philosophy and practitioners of yoga who seek to go beyond the activity and explore its spiritual dimensions It presents yoga in the context of its historical evolution in India and explains the nature of its associations with various metaphysical doctrines It also draws on a number of conceptual schemes designed to facilitate comparative study Some of these are employed throughout the book to link the material from each chapter within a common framework This edition incorporates revisions and expansions to most chapters and contains a new chapter on the future of modern yoga in the West
