Religion Reason The Self:

Kierkegaard on Self, Ethics, and Religion Roe Fremstedal, 2022-02-17 A new perspective on Kierkegaard and his importance for historical and contemporary debates on self ethics and religion *European Self-Reflection Between Politics and Religion* L. Bruun, K. Lammers, G. Sørensen, 2013-05-07 This collection of essays suggests new ways of looking at the intertwining of political and religious agonies in the period 1914-1991 The long European civil war revealed that Europe far from being formed by a one track progression has followed several tracks or fault lines leading to a number of contrasts in European self perception Religion and Public Reason Maureen Junker-Kenny, 2014-04-02 This book compares three approaches to public reason and to the public space accorded to religions the liberal platform of an overlapping consensus proposed by John Rawls Jürgen Habermas's discourse ethical reformulation of Kant's universalism and its realization in the public sphere and the co-founding role which Paul Ricoeur attributes to the particular traditions that have shaped their cultures and the convictions of citizens The premises of their positions are analysed under four aspects 1 the normative framework which determines the specific function of public reason 2 their anthropologies and theories of action 3 the dimensions of social life and its concretization in a democratic political framework 4 the different views of religion that follow from these factors including their understanding of the status of metaphysical and religious truth claims and the role of religion as a practice and conviction in a pluralist society Recent receptions and critiques in English and German are brought into conversation philosophers and theologians discuss the scope of public reason and the task of translation from faith traditions as well as the role they might have in the diversity of world cultures for shaping a shared cosmopolitan horizon

The Philosophy of Religion Linda Zagzebski, 2007-03-12 An accessible and engaging introduction to the philosophy of religion Written with verve and clarity by a leading philosopher and contributor to the field Places key issues and debates in the philosophy of religion in their historical contexts highlighting the conditions that led to the development of the field Addresses the core topics among them the existence of God the problem of evil death and the afterlife and the problem of religious diversity Rich with argument yet never obtrusive Forms part of the Fundamentals of Philosophy series in which renowned scholars explore the fundamental issues and core problems in the major sub-disciplines of philosophy Self Definition Teodros Kiros, 2019-10-10 Self Definition argues that sex gender and race are constructions by the ineffable self as it seeks to define its possibilities free of domination The self's embodiments are themselves performances of self definition Teodros Kiros supports his argument by a careful reading of the literature from both the Global South and Global North that spans figures works and eras from antiquity to our late modern present These readings demonstrate that race gender and sex are performed in the Global South radically differently from in the Global North These three notions as markers of identity are fluid open and expansive and Kiros brilliantly shows this through inquiry into thought rooted in Egypt Ethiopia India and China By the time that the Global North forges possibilities of the self in the modern period race gender and sex

become fixed Biology and anatomy become understood as destinies and the possibilities of the self are deeply constrained This book approaches case studies of key figures and movements chronologically and thematically and in doing so Kiros highlights the tensions between the openness of the Global South and the rigidity of the Global North through which human possibilities as exercises of self definition become clear under conditions of freedom Our views of self definition will forever be transformed after reading this important text

Western Self-Contempt Benedict Beckeld,2022-05-15 Western Self Contempt travels through civilizations since antiquity examining major political events and the literature of ancient Greece Rome France Britain and the United States to study evidence of cultural self hatred and its cyclical recurrence Benedict Beckeld explores oikophobia described by its coiner Sir Roger Scruton as the felt need to denigrate the customs culture and institutions that are identifiably ours in its political and philosophical applications Beckeld analyzes the theories behind oikophobia along with their historical sources revealing why oikophobia is best described as a cultural malaise that befalls civilizations during their declining days Beckeld gives a framework for why today s society is so fragmented and self critical He demonstrates that oikophobia is the antithesis of xenophobia By this definition the riots and civil unrest in the summer of 2020 were an expression of oikophobia Excessive political correctness that attacks tradition and history is an expression of oikophobia Beckeld argues that if we are to understand these behaviors and attitudes we must understand oikophobia as a sociohistorical phenomenon Western Self Contempt is a systematic analysis of oikophobia combining political philosophy and history to examine how Western civilizations and cultures evolve from na ve and self promoting beginnings to states of self loathing and decline Concluding with a philosophical portrait of an increasingly interconnected Western civilization Beckeld reveals how past events and ideologies both in the US and in Europe have led to a modern culture of self questioning and self rejection

The Reasoning of Unreason John Roberts, 2018-08-23 The twenty first century so far has seen the global rise of authoritarian populism systematic racism and dogmatic metaphysics Even though these events demonstrate the growth of an age of unreason in this original and compelling book John Roberts resists the assumption that such thinking displays an unthinking irrationality or loss of reason instead he asserts that an important feature of modern reactionary politics is that it offers a supposedly convincing integration of the particular and the universal This move is defined by what Roberts calls the reasoning of unreason and has deep roots in the history of Western thought and politics Tracing the dark history of enlightenment disenlightenment John Roberts explores the reasoning of unreason across centuries from Aquinas William of Ockham the most important treatise on witchcraft Malleus Maleficarum Locke Kant and Count Arthur de Gobineau to Social Darwinism Nazism Carl Schmitt Leo Strauss and Friedrich von Hayek Roberts provides a new set of philosophical political tools to understand the formation and denigration of the rational subject and the current reinvestment in various forms of political unreason globally The Reasoning of Unreason is the first book to draw on the philosophy of reason political philosophy political theory and political history in order to produce a dialectical account of the making of reason internal to the forces of unreason and the limits of reason

Reason's Developing Self-Revelation Stephen Theron, 2014-07-24 This book the third of four in a series coming after New Hegelian Essays demonstrating how Hegel's philosophy perfects the rational presentation of any and all religious representation and its successor From Narrative to Necessity showing the coincidence of the doctrines of Trinity Creation and Incarnation with the humanist ideal expounds religion and Christianity in particular as continuous unfolding in history of Reason's Developing Self-Revelation latterly in the crucible of Absolute Idealism which is philosophy proper A fourth book on Hegel's contribution to the reconciliation of cultures explores the implications of Hegel's thought for any possible ecumenism Meanwhile this third book opens with three chapters freeing Christian orthodoxy from all figurative representation showing the connection with Hegel's treatment of the logical forms under the heading of The Subjective Notion see New Hegelian Essays chapter seventeen in his system of Logic The book then progresses through several chapters of Hegelian Logic and metaphysics concerning concepts of the self explanatory the one and the many absolute simplicity and coming among other related topics to a discussion of evolution philosophically viewed in relation to our knowledge and its possibility By this route we come to a final question and chapter Christianity without or within God As God has to be self-determining he cannot be given any finite name but is the Absolute loosed from all things literally or Pure Act which is also Idealism demonstrates the Absolute Idea specifically It follows that Idea adds no qualification to Absolute since there is by its concept nothing outside of the latter not even we ourselves We are images and signs thereof differentiated from it but not other than it

Jan-Olav Henriksen,2016-04-08 Religion is not only about understanding the world it is just as much about how to develop and shape the self s experience of itself Because the religious self is shaped by our symbols of God and symbols of God are also shaped by the self theology and philosophy of religion cannot ignore this interplay or the psychological dimension when they discuss what symbols of God are adequate and not By discussing critically different ways the symbol of God functions in the formation of the self the book develops a nuanced and original approach to the interplay between God and the self It suggests that play is actually an important metaphor in order to develop a dynamic understanding of religion s way of relating God and the Self This approach challenges understandings of religion focussing only its cognitive claims as well as those who emphasize doctrinal orthodoxy as the most important element in religion **Mastering Self** Donald G.
