Religion, the State, and Education James Edward Wood, Baylor University. Institute of Church-State Studies, 1984 J M Dawson Institute of Church State Studies Bibliography p 147 151 **Mere Creatures of the State?** William Bentley Ball, 1994 **Between Church and State** James W. Fraser, 2016-09-15 Looking at the difficult question of how private issues of faith can be reconciled with the very public nature of schooling Fraser's classic book paints a complex picture of how a multicultural society struggles to take the deep commitments of people of faith into account including people of many different faiths and no faith In this fully updated second edition Fraser tackles the culture wars adding fresh material on current battles over public funding for private religious schools He also addresses the development of the long simmering evolution creationism debate and explores the tensions surrounding a discussion of religion and the accommodation of an increasingly religiously diverse American student body *Between Church and State* includes new scholarship on the role of Roger Williams and William Penn in developing early American conceptions of religious liberty *State Religious Education and the State of Religious Life* Liam Gearon, Joseph Prud'homme, 2018-04-04 This book explores recent calls to increase instruction of the Bible in American public schools The work develops a distinctive philosophical and trans Atlantic assessment of these proposals by critiquing European approaches to religious education and by reviewing the role of religion in contemporary democracies The work will spark debate among political scientists policy experts Religious Education instructors theologians and social and educational theorists *Church and State in America: A Bibliographical Guide* Bloomsbury Publishing, 1987-08-14 The second in a two volume bibliography on church state relations in U S history this book contains eleven critical essays and accompanying bibliographical listings on periods or topics from the Civil War to the present day Each essay reviews the available relevant literature and the listings emphasize critical studies and documents published in the last quarter century This reference work will enable the reader to grasp the historiographic issues become acquainted with the resources available and move on to interpret current as well as past issues more knowledgeably and effectively **Law, Education, and the Place of Religion in Public Schools** Charles Russo, 2021-09-30 This text presents a comparative cross cultural analysis of the legal status of religion in public education in eighteen different nations while offering recommendations for the future improvement of religious education in public schools Offering rich analytical insights from a range of renowned scholars with expertise in law education and religion this volume provides detailed consideration of legal complexities impacting the place of religion and religious education in public education The volume pays attention to issues of national and international relevance including the separation of the church and state public funding of religious education the accommodation of students devotional needs and compulsory religious education The volume thus highlights the increasingly complex interplay of religion law and education in diverse educational settings and cultures across developing and developed nations Providing a valuable contribution to the field of religious secondary

education research this volume will be of interest to researchers academics and educators with an interest in religion and law international and comparative education and those involved with educational policy at all levels Those more broadly interested in moral and values education will also benefit from the discussions the book contains Educational Secularization within Europe and Beyond Mette Buchardt, 2024-11-04 Did religion disappear with modernization and the secularization reforms that changed the relation between religion and state throughout the European empires and nation states from late nineteenth century onwards Or was religion rather transformed becoming a part of the new social and national imaginaries on the road from European empires to African Middle Eastern European Union and Post Soviet nation states What are the historical roots behind the divisions of state church and education that characterized the late nineteenth and during the twentieth century What has been the role of education in this context both with regard to political reforms targeting the education systems and with regard to broader public enlightenment efforts and modernization of the state Connecting scholars across the fields of history and historical sociology of education church history and historical religion research and political history and covering the time span from the early modern period and up until the present this volume explores how education reform has functioned as an arena for the political project of secularization and in which way this contributed to transforming and revitalizing religion *Human Rights and the Separation of State and Religion* Francis-Vincent Anthony, Hans-Georg Ziebertz, 2023-08-05 This text highlights key aspects of the religion church state relationship debate and related hitherto marginal topics The contributions make clear that there is no clear blueprint for an optimal relationship between religion church and state Individual states and countries are analysed on the granular level for example to address mono religious against poly religious as well as secular societies Among others chapters address education migration and politics against religion as well as the effect of LGBTQ communities on religion and societies This collected volume appeals to researchers and students working in religious studies and political science **Religion, State, and Political Culture in Japan** Tokihisa Sumimoto, 2023-11-02 Japan had developed a secular civilization long before going through its modern period characterized by the officially sanctioned unification of nationalism and state worship that reached its apotheosis during World War II followed by the economic growth oriented post war period While the relationship between religion and state has varied significantly over time what has been consistently observed throughout Japan s history is the absence of religions that are socially influential but independent from the state or the absence of a dualistic relationship between religion and state The kind of political ethos that should underpin democratic principles such as the rule of law and human rights has remained underdeveloped This book examines the concept of reconstructive postmodernism a perspective that has emerged from a normative approach to international relations that emphasizes the need to democratize and humanize the secularistic civilizations based on the reconstruction of spirituality and religiosity Using this concept this book offers a number of implications of its findings to the case of Japan and for global governance in the post secular age more

broadly The Routledge International Handbook of Religious Education Derek Davis, Elena Miroshnikova, 2013-02-01 How and what to teach about religion is controversial in every country The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions It discusses how three models in particular seem to dominate the landscape Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion often to the detriment of other religions and their adherents Countries with traditions that differentiate church and state tend to adopt a separation model thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally leaving it to religious institutions and the home setting to provide religious instruction Still other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught Inevitably there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country These chapters discuss Legal parameters in terms of subjective versus objective instruction in religion Constitutional statutory social and political contexts to religious approaches Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning Regional assessments which provide a welcome overview and comparison This comprehensive and authoritative volume will appeal to educators scholars religious leaders politicians and others interested in how religion and education interface around the world

Religion-State Relations in the United States and Germany Claudia E. Haupt, 2011-12-08 This comparative analysis of the constitutional law of religion state relations in the United States and Germany focuses on the principle of state neutrality A strong emphasis on state neutrality a notoriously ambiguous concept is a shared feature in the constitutional jurisprudence of the US Supreme Court and the German Federal Constitutional Court but neutrality does not have the same meaning in both systems In Germany neutrality tends to indicate more distance between church and state whereas the opposite is the case in the United States Neutrality also has other meanings in both systems making straightforward comparison more difficult than it might seem Although the underlying trajectory of neutrality is different in both countries the discussion of neutrality breaks down into largely parallel themes By examining those themes in a comparative perspective the meaning of state neutrality in religion state relations can be delineated

The American Theory of Church and State Loren P. Beth, 2002 **State-Religion Relationships and Human Rights Law** Jeroen

Temperman, 2010-05-17 This book examines the question of how the mode of state religion identification affects the state's scope for compliance with human rights law It presents a human rights based assessment of the various modes of state religion identification and of the various forms of state practice that surround and characterize these different state religion

models A close assessment of norms of human rights law substantiates that although human rights law on the face of it is seemingly neutral to the issue of state religion identification legal principles can be extrapolated that have a profound bearing on the question of legitimacy of the possible diverse relationships that may exist between the state and religion A range of thematic case studies on among other issues Establishment of Religion the Equal Religious Rights of Others Religion Freedom of Expression Religion Political Rights Religion Educational Rights Religion Freedom of Association and Religion Equal Employment Opportunities demonstrates that existing regimes of positive state identification with religion are not devoid of forms of institutionalised discrimination and de facto practices of discrimination on grounds of religion or belief or lack thereof At the same time it is observed by the author that in some secular or separationist states the ideals of state secularism and separationism have come to be considered ends in themselves This has given rise to situations where the principles of secularism and separationism are construed so as to impose illegitimate limits on the activities of religions or illegitimate limits on the individual manifestation of certain beliefs This book makes a case for the recognition of a state duty to remain impartial with respect to religion or belief in all regards so as to comply with people s fundamental right to be governed at all times in a religiously neutral manner

A Theory of Catholic Education Sean Whittle, 2014-11-20 Presenting a robust and philosophically based account of education from the Catholic point of view Sean Whittle engages with important debates and questions concerning the nature and purpose of Catholic education and schooling The book opens with a review of the criticisms that have emerged about the prevalence of Catholic schools within the state system and indeed about the very notion of there being such a thing as Catholic education The author then goes on to survey official Church teaching on education and the work of key Catholic thinkers Newman and Maritain before moving on to discuss the writings of Karl Rahner a leading twentieth century theologian A Theory of Catholic Education argues that Rahner's approach with his focus on the place of mystery in human experience provides a way forward Ultimately Whittle demonstrates how Catholic theology can offer a unique and much needed theory of education

Faith in Schools? Ian MacMullen, 2016-05-31 Should a liberal democratic state permit religious schools Should it fund them What principles should govern these decisions in a society marked by religious and cultural pluralism In *Faith in Schools* Ian MacMullen tackles these important questions through both political and educational theory and he reaches some surprising and provocative conclusions MacMullen argues that parents' desires to educate their children in the faith must not be allowed to deny children the opportunity for ongoing rational reflection about their values Government should safeguard children's interests in developing as autonomous persons as well as society's interest in the education of an emerging generation of citizens But he writes liberal theory does not support a strict separation of church and state in education policy MacMullen proposes criteria to distinguish religious schools that satisfy legitimate public interests from those that do not And he argues forcefully that governments should fund every type of school that they permit rather than favoring upper income parents by allowing them to buy their way out of the requirements deemed suitable for children educated at public expense Drawing on psychological research he proposes public funding of a broad range of religious primary schools because they can help lay the foundations for young children's future autonomy In secondary education by contrast even private religious schools ought to be obliged to provide robust exposure to the ideas of other religions to atheism and to nonreligious approaches to ethics
