Lifeworlds of Islam Mohammed A. Bamyeh, 2019-04-22 How do old ideas continue to appear relevant in a modern world A sociological approach to Islam allow us to approach an answer to this question In *Lifeworlds of Islam* Mohammed A Bamyeh shows that Islam has typically operated not in the form of standard dogmas but more often as a compass for practical individual orientations or lifeworlds Through a comprehensive sociological analysis of Islam he maps out how Muslims have employed the faith to foster global networks public philosophies and engaged civic lives both historically and in the present Bamyeh further argues that all three fields are poorly understood in recent literature which tends to focus on one specific problem or another and does not take into account the variety of lifeworlds in which Islam operates The book contends that the larger preoccupations of ordinary Muslims how to imagine a global society how to guide life in the manner of a total philosophy and how to relate to the world of daily struggles in organized or semi organized civic forums and social movements are neither unique to the present period nor to religious life They are rather shared universal quandaries A focused empirical lens on the career of a religion *Lifeworlds of Islam* contributes to the larger literature and provides insight into the nature of global citizenship the philosophical needs of individuals and the ethical values that foster social participation

Lifeworlds and Ethics Margaret Chatterjee, 2007 **J.L. Mehta on Heidegger, Hermeneutics and Indian Tradition** William J. Jackson, 2023-11-27 This book presents a selection of essays by the Indian philosopher J L Mehta on the topics of hermeneutics and phenomenology containing many original reflections on questions of interpretation and the creative retrieval and renewal of meanings from ancient traditions Beginning with essays on sources of modern phenomenological methods the work goes on to articulate principles of phenomenology and to apply them to the interpretation of Hindu traditions and texts The final group of essays consider the problems of East West understanding and issues of intercultural relationships and the possibilities of planetary thinking In the fourteen essays brought together here Mehta elucidates the contributions of continental philosophers such as Husserl Heidegger and Gadamer and interprets meanings of the Rig Veda Krishna in the Mahabharata and the life of Sri Aurobindo He also critically examines Western perceptions of India as a culture steeped in its own dreams and explores the processes of rediscovering and re appropriating through interpretation and translation one's ideological roots The book contains an introductory and a concluding essay by the editor contextualizing Mehta's life and studies Thoughtful and provocative pieces by Wilhelm Halbfass and Raimondo Panikkar lead into the main body of the work This is an especially useful work because Mehta was a rare kind of international thinker In his mature essays his thinking came full circle having grown from Hindu origins expanding through Western psychology and continental philosophy and returning to re assess profound questions in Indian thought

The Phenomenology of Religious Life Martin Heidegger, 2021-12-22 Scrupulously prepared and eminently

readable this volume presents Heidegger's most important lectures on religion from 1920-21. Choice In the early 1920s Martin Heidegger delivered his famous lecture course Introduction to the Phenomenology of Religion at the University of Freiburg. He also prepared notes for a course on The Philosophical Foundations of Medieval Mysticism that was never delivered. Though he never prepared this material for publication it represents a significant evolution in his philosophical perspective. Heidegger's engagements with Aristotle, Neoplatonism, St. Paul, Augustine, and Martin Luther give readers a sense of what phenomenology would come to mean in the mature expression of his thought. Heidegger reveals an impressive display of theological knowledge protecting Christian life experience from Greek philosophy and defending Paul against Nietzsche.

Religion and Rabindranath Tagore Translated from Bengali with an introduction by Amiya P. Sen, 2014-06-12

This work focuses exclusively on Rabindranath Tagore's sermons, addresses, and miscellaneous prose writings in Bengali. With a substantive introduction by Amiya P. Sen identifying various stages in the evolution of Tagore's religious thoughts beginning from about the 1880s, the book includes representative writings from each of the stages so identified. It brings to light some of Tagore's speeches and writings on religion in the pre-Gitanjali phase which are largely unknown and unappreciated. The sermons collectively known as Santiniketan, delivered between 1908 and 1914 and which perhaps carry his deepest spiritual insights, is a case in this point. Among other important essays of this genre yet untranslated and relatively unknown are those included in the collections Dharma Religion, Alochana, Criticism, Parichay, Introduction, and Sanchay Collection. This volume intends to recover them in translation.

Mother Tongue Theologies

Darren J. N. Middleton, 2010-01-01 Recognizing that one third of the world's Christians practice their faith outside Europe and North America, the fourteen essays in *Mother Tongue Theologies* explore how international fiction depicts Christianity's dramatic movement South and East of Jerusalem as well as North and West. Structured by geographical region, this collection captures the many ways in which people around the globe receive Christianity. It also celebrates postcolonial literature's diversity. And it highlights non-Western authors' biblical literacy addressing how and why locally rooted Christians invoke Scripture in their pursuit of personal as well as social transformation. Featured authors include Fyodor Dostoevsky, Constantine Cavafy, Scott Cairns, Chinua Achebe, Madam Afua Kuma, Earl Lovelace, V. S. Reid, Ernesto Cardenal, Helena Parente Cunha, Arundhati Roy, Mary Martha Sherwood, Marguerite Butler, R. M. Ballantyne, Rudyard Kipling, Nora Okja Keller, Amy Tan, Albert Wendt, and Louise Erdrich. Individual essayists rightly come to different conclusions about Christianity's global character. Some connect missionary work with colonialism as well as cultural imperialism, for example, and yet others accentuate how indigenous cultures amalgamate with Christianity's foreignness to produce mesmerizing multiple identities. Differences notwithstanding, *Mother Tongue Theologies* delves into the moral and spiritual issues that arise out of the cut and thrust of native responses to Western Christian presence and pressure. Ultimately, this anthology suggests the reward of listening for and to such responses, particularly in literary art, will be a wider and deeper discernment of the merits and

demerits of post Western Christianity especially for Christians living in the so called post Christian West

Derrida and Technology: Life, Politics, and Religion Björn Sjöstrand, 2021-10-05 This book is the first monograph that takes a comprehensive approach to Jacques Derrida as a philosopher of technology It refines and complements his mainstream image as a philosopher of language and deconstructionist of classical literary and philosophical texts This volume outlines the key features of Derrida s alternative philosophy of technology a philosophy which Sjöstrand argues avoids the problems associated with on the one hand a Heideggerian orientation which completely separates thinking and technology and on the other an empirically oriented post phenomenology that can be said to be hegemonic within the field today Based on a sustained interpretation of Derrida and a robust coherent philosophy of technology a phenomenology of technology is developed that in a radical way extends the concept of technology to cover the entire field of phenomenology This places the technological not in opposition to humanity but rather always already in close proximity to man and consequently to life ethics politics democracy and religion Strikingly this important aspect of Derrida s thinking is only rarely analyzed or discussed by his many exegetes This text appeals to graduates and researchers working on Derrida phenomenology and the philosophy of technology

On the Death of the Pilgrim: The Postcolonial Hermeneutics of Jarava Lal Mehta Thomas B Ellis, 2012-11-28 This searching examination of the life and philosophy of the twentieth century Indian intellectual Jarava Lal Mehta details among other things his engagement with the oeuvres of Martin Heidegger Hans Georg Gadamer and Jacques Derrida It shows how Mehta s sense of cross cultural philosophy and religious thought were affected by these engagements and maps the two key contributions Mehta made to the sum of human ideas First Mehta outlined what the author dubs a postcolonial hermeneutics that uses the ethnotrope of the pilgrim to challenge the philosophical hermeneutic emphasis on supplementation and augmentation For Mehta the hermeneutic encounter ruptures rather than supplements the self Secondly Mehta extended this concept of hermeneutics to interrogate the Hindu tradition arriving at the concept of the negative messianic In contrast to Derrida s emphasis on the one to come Mehta shows how the Hindu bhakti model represents the very opposite that is the withdrawn other identifying thereby the ethical pitfalls of deconstructivism s emphasis on the messianic tradition This is the only full length study in English of this high profile Hindu philosopher

Religion and the Health of the Public G. Gunderson, J. Cochrane, 2012-02-14 The book proposes a critical theory of the role and place of religion in public health and argues for a programmatic reorientation of these two fields of practice and inquiry to more effectively align religious health assets widely present in many contexts and public health services and facilities

A Hegelian Theory of Divine Revelation Jason Barton, 2025-09-26 This book explores what G W F Hegel meant by God Was he referring to the Lutheran conception of the Christian God Or was he referring to a heterodox conception of God more in line with his philosophical speculations Through a close reading of Hegel's Lectures on the Philosophy of Religion this book offers a detailed answer to this question It contends that Hegel assigns two meanings to the concept of God an inward facing perspective and an outward facing perspective From the inward facing perspective Hegel ventured to authentically capture how world historical religions respectively portray the divine from their own conceptual representational and practical positions From the outward facing perspective Hegel identifies divinity with absolute spirit in its odyssey like movement toward self recognition The concept of God for Hegel encompasses both of these meanings It is argued that one cannot approximate an accurate comprehension of Hegel's God without analyzing divine revelation In contrast to previous books this book firmly grounds Hegel's religious phenomenology in historical and logical factors Through such a grounding *A Hegelian Theory of Divine Revelation* attempts to achieve a clarified understanding of the character of Hegelian divine revelation and ultimately a clarified understanding of Hegel's concept of God This book is essential reading for all scholars and researchers of German idealism and of the philosophy of religion especially those focusing on the thought of G W F Hegel

Religion and the Philosophy of Life Gavin Flood, 2019-02-14 *Religion and the Philosophy of Life* considers how religion as the source of civilization transforms the fundamental bio sociology of humans through language and the somatic exploration of religious ritual and prayer Gavin Flood offers an integrative account of the nature of the human based on what contemporary scientists tell us especially evolutionary science and social neuroscience as well as through the history of civilizations Part one contemplates fundamental questions and assumptions what the current state of knowledge is concerning life itself what the philosophical issues are in that understanding and how we can explain religion as the driving force of civilizations in the context of human development within an evolutionary perspective It also addresses the question of the emergence of religion and presents a related study of sacrifice as fundamental to religions views about life and its transformation Part two offers a reading of religions in three civilizational blocks India China and Europe the Middle East particularly as they came to formation in the medieval period It traces the history of how these civilizations have thematised the idea of life itself Part three then takes up the idea of a life force in part three and traces the

theme of the philosophy of life through to modern times On the one hand the book presents a narrative account of life itself through the history of civilizations and on the other presents an explanation of that narrative in terms of life The Multidimensionality of Hermeneutic Phenomenology Babette Babich,Dimitri Ginev,2014-01-15 This book offers new reflections on the life world from both phenomenological and hermeneutic perspectives It presents a prism for a new philosophy of science and technology especially including the social sciences but also the environment as well as questions of ethics and philosophical aesthetics in addition to exploring the themes of theology and religion Inspired by the many contributions made by the philosopher Joseph Kockelmans this book examines the past present and future prospects of hermeneutic phenomenology It raises key questions of truth and method as well as highlights both continental and analytic traditions of philosophy Contributors to The Multidimensionality of Hermeneutic Phenomenology include leading scholars in the field as well as new voices representing analytic philosophers of science hermeneutic and phenomenological philosophers of science scholars of comparative literature theorists of environmental studies specialists in phenomenological ethics and experts in classical hermeneutics **Vatican II and Phenomenology** J.F. Kobler,2012-12-06 The thesis of this essay may be stated quite briefly Vatican II is a demonstration model of the phenomenological method employed on an international scale It exemplifies the final developmental stage postulated by Husserl of an inter subjective phenomenology which would take its point of departure not from individual subjectivity but from transcendental intersubjectivity Vatican II accordingly offers a unique application of a universal transcendental philosophy in the field of religious reflection for the practical purposes of moral and socio cultural renewal Phenomenology as a distinctively European development is relatively un known in America at least in its pure form Our contact with this style of 1 intuitive reflection is usually filtered through psychology or sociology How ever Edmund Husserl The Father of Phenomenology was originally trained in mathematics and he entered the field of philosophy because he recognized 2 that the theoretical foundations of modern science were disintegrating He foresaw that unless this situation were rectified modern men would eventually slip into an attitude of absolute scepticism relativism and pragmatism After the First World War he saw this theoretical problem mirrored more and more in the social turbulence of Europe and his thoughts turned to the need for a 3 renewal at all levels of life In 1937 when Nazism was triumphant in Germany and Europe on the brink of World War II he wrote his last major work The 4 Crisis of European Sciences and Transcendental Philosophy *The Young Heidegger* John Van Buren,1994-11-22 a major contribution to Heidegger scholarship Journal of the History of Behavioral Sciences Van Buren s portrayal of these formative years is striking and vital to all future Heidegger scholarship Christian Century Van Buren presents a clear and cogent argument for the theory that Martin Heidegger s mature thought epitomized in *Being and Time* actually was a return to his youthful theory and concerns Van Buren s ability to present a rounded discussion while using Heidegger s own technical vocabulary is highly commendable Library Journal here at last is a work on the philosopher that is of fundamental philosophical historical import

Van Buren's book is both interesting and well written. Choice a readable interesting and first rate book. John D Caputo A startling new reading of Martin Heidegger's early thought leading up to *Being and Time* 1927 and its subsequent development in his later writings

Narrating the Everyday: Windows on Life in Central South Africa Asta Rau, Magdalena Wojciechowska, Jan K. Coetzee, 2019-01-01 The chapters in this book reflect on the practice of using narratives to understand individual and social reality. They all reveal dimensions of the same concrete reality: contemporary society of Central South Africa. Except for two, all the chapters originated from research in the program The Narrative Study of Lives situated in the Department of Sociology at the University of the Free State in Bloemfontein, South Africa. Each chapter opens a window on an aspect of everyday life in Central South Africa. Each window displays the capacity of the narrative as a methodological tool in qualitative research to open up better understandings of everyday experience. The chapters also reflect on the epistemological journey towards unwrapping and breaking open of meaning. Narratives are one of many tools available to sociologists in their quest to understand and interpret meaning. But when it comes to deep understanding, narratives are particularly effective in opening up more intricate levels of meaning associated with emotions, feelings, and subjective experiences

Also a History of Philosophy, Volume 1 Jürgen Habermas, 2023-08-23 This is the first volume of a ground-breaking new work by Jürgen Habermas on the history of philosophy. In this major new work, Habermas sets out the ideas that inform his systematic account of the history of Western philosophy as a genealogy of postmetaphysical thinking. His account goes far beyond a vindication of the enduring relevance of philosophical reflection founded on communicative reason as a source of orientation in the modern world. He contrasts this conception with prominent diagnoses of the supposed crisis of Enlightenment reason and culture that seeks redemption in the affirmation of traditional religious authority. Schmitt the timeless validity of Greek metaphysics. Strauss a numinous conception of nature. Levinas an occurrence of being that speaks to us from beyond the mists of pre-Socratic thought. Heidegger Habermas situates Western philosophy in relation to traditions of thought founded in the major worldviews: Judaism, Buddhism, Confucianism, and Taoism that continue to shape contemporary culture and civilization. At the same time, he lays the groundwork for his analysis in the later volumes of the constitutive role played by the discourse on faith and knowledge in the development of Western philosophy, which is the result of the unique symbiosis that Christianity entered into with Greek thought. With the Christianization of the Roman Empire, far from raising claims to exclusivity, completeness, or closure, Habermas's history of philosophy, published in English in three volumes, opens up new lines of research and reflection that will influence the

humanities and social sciences for decades to come
