Multivocal Archaeologies of the Pacific War, 1941-45 Ben Raffield, Yu Hirasawa, Neil Price, 2023-07-21 This volume draws together the ground breaking work of researchers and archaeological practitioners working in multiple countries to explore and understand the material and cultural impacts of the Pacific War The combat taking place in the Pacific region during the years 1941 45 was characterized by a brutality and violence unmatched in any other theatre of the Second World War Described by indigenous Micronesians as a typhoon the war was an unstoppable force that rolled across the islanders homes leaving only a trail of destruction in its wake with physical psychological and cultural impacts that continue to resonate today This difficult period is examined in a variety of ways through chapters that include targeted studies of archaeological sites wider surveys of battlefield landscapes and the ways in which we commemorate the experiences and legacies of both combatants and civilian populations The translation of important research by Okinawan Japanese and Russian archaeologists brings into focus regions that have previously been neglected in Anglophone literature and enriches this comprehensive exploration of the archaeology of the Pacific War This book will be of interest to archaeological practitioners students and members of the general public working in conflict studies or with an interest in the material culture history and legacies of the Pacific War

The Archaeology of the Spanish Civil War Alfredo González-Ruibal, 2020-02-25 The Archaeology of the Spanish Civil War offers the first comprehensive account of the Spanish Civil War from an archaeological perspective providing an alternative narrative on one of the most important conflicts of the twentieth century widely seen as a prelude to the Second World War Between 1936 and 1939 totalitarianism and democracy fascism and revolution clashed in Spain while the latest military technologies were being tested including strategic bombing and combined arms warfare and violence against civilians became widespread Archaeology however complicates the picture as it brings forgotten actors into play obsolete weapons vernacular architecture ancient structures from Iron Age hillforts to sheepfolds peasant traditions and makeshift arms By looking at these things another story of the war unfolds one that pays more attention to intimate experiences and anonymous individuals Archaeology also helps to clarify battles which were often chaotic and only partially documented and to understand better the patterns of political violence whose effects were literally buried for over 70 years The narrative starts with the coup against the Second Spanish Republic on 18 July 1936 follows the massacres and battles that marked the path of the war and ends in the early 1950s when the last forced labor camps were closed and the anti Francoist guerrillas suppressed The book draws on 20 years of research to bring together perspectives from battlefield archaeology archaeologies of internment and forensics It will be of interest to anybody interested in historical and contemporary archaeology human rights violations modern military history and negative heritage

Meltzer, 2015-11-03 Following the discovery in Europe in the late 1850s that humanity had roots predating known history and reaching deep into the Pleistocene era scientists wondered whether North American prehistory might be just as ancient And why not The geological strata seemed exactly analogous between America and Europe which would lead one to believe that North American humanity ought to be as old as the European variety This idea set off an eager race for evidence of the people who might have occupied North America during the Ice Age a long and as it turned out bitter and controversial search In *The Great Paleolithic War* David J Meltzer tells the story of a scientific quest that set off one of the longest running feuds in the history of American anthropology one so vicious at times that anthropologists were deliberately frightened away from investigating potential sites Through his book we come to understand how and why this controversy developed and stubbornly persisted for as long as it did and how in the process it revolutionized American archaeology

Interagency Resources Division, 1992 **Air Force Magazine** , 2007-07 **The Church Lads' Brigade in the Great War** Jean Morris, 2015-09-30 It is estimated that around 50 000 Brigade Lads served in the First World War during which many honors and distinctions were awarded The Brigade contributed two Service Battalions of the King's Royal Rifle Corps whose members were comprised entirely of past and present members of the Church Lads Brigade These were known as Pals Battalions The story of the battalion centers around the experiences of eight men who served and some who died in the Battles of The Somme Arras and The Lys In the latter half of the nineteenth century influential Christians were worried about the poor spiritual and physical development of young people It was at that time that Brigade groups began to spring up all over the UK Walter Mallock Gee who was Secretary of

the Junior Branch of the Church of England Temperance Society and a Volunteer Army Officer founded the Church Lads Brigade in 1891. By 1908 the membership of the brigade stood at about 70 000 in 1 300 companies. When the Call to Arms came from Field Marshal Horatio Herbert Kitchener in 1914 thousands of Britain's youth flocked to join the armed forces. Members of the Church Lads Brigade joined up in their droves at recruiting stations all over Great Britain. Two Battalions were formed entirely from serving and ex members of the Church Lads Brigade. The 16th Service Battalion and later the 19th Service Battalion both sponsored by the Church Lads Brigade became known as The Churchmen's Battalion. In 1914 no one could have imagined the horrendous stories that would unfold from the bloody massacre at so many notorious battles across Belgium and the fields of Flanders. Ypres Passchendaele Somme Arras Lys and the brutal decimation of the battalion during the hell of the fighting at High Wood. No one could have imagined the discomfort and disease brought on by living in a trench full of water for days on end or over the top through acres of knee high mud. More than 24 of the Church Lads Brigade were awarded a Victoria Cross for their bravery but by 1918 many of those gallant young Lads would not return home. This is their story. World War II Historical Reenactment in Poland Kamila Baraniecka-Olszewska, 2021-10-21 This book explores the consequences of the latest political shifts in Central Eastern Europe the rise of right wing parties and among other things politics becoming more invested in history. These phenomena coincide and overlap with the democratisation of history by turning the past into a hot topic persistently present in the public sphere and often evoking strong emotions. Ethnographic research conducted in 2012-2016 focusing on how World War II reenactors experience the past serves as the basis to analyse the ways in which the group uses the widespread often institutionalised interest in history to on the one hand become involved in debates on World War II and the remembrance thereof and on the other to authentically experience this past. The volume therefore analyses how physical the process of creating and experiencing grassroots visions of the past is and how these visions interact with the public discourse about the past. Reenactors ability to marry the often contradictory orders of historical truth authenticity and representation is explored. Moreover Baraniecka-Olszewska analyses how the reenactors overcome various obstacles on their way towards authentic experiences performing history through their bodies.

Forensic Archaeology W. J. Mike Groen, Nicholas Márquez-Grant, Rob Janaway, 2015-02-17 Forensic archaeology is mostly defined as the use of archaeological methods and principles within a legal context. However such a definition only covers one aspect of forensic archaeology and misses the full potential this discipline has to offer. This volume is unique in that it contains 57 chapters from experienced forensic archaeological practitioners working in different countries intergovernmental organisations or NGOs. It shows that the practice of forensic archaeology varies worldwide as a result of diverse historical educational legal and judicial

backgrounds The chapters in this volume will be an invaluable reference to forensic archaeologists forensic anthropologists humanitarian and human rights workers forensic scientists police officers professionals working in criminal justice systems and all other individuals who are interested in the potential forensic archaeology has to offer at scenes of crime or places of incident This volume promotes the development of forensic archaeology worldwide In addition it proposes an interpretative framework that is grounded in archaeological theory and methodology integrating affiliated behavioural and forensic sciences
