Practice of Connoisseurship Catherine B. Scallen, 2004 Annotation Elizabeth A Kaye specializes in communications as part of her coaching and consulting practice She has edited Requirements for Certification since the 2000 01 edition *A Corpus of Rembrandt Paintings VI* Ernst van de Wetering, 2014-11-11 A revised survey of Rembrandt's complete painted oeuvre The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime It is an issue that is still hotly disputed among art historians today The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter He also left pieces unfinished to be completed by others The question is how to determine which works were from Rembrandt's own hand Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers Do we yet have methods of investigation that would deliver objective evidence of authenticity To what extent do research techniques used in the physical sciences help Or are we after all still dependent on the subjective expert eye of the connoisseur The book provides answers to these questions Prof Ernst van de Wetering the author of our forthcoming book which deals with these questions has been closely involved in all aspects of this research since 1968 the year the renowned Rembrandt Research Project RRP was founded In particular he played an important role in developing new criteria for authentication Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand In this book he re attributes to the master a substantial number of unjustly rejected Rembrandts He also was closely involved in the re discovery of a

considerable number of lost or completely unknown works by Rembrandt. The verdicts of earlier specialists including the majority of members of the original RRP up to 1989 were based on connoisseurship, the self-confidence in one's ability to recognise a specific artist's style and hand. Over the years Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt's time. In this book he demonstrates the fallibility of traditional connoisseurship, especially in the case of Rembrandt who was par excellence a searching artist. The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research. Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account. The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings, richly illustrated and annotated. For all the paintings re-attributed in this book, extensive commentaries have been included that provide a multi-faceted new insight into Rembrandt's world and the world of art historical research. *Rembrandt's Paintings Revisited* is the concluding sixth volume of *A Corpus of Rembrandt Paintings* Volumes I-V (1982, 1986, 1989, 2005, 2010). It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968-69. At the same time the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings. This work of art history and art research should belong in the library of every serious art historical institute, university or museum.

A Corpus of Rembrandt Paintings IV Ernst van de Wetering, 2010-07-19. Volume IV of *A Corpus of Rembrandt Paintings* deals uniquely with the self-portraits of Rembrandt. In a clearly written explanatory style, the head of the Rembrandt Research Project and Editor of this Volume, Ernst van de Wetering, discusses the full body of work of paintings and etchings portraying Rembrandt. He sets the different parameters for accepting or rejecting a Rembrandt self-portrait as such, whilst also discussing the exact working environment of Rembrandt and his apprentices. This workshop setting created a surroundings where apprentices could be involved in working on Rembrandt paintings, making it more difficult to determine the hand of the master. Van de Wetering, who is one of the Rembrandt experts of our day and age, goes down to great detail to explain how the different self-portraits are made and what techniques Rembrandt uses, also giving an overview of which paintings are to be attributed to the Dutch Master and which not. In the additional catalogue the self-portraits are examined in detail. In clear and accessible explanatory text, the different paintings are discussed, larded with immaculate images of each painting. Details are shown where possible, as well as the results of modern-day technical imaging like X-radiography. This work of art history and art research should be part of every serious art historical institute, university or museum. Nowhere in the art history have all Rembrandt's self-portraits been discussed in such detailed and comparative manner by an authority such as Ernst van de

Wetering This is a standard work for decades to come Rembrandt and his Circle Stephanie Dickey, 2025-10-01 This collection brings together art historians museum professionals conservators and conservation scientists whose work involves Rembrandt van Rijn and associated artists such as Gerrit Dou Jan Lievens and Ferdinand Bol The range of subjects considered is wide from the presentation of convincing evidence that Rembrandt and his contemporary Frans Hals rubbed elbows in the Amsterdam workshop of Hendrick Uylenburgh to critical reassessments of the role of printmaking in Rembrandt's studio his competition with Lievens as a landscape painter his reputation as a collector and much more Developed from a series of international conferences devoted to charting new directions in Rembrandt research these essays illuminate the current state of Rembrandt studies and suggest avenues for future inquiry **Publications of the**

A Corpus of Rembrandt Paintings V Ernst van de Wetering, 2013-12-12 This volume is the fifth volume of A Corpus of Rembrandt Paintings a project devoted to all Rembrandt's paintings This is the work of The Rembrandt Research Project consisting of a group of scholars led since 1993 by Professor Ernst van de Wetering The project began in 1968 with the aim of separating Rembrandt's own paintings from the vast number of Rembrandtesque paintings made by his many apprentices and followers Having opted for a chronological approach to the cataloguing of Rembrandt's paintings from 1625 till 1642 in the first three volumes it was decided in 1993 to adopt a thematic approach for further volumes This was largely to facilitate the recognition of different hands The new approach yielded much more information not only about Rembrandt's working methods but also about the function and meaning of his works This expanded field of view meant that etchings and drawings with similar themes also needed to be included In 2005 Volume IV appeared devoted to Rembrandt's self portraits in painting etching and drawing Volume V consists of a catalogue and analysis of the so called small scale history and genre paintings That theme was chosen because this type of complex work shows a variety of full length protagonists acting in different

narrative settings For this reason in the 17th century painting etching or drawing biblical and mythological scenes was looked upon as an artist's greatest challenge The choice of this theme proved to be highly fruitful in several ways Small scale history pieces reveal Rembrandt's artistic ambitions most clearly They also offer the authors a much more accurate view of the daily routine in Rembrandt's studio his apprentices mostly copied this type of work or used it as a starting point for their own As a result it was easier to distinguish the works by the master himself from those of his pupils All aspects of the skills necessary to create a pictorial illusion play a part in the creation of small figured history paintings These aspects were referred to as the basis of the noble art of painting in Rembrandt's days Two seventeenth century painter theoreticians discussed these principles systematically in two books which up till now have only sporadically been consulted in the context of 17th century studio practice Karel van Mander wrote his *Grond der edel vry schilder const* Basis of the Art of Painting in 1604 and Samuel van Hoogstraten produced his *Inleyding tot de hooge schoole der schilder konst* Academy of Painting in 1678 Van Hoogstraten was a pupil of Rembrandt between 1642 and 48 Comparing the two books and considering them in relation to Rembrandt's oeuvre gradually reveals his original views on painting and how these had developed during his career Thus the authors of this new Volume of A Corpus have gained an unexpected and profound insight into Rembrandt's ideas and approach to his art The basic aspects of painting included the following topics function and methods of drawing human proportions various positions poses and gestures of figures ways of arranging a scene's protagonists in a composition facial expressions of a variety of emotions light shadows and reflected light landscape and animals draperies and articles of clothing methods of painting and various characteristics and uses of colours The way these basic aspects were selected and dealt with presumed that the more practical side to the art of painting would be learned by the apprentice in the daily routine of his master's studio With the development of art history in the nineteenth century the basic aspects of the art of painting listed above acquired the vague label of style However the seventeenth century categorization of the basic aspects provides a much more acute means of probing the views and criteria for judging a painting by Rembrandt and his contemporaries than the concept of style Volume V in the series A Corpus of Rembrandt Paintings breaks new ground from the point of view of art history not only in its approach to Rembrandt as an artist but more particularly to his thinking about painting Moreover a detailed comparison of Rembrandt's works and those by his apprentices who based their works on his led to a profound and detailed understanding of Rembrandt's views on pictorial quality In art historical literature quality usually does not feature prominently since it is regarded as being too subjective This comparative approach together with the analysis of seventeenth century categories of thought about painting have given the research on Rembrandt a new impetus at the same time allowing us to see more clearly through seventeenth century eyes That is why the new volume of the Corpus is an important publication not only for art historians but also for all who want to fully enjoy the numerous works of art that date back to the Dutch Golden Age now scattered in museums around the world
