Remembering Los Alamos World War II:

The First Atomic Bomb Janet Farrell Brodie, 2023-06 2024 Southwest Book of the Year On July 16 1945 just weeks before the atomic bombing of Hiroshima and Nagasaki that brought about the surrender of Japan and the end of World War II the United States unleashed the world's first atomic bomb at the Trinity testing site located in the remote Tularosa Valley in south central New Mexico Immensely more powerful than any weapon the world had seen the bomb's effects on the surrounding and downwind communities of plants animals birds and humans have lasted decades In *The First Atomic Bomb* Janet Farrell Brodie explores the history of the Trinity test and those whose contributions have rarely if ever been discussed the men and women who constructed served and witnessed the first test as well as the downwinders who suffered the consequences of the radiation Concentrating on these ordinary people laborers ranchers and Indigenous peoples who lived in the region and participated in the testing Brodie corrects the lack of coverage in existing scholarship on the essential details and everyday experiences of this globally significant event *The First Atomic Bomb* also covers the environmental preservation of the Trinity test site and compares it with the wide range of atomic sites now preserved independently or as part of the new Manhattan Project National Historical Park Although the Trinity site became a significant node for testing the new weapons of the postwar United States it is known today as an officially designated National Historic Landmark Brodie presents a timely important and innovative study of an explosion that carries special historical weight in American memory Nuclear

Nuevo México Myrriah Gómez, 2022-11-22 *Nuclear Nuevo México* recovers the voices and stories that have been lost or ignored in the telling of U.S. nuclear history By recuperating these narratives Myrriah Gómez tells a new story of New Mexico one in which the nuclear history is not separate from the collective colonial history of Nuevo México but instead demonstrates how earlier eras of settler colonialism laid the foundation for nuclear colonialism in New Mexico **Fermi Remembered**

Enrico Fermi, 2004-08-16 The volume also features extensive university archival material including correspondence between Fermi and biophysicist Leo Szilard and a letter from Harry Truman with new introductions that provide context for both the history of physics and the academic tradition at the University of Chicago Jacket *Querencia* Vanessa Fonseca-Chávez, Levi Romero, Spencer R. Herrera, 2020-06-15 This collection of both deeply personal reflections and carefully researched studies explores the New Mexico homeland through the experiences and perspectives of Chicana and indigenous Gen Zero writers and scholars from across the state

109 East Palace Jennet Conant, 2007-11-01 From the bestselling author of *Tuxedo Park* the extraordinary story of the thousands of people who were sequestered in a military facility in the desert for twenty seven intense months under J. Robert Oppenheimer where the world's best scientists raced to invent the atomic bomb and win World War II In 1943 J. Robert Oppenheimer the brilliant charismatic head of the Manhattan Project recruited scientists to live as virtual prisoners of the U.S. government at Los Alamos a barren mesa thirty five miles outside Santa Fe New Mexico Thousands of men women and children spent the war years sequestered in this top secret military facility They lied to friends

and family about where they were going and what they were doing and then disappeared into the desert Through the eyes of a young Santa Fe widow who was one of Oppenheimer's first recruits we see how for all his flaws he developed into an inspiring leader and motivated all those involved in the Los Alamos project to make a supreme effort and achieve the unthinkable

GUILT BY SILENCE Taylor Smith, 2014-10-15 On a cobbled street in old Vienna an accident leaves David Tardiff a shadow of his brilliant self and his young daughter Lindsay severely injured On a deserted highway in New Mexico five of the world's leading scientists disappear in a burst of flames One woman David's wife CIA officer Mariah Bolt is the link between both tragedies Confronted by the devastating destruction of her family and too many unanswered questions she's determined to prove that neither was an accident As she probes deeper into what really happened in Vienna she realizes that she can trust no one not the government not her mentor not even her husband Because now Mariah is the target

The San Francisco Nexus in World War II Philip E. Meza, 2023-09-05 In *The San Francisco Nexus in World War II* Freedoms Found Liberties Lost and the Atomic Bomb Meza tells the story of important events in the San Francisco Bay Area that have consequences still felt to date He traces the invention of the atomic bomb from a speculative design for a nuclear weapon sketched on a chalkboard at Berkeley by theoretical physicist Robert Oppenheimer and helped made real by Big Science that was pioneered by his friend and colleague experimental physicist Ernest Lawrence During this time Black Americans migrated to San Francisco to escape the Jim Crow South finding new freedoms good jobs and a leader in a singer turned welder named Joseph James Meza shows how James fought for and won an end to segregation in his union taking a large step toward the civil rights movement At the same time Japanese Americans were forced from their homes by a tragically misguided presidential executive order upheld by the US Supreme Court illustrating the fragility of liberty in America These events continue to shape the world today

Remembering the Cold War David Lowe, Tony Joel, 2014-01-21 *Remembering the Cold War* examines how more than two decades since the collapse of the Soviet Union Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe Given the Cold War's blurred definition it has neither a widely accepted commencement date nor unanimous conclusion what is to be remembered This book illustrates that there is in fact a huge body of remembrance and that it is more pertinent to ask what should be included and what can be overlooked Over five sections this richly illustrated volume considers case studies of Cold War remembering from different parts of the world and engages with growing theorisation in the field of memory studies specifically in relation to war David Lowe and Tony Joel afford careful consideration to agencies that identify with being victims of the Cold War In addition the concept of arenas of articulation which envelops the myriad spaces in which the remembering commemorating

memorialising and even revising of Cold War history takes place is given prominence **DOE this Month** ,1993 The Last Voice José Ignacio Latorre, María Teresa Soto-Sanfiel, 2023-10-02 Most human beings don't manage to achieve fame Roy J Glauber did so for two different reasons Glauber was not only a Nobel Prize winning physicist but also one of the last surviving scientists who worked in Los Alamos in the Theoretical Division of the Manhattan Project He was a witness to all the events and knew all the scientists associated with the creation and launch of the first atomic bombs This book is the product of a series of long interviews held with Roy over three years in Benasque Spain in 2011 and later in Singapore and Cambridge USA Its pages give a first hand account of a true protagonist one who is independent lucid sagacious and committed to the truth The authors have respectfully preserved his spirit his voice is the one that matters The authors asked the questions and they relay his answers Their comments are confined to the footnotes and to brief explanatory paragraphs added simply to provide certain relevant details The importance of the events that Glauber describes here is indisputable as therefore is the book itself The events narrated in its pages will remain part of world history perhaps for centuries or even millennia We live today in the shadow of the decisions made at that time **A Physicist Remembers** Richard J Weiss, 2007-02-28 A Physicist Remembers traces the effort to measure electron charge spin and momentum density on atoms and solids and to compare experiment with theory Since the complexity of electron arrangements leads to subtle property changes in atoms molecules and solids theory and experiment have generally differed by about 1% The Sagamore conferences have made inroads in reducing this difference Since 1963 the triennial Sagamore conferences have been held in New York France Russia Finland Portugal Germany Canada Japan and England attracting thousands of participants Richard J Weiss original organizer of these conferences describes the evolution of the X ray neutron and positron probes employed in these measurements He has performed research with Francis Jenkins at the University of California at Berkeley Simon Pasternack at Brookhaven National Laboratory John Slater and B Warren at MIT Peter Wohlfarth at Imperial College London M Hart at King's College London and Sir N Mott at Cavendish Laboratory World War II Remembered: 1942: into the battle ,1991 *Remembering the Manhattan Project* Cynthia C. Kelly, 2005-01-27 During World War II nations raced to construct the world's first nuclear weapon that would determine the future of the world The Manhattan Project one of the most significant achievements of the 20th century was the culmination of America's war effort Today although the issue of nuclear weapons frequently dominates world politics few are aware of the history behind its development Part I of this book comprised of papers from the Atomic Heritage Foundation's Symposium on the Manhattan Project recounts the history of this remarkable effort and reflects upon its legacy Most of the original structures of the Manhattan Project have been inaccessible to the public and in recent years have been stripped of their equipment and slated for demolition Part II proposes a strategy for preserving these historical artifacts for the public and future generations **Death of an Era** Andrew E. chapter 18 radioactivity and nuclear reactions 18 1 radioactivity - Feb 27 2022

web chapter 18 radioactivity and nuclear reactions 18 1 radioactivity 18 2 nuclear decay 18 3 detecting radioactivity 18 4 nuclear reactions radioactivity 18 1 the nucleus recall that atoms are composed of protons neutrons and electrons the nucleus of an atom contains the protons which have a positive charge and neutrons

radioactivity and nuclear reactions chemistry in quantitative - Aug 16 2023

web naturally radioactive elements decay spontaneously by emitting alpha particles beta particles and gamma radiation other elements can be induced to decay by bombarding them with high energy particles this is known as artificial radioactivity like chemical reactions equations representing nuclear reactions must be balanced

radioactivity and nuclear reactions - Apr 12 2023

web chapter 25 nuclear changes radioactivity and nuclear reactions your results the correct answer for each question is indicated by a e mail your results

radioactivity and nuclear reactions springerlink - Feb 10 2023

web decay mode alpha particle compound nucleus radioactive decay these keywords were added by machine and not by the authors this process is experimental and the keywords may be updated as the learning algorithm improves download chapter pdf chapter 3 radioactivity and nuclear reactions

17 radioactivity and nuclear chemistry chemistry libretexts - Jun 02 2022

web in this chapter we will introduce the basic concepts of radioactivity nuclear equations and the processes involved in nuclear fission and nuclear fusion 17 1 diagnosing appendicitis 17 2 the discovery of radioactivity henri becquerel marie curie and pierre curie shared the discovery of radioactivity

chapter 20 radioactivity and nuclear reactions quizlet - Mar 31 2022

web chain reaction series of repeated fission reactions caused by neutron releases from each reaction nuclear pertaining to the central point group or mass about which a gathering or concentration takes place electric current the net movement of electric charges in a single direction tracer

chapter 25 nuclear chemistry mr fischer - Mar 11 2023

web chapter 25 nuclear chemistry i natural radioactivity a nuclear reaction is any reaction where the nucleus of an atom changes composition b radioactivity spontaneous emissions accompanying changes in nuclei of atoms c protons are positively charged and hence repel each other so the

radioactivity and nuclear reactions chapter 25 - May 01 2022

web of nuclear science and engineering is a key reference for any physicists or engineer radiochemistry or nuclear chemistry is the study of radiation from an atomic or molecular perspective including elemental transformation and reaction effects as well as physical health and medical properties

chapter 25 nuclear chemistry slideserve - Jul 15 2023

web oct 30 2014 in nuclear reactions the nuclei of unstable isotopes called radioisotopes gain stability by undergoing changes 25 1 radioactivity an unstable nucleus releases energy by emitting radiation during the process of radioactive decay 25 1 the three main types of nuclear radiation are alpha radiation beta radiation and gamma radiation

chapter 25 nuclear chemistry video solutions chemistry and - Oct 06 2022

web sodium 23 in a sample of NaCl is subjected to neutron bombardment in a nuclear reactor to produce ^{24}Na when removed from the reactor the sample is radioactive with beta activity of 2.54×10^4 dpm the decrease in radioactivity over time was studied producing the following data
