The Cost of Maple Sugaring in Vermont Paul E. Sendak,John P. Bennink,1985 S2We developed an annual maple syrup production cost series for the period 1972 to 1984 We specified the physical input required for a 3 000 tap plastic tubing with vacuum system with an oil fired open pan evaporator Current value data were used to estimate the annual production cost of a gallon of syrup Cost increased from 6 16 per gallon in 1972 to 15 93 in 1984 however much of this increase is the result of inflation The sugarhouse where syrup is processed accounted for a relatively larger share of the total cost of production in 1984 66 percent than it did in 1972 53 percent A sensitivity analysis indicated that total cost is most sensitive to changes in wages for labor and cost of fuel oil S3
