**Hybrids**, 2001-05 Published to accompany an exhibition at Tate Liverpool 6 April 24 June 2001 *Not All Wives* Karin A. Wulf, 2019-05-15 Marital status was a fundamental legal and cultural feature of women's identity in the eighteenth century. Free women who were not married could own property and make wills, contracts, and court appearances, rights that the law of coverture prevented their married sisters from enjoying. Karin Wulf explores the significance of marital status in this account of unmarried women in Philadelphia, the largest city in the British colonies. In a major act of historical reconstruction, Wulf draws upon sources ranging from tax lists, censuses, poor relief records, and wills to almanacs, newspapers, correspondence, and poetry to recreate the daily experiences of women who were never married, widowed, divorced, or separated. With its substantial population of unmarried women, eighteenth-century Philadelphia was much like other early modern cities, but it became a distinctive proving ground for cultural debate and social experimentation involving those women. Arguing that unmarried women shaped the city as much as it shaped them, Wulf examines popular literary representations of marriage, the economic hardships faced by women, and the decisive impact of a newly masculine public culture in the late colonial period.

Как писать о современном искусстве Гильда Уильямс, 2017-11-30 **Icons of Irishness from the Middle Ages to the Modern World** M. Williams, 2012-12-10 From majestic Celtic crosses to elaborate knotwork designs, visual symbols of Irish identity at its most medieval abound in contemporary culture. Considering both scholarly and popular perspectives, this book offers a commentary on the blending of pasts and presents that finds permanent visualization in these contemporary signs. **Critical Perspectives on Contemporary Painting** Jonathan P. Harris, 2003-01-01 Comprising examples of artwork and a series of essays, this collection examines and assesses the current status of painting within global contemporary art. It sheds light on fine art as it is understood as a facet of a global culture and society dominated by Northern European and US power and history. New Approaches to Ancient Material Culture in the Greek & Roman World Catherine Cooper, 2020-11-16 *New Approaches to Ancient Material Culture in the Greek Roman World* is about Classical Archaeology at its broadest and is important reading to all Classicists. As part of a recent movement to highlight the rich diversity of the subject, it overcomes traditional disciplinary boundaries to show the variety of current approaches to the study of Classical Antiquity from the Late Bronze Age to the Late Antique period. The multi-disciplinary papers deal with archaeology and art history, museum objects and fieldwork data, ancient texts and material culture, archaeological theory and historiography, and technical and literary analysis. The international contributors discuss a selection of methodologies currently used to study ancient material and illustrate their relevance through case studies which span the Greek and Roman world. *Drama in the Modern World: Plays & Essays*, 1996 **Osiris, Volume 38** James Evans, Adrian Johns, 2023-07-18 *Perceptively* explores the shifting intersections between algorithmic systems and human practices in the modern era. How have algorithmic systems and human practices developed in tandem since 1800? This volume of *Osiris* deftly addresses the question, dispelling along the way the traditional notion of algorithmic code and human craft as natural opposites. Instead

algorithms and humans have always acted in concert depending on each other to advance new knowledge and produce social consequences By shining light on alternative computational imaginaries Beyond Craft and Code opens fresh space in which to understand algorithmic diversity its governance and even its conservation The volume contains essays by experts in fields extending from early modern arithmetic to contemporary robotics Traversing a range of cases and arguments that connect politics historical epistemology aesthetics and artificial intelligence the contributors collectively propose a novel vocabulary of concepts with which to think about how the history of science can contribute to understanding today s world Ultimately Beyond Craft and Code reconfigures the historiography of science and technology to suggest a new way to approach the questions posed by an algorithmic culture not only improving our understanding of algorithmic pasts and futures but also unlocking our ability to better govern our present
