The Art of Time Nina L Molinaro,2019-07-12 Ethics or the systematized set of inquiries and responses to the question what should I do has infused the history of human narrative for more than two centuries One of the foremost theorists of ethics during the twentieth century Emmanuel Levinas 1906 1995 radicalized the discipline of philosophy by arguing that the ethical is the foundational moment for human subjectivity and that human subjectivity underlies all of Western philosophy Levinas s voice is crucial to the resurging global attention to ethics because he grapples with the quintessential problem of alterity or otherness which he conceptualizes as the articulation of and prior responsibility to difference in relation to the competing movement toward sameness Academicians and journalists in Spain and abroad have recently fastened on an emerging cluster of peninsular writers who they argue pertain to a discernible literary generation provisionally referred to as Generaci n X These writers are distinct from their predecessors they and their literary texts are closely related to the specific socio political and historical circumstances in Spain and their novels relate stories of more and less proximity more and less responsibility and more and less temporality In short they trace the temporal movement of alterity through narrative Published by Bucknell University Press Distributed worldwide by Rutgers University Press
