Sasstat Software Changes And Enhancements Through Release 61:

Integrating Ecohydraulics in River Restoration José Maria Santos, Isabel Boavida, 2020-03-16 Rivers have been intensively degraded due to increasing anthropogenic impacts from a growing population in a continuously developing world. Accordingly, most rivers suffer from pressures as a result of increasing dam and weir construction, habitat degradation, flow regulation, water pollution, abstraction, and the spread of invasive species. Science-based knowledge regarding solutions to counteract the effects of river degradation and melding principles of aquatic ecology and engineering hydraulics is thus urgently needed to guide present and future river restoration actions. This Special Issue gathers a coherent set of studies from different geographic contexts on fundamental and applied research regarding the integration of ecohydraulics in river restoration, ranging from field studies to laboratory experiments that can be applied to real-world challenges. It contains 13 original papers covering ecohydraulic issues such as river restoration technologies, sustainable hydropower, fish passage designs, and operational criteria and habitat modeling. All papers were reviewed by international experts in ecology, hydraulics, aquatic biology, engineering, geomorphology, and hydrology. The papers herein well represent the wide applicability of ecohydraulics in river restoration and serve as a basis to improve current knowledge and management and to reduce arguments between different interests and opinions.

Mathematical Modeling in Microbial Ecology A.L. Koch, Joseph A. Robinson, George A. Milliken, 2012-12-06 From the Chapman Hall Microbiology Series, this unique resource offers specific experimental and practical applications of mathematical modeling in microbial ecology. The text presents a variety of systems ranging from subcellular systems to ecosystems and shows how to test whether the models provide a good representation of the system. The book also encourages further development and application of modeling to burgeoning problems associated with microbial ecology, such as the pollution and destruction of pesticides and herbicides.

Stakeholder Thinking in Marketing Michael Jay Polonsky,2005 Stakeholder thinking in marketingStakeholder thinking is becoming a core part of marketing as well as other businessrelated disciplines A search of the business source primmer database found that priorto 1995 there are 58 articles using the term stakeholder in their title and 27 academicmarketing related articles with stakeholder as a key term The interest in stakeholdertheory has however grown

rapidly between January 2000 and November 2004 there were 228 articles using stakeholder theory in the title and 140 academic marketing-related journal articles that examined stakeholder issues. In fact, the American Marketing Association's (AMA) 2004 new definition of marketing expressly incorporates our responsibility to consider how marketing activities impact stakeholders. Marketing is an organizational function and a set of processes for creating, communicating, and delivering value to customers and for managing customer relationships in ways that benefit the organization and its stakeholders. Thus, the AMA has recognised the core role of stakeholder thinking. While there is an increased interest in stakeholder thinking in marketing, an examination of the literature would seem to suggest that there is no unified view of how stakeholder thinking can be or should be integrated into theory or practice. Many of the stakeholder works in marketing and in other disciplines still focus on the social and ethical impacts of stakeholders. This may have been where much of stakeholder thinking initially gained its prominence, but it is a broader strategic tool that can benefit a range of areas and was in fact the focus of Freeman's 1984 original work in the area. This is not to suggest that the general strategic implications of stakeholder thinking are not being considered, as an increasing number of works are looking at stakeholder implications in regards to exchange networks, relationship marketing, and other issues related to strategy development. The papers in this special issue have considered a range of varying perspectives, including corporate social responsibility, the impact of interacting with stakeholders, relationship issues, and broader discussions of stakeholder theory as a strategic tool. These papers have taken a diverse range of perspectives, including conceptual works, case studies, qualitative approaches, and various empirical approaches to examining the issues of interest within various pieces. The scope of papers included in the special, as well as those not included, identifies the breadth of relevance stakeholder thinking has for the application of all aspects of marketing theory and practice. The question of how stakeholders and stakeholder theory can be considered in organisational activities and marketing theory is an issue that most certainly seems to warrant further consideration. The works in this special issue have advanced this debate and identified some directions that could be considered. Stakeholder thinking is, however, not necessarily a paradigm shift in marketing thinking, although some might believe it is, but rather it broadens existing concepts such as relationship marketing, network theory, organisational social responsibility, and other areas. Hopefully, the papers presented in this special issue will encourage others to consider the inclusion of stakeholders into broader areas of marketing. Any special issue editor has to thank a range of people for assistance with developing the special issue. I would like to thank Audrey Gilmore and David Carson, editors of *EJM*, for allowing the special issue to be developed. Their input through the process has been invaluable. I would also like to thank the many authors of unsuccessful papers for submitting their work. It was, of course, impossible to include all papers in the special issue, but the breadth of coverage in regards to topics and geographic areas would seem to demonstrate the growing interest in stakeholder thinking within marketing. Lastly, it is imperative that I thank the reviewers; without their assistance, the special issue would not have been possible. The following people reviewed papers:
