Satellite Broadcasting The Politics And Implications Of The New Media:

Satellite Broadcasting: the Politics and Implications of the New Media Ralph (editor). Negrine, 1988 **Satellite Broadcasting** Ralph Negrine, 2013-06-19 Originally published in 1988 this book provides a thorough examination of the possibilities and key issues in satellite technology which at the time already seemed likely to change the face of broadcasting both within nations and internationally It begins with a guide to the technical development of different systems of satellites and signal reception and an outline of the international political and regulatory issues involved It then examines the situation in various industrialised countries by analysing launching plans funding the interaction between satellite cable and VCRs and the effect on existing broadcasting systems Concerned throughout with a wide range of cultural considerations and the potential impacts of the new media this is a useful reflection on the time **The Politics of Southeast Asia's New Media** William Atkins, 2013-11-19 The past decade has seen a major structural shift in broadcasting in Southeast Asia with the development of digital satellite and cable broadcasting This shift has impacted upon some of the most information sensitive governments in the world Singapore Malaysia and until recently Indonesia Atkins traces this development in five countries showing that the challenge to authoritarian regimes anticipated by modern theorists as a result of the globalization of news and information is not materializing Instead a new commercial elite has arisen Southeast Asia's own mini moguls who act as gatekeepers for state interests as partners to global media companies **From Satellite to Single Market** Richard Collins, 2005-08-10 This book explores television's role in fostering European cultural identity and the extent to which European public service broadcasters were able to meet the challenges posed by the introduction of new communication technologies **Handbook on Geographies of Technology** Barney Warf, 2017-02-24 This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world It shows how geography and technology are intimately linked by examining the origins growth and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society **Mass Media and Media Policy in Western Europe** Peter Humphreys, 1996-05-15 This comparative textbook analysis explores how television and press systems across Europe have been shaped by technology economics and politics The author explores the implications of the commercialisation of national broadcasting systems and the media policies of the European Union in the age of transfrontier media operations **Politics and the Mass Media in Britain** Ralph Negrine, 2003-09-02 This fully updated new edition of Politics and the Mass Media provides a comprehensive introduction to the role of mass communications in politics at all levels from election campaigns news reports and lobbying groups to the media activities of pressure groups The relationship between politics politicians and the media is a matter of increasingly contentious debate as politicians awareness of the importance of the media becomes more sophisticated amidst rapidly advancing media technology and control Providing a review of the nature and content of political communications and of recent theoretical developments

Negrine addresses the issues surrounding today's mass media including cable and satellite television investigation of the press the relationship between the state and broadcasting institutions and the ever present question of whether or not Britain needs a media policy This new edition includes Case studies from television and the press Fully revised text with updated sections on the press broadcasting and media legislation Brand new chapters on Europe and globalisation *Politics and the Media in Britain* Raymond Kuhn, 2017-09-16 This important new text provides an up to date account of the complex interrelationship between politics and the media in Britain It starts by setting key policy areas in the context of technological convergence globalization and initiatives at European level It then addresses the key issues the role of the media in politics and elections New Media and Politics Barrie Axford, Richard Huggins, 2001-01-26 Exploring the theme of the putative transformation of political modernity under the impact of new media this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures New Media and Politics examines the extent to which commercial populism now dominates electoral and other political discourses the ways in which the functions of leadership government and political parties are modified by different forms of both old and new media the democratic or undemocratic import of such changes and the ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media **Broadcasting Politics in Japan** Ellis S. Krauss, 2018-09-05 The aftermath of Japan's 1945 military defeat left its public institutions in a state of deep crisis virtually every major source of state legitimacy was seriously damaged or wholly remade by the postwar occupation Between 1960 and 1990 however these institutions renewed their strength taking on legitimacy that erased virtually all traces of their postwar instability How did this transformation come about This is the question Ellis S Krauss ponders in Broadcasting Politics in Japan his answer focuses on the role played by the Japanese mass media and in particular by Japan's national broadcaster NHK Since the 1960s television has been a fixture of the Japanese household and NHK's TV news has until very recently been the dominant and most trusted source of political information for the Japanese citizen NHK's news style is distinctive among the broadcasting systems of industrialized countries it emphasizes facts over interpretation and gives unusual priority to coverage of the national bureaucracy Krauss argues that this approach is not simply a reflection of Japanese culture but a result of the organization and processes of NHK and their relationship with the state These factors had profound consequences for the state's postwar re-legitimization while the commercial networks' recent challenge to NHK has helped engender the wave of cynicism currently faced by the state Krauss guides the reader through the complex interactions among politics media organizations and Japanese journalism to demonstrate how NHK television news became a shaper of Japan's political world rather than simply a lens through which to view it News Media in the Arab World Barrie Gunter, Roger Dickinson, 2013-06-06 Examines the way local national and cross national Arab audiences engage with different

Cultures in Orbit Lisa Ann Parks,1998 *New Media and Revolution* Billie Jeanne Brownlee,2020-07-16 The Arab Spring did not arise out of nowhere It was the physical manifestation of more than a decade of new media diffusion use and experimentation that empowered ordinary people during their everyday lives In this book Billie Jeanne Brownlee offers a refreshing insight into the way new media can facilitate a culture of resistance and dissent in authoritarian states Investigating the root causes of the Syrian uprising of 2011 *New Media and Revolution* shows how acts of online resistance prepared the ground for better organised street mobilisation The book interprets the uprising not as the start of Syria s social mobilisation but as a shift from online to offline contestation and from localised and hidden practices of digital dissent to tangible mass street protests Brownlee goes beyond the common dichotomy that frames new media as either a *deus ex machina* or a means of expression to demonstrate that in Syria media was a nontraditional institution that enabled resistance to digitally manifest and gestate below within and parallel to formal institutions of power To refute the idea that the population of Syria was largely apathetic and apolitical prior to the uprising Brownlee explains that social media and technology created camouflaged geographies and spaces where individuals could protest without being detected Challenging the myth of authoritarian stability *New Media and Revolution* uncovers the dynamics of grassroots resistance blossoming under the radar of ordinary politics

Arguing Islam After the Revival of Arab Politics Nathan J. Brown,2017 *Arguing Islam after the Revival of Arab Politics* analyzes the politics of religion in the Arab world after the emergence of new public spheres over the past few decades The book examines those spheres as they really are not measuring them against any ideal of democratic deliberation

Politics and the Media in Twenty-First Century Indonesia Krishna Sen,David Hill,2010-11-01 Every political aspirant and activist knows the media are important But there is little agreement on how an increasingly diversified media operate in post authoritarian transitions and how they might promote or impede the pathways to a sustainable liberal democracy in the 21st century This book examines the role of the media during Indonesia s longest experiment with democratisation It addresses two important and related questions how is the media being transformed both in terms of its structure and content by the changing political economy of Indonesia after the fall of Suharto And what is the potential impact of this media in enabling or hampering the development of democracy in Indonesia The book explores the relation between the working of democratisation by examining the role of ethnic identity and nationalism increasingly cheaper and diversified means of media production challenging state monopolies of the media the reality of personalised and globalised media and the challenging of the connection between a free media and democracy by global capitalism and corporate control of the media The book argues that the dominant forces transforming Indonesia today did not arise from the singular point of Suharto s resignation but from a set of factors which are independent from but linked to Indonesia s internal politics and which shape its cultural industries

The Independence of the News Media Loïc Ballarini,2020-10-16 This book explores the different ways Francophone research on news media has faced the challenges of dependence and

independence from three complementary perspectives The first is economics how can sustainable business models be developed and to what extent can crowdfunding help to maintain the financial and editorial independence of newsrooms Secondly in a time where the role of journalism in the public sphere is more questioned than ever the authors evaluate to what extent news media can embody the needs of their readers Thirdly the authors consider the historical and political context of publication in the light of the Arab Spring This book deals with major contemporary evolutions of news media bringing together research that considers the media in France Canada and the Arab region notably Tunisia Algeria Morocco and Egypt Using numerous case studies this book helps to define how complex the question of independence is today
