Satellites In Outer Space:

Satellites in Outer Space Isaac Asimov, 1960 A simple account of satellites from Sputnik to Apollo **Direct Broadcast Satellites and the United Nations** K.M. Queeney, 2024-12-02 **Who Owns Outer Space?** Michael Byers, Aaron Boley, 2023-04-13 From Space debris to asteroid strikes to anti satellite weapons humanity's rapid expansion into Space raises major environmental safety and security challenges In this book Michael Byers and Aaron Boley an international lawyer and an astrophysicist identify and interrogate these challenges and propose actionable solutions They explore essential questions from How do we ensure all of humanity benefits from the development of Space and not just the world's richest people to Is it possible to avoid war in Space Byers and Boley explain the essential aspects of Space science international law and global governance in a fully transdisciplinary and highly accessible way Addressing the latest and emerging developments in Space they equip readers with the knowledge and tools to engage in current and critically important legal policy and scientific debates concerning the future development of Space This title is also available as Open Access on Cambridge Core **The Urgent Need for Regulation of Satellite Mega-constellations in Outer Space** Scott Millwood, 2023-02-21 This book calls for the urgent regulation of satellite mega constellations in outer space proposing a new model of international regulatory coordination in order to ensure the sustainable balance of science and advanced telecommunications We are currently witnessing expansion of the Internet off our planet The proliferation of new space based internet connectivity has been accompanied by much discussion about the potential impact on astronomy Scientists are increasingly concerned that mega constellations proposed by SpaceX OneWeb Amazon and Facebook might wreak havoc on scientific research and transform our view of the stars These commercial operators plan to launch hundreds of thousands of satellites into Low Earth Orbit LEO in the coming decade representing a 1000% increase on objects currently in orbit This book examines this new space race in the context of historical rivalries for it is clear that mega constellations are being actively pursued by a US administration determined to dominate LEO as tensions with China rise This creates a risk of interference with earth based scientific activities that use optical and radio frequency techniques to study the universe This book examines these developments in the context of the Outer Space Treaty OST which provides all States with the freedom of scientific investigation exploration and use of outer space while balancing this with obligations to avoid interference with the space activities of other States It draws upon interviews with some of Europe's leading astronomers in order to highlight the extent to which the issue will require legal and regulatory reform of mega constellation licensing processes to ensure the integrity of astronomical science is preserved The race to dominate LEO also comes at a time when the monopolistic power of Facebook Amazon and other TechGiants is under renewed scrutiny in western democracies The author argues that a new governance framework for launch and operational licenses is urgently required in which impact risk assessments scale and proportionality and stakeholder consultation processes should play important roles It is now vital that the astronomical

On-Orbit Servicing: Next Generation of

Space Activities Annette Froehlich, 2020-09-07 This book shares a range of new and diverse insights on On Orbit Servicing OOS and examines its implications especially from political legal economic and security perspectives OSS has been evolving rapidly and presents both challenges and opportunities such as in space repairs refuelling refurbishment of spacecraft and servicing satellites which could play a critical role in extending satellite lifecycles while also representing a valuable next step in debris mitigation At the same time many legal questions have arisen in connection with OOS the need to prevent hostile actions under the pretext of OSS the distinction between governmental and non governmental OOS operators the status of re worked and recycled space objects the issue of control in terms of operations performed in orbit i e in the international sphere the status of objects manufactured in orbit and applicable law including liability and registration and the impacts on insurance law and risk management Finally the book examines the implications of OOS for emerging space actors in the Global South and recommends a paradigm shift to help developing countries fully recognise the necessity and urgency of being involved in discussions on OSS as opposed to leaving it up to the developed space actors This book will be of great interest to practitioners academics and students working in the space sector and related fields Arms Control in Outer Space United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Security and Scientific Affairs, 1984 *Scientific Satellites and the Space Environment* John C. New, 1962 *Meta-Geopolitics of Outer Space* N. Al-Rodhan, 2012-05-11 Al Rodhan sheds new light on the debate about the geopolitics of outer space going beyond applying traditional International Relations approaches to space power and security by introducing a multidimensional spatial framework The meta geopolitics framework includes space and expands classical power considerations to cover seven state capacities Outer Space - Battlefield of the Future? Sipri, 2021-01-26 This book first published in 1978 examines the military use of space around 60 per cent of US and Soviet satellites were military ones The satellites were for military communications weather prediction navigation photographic and electronic reconnaissance targeting early warning and satellites capable of destroying enemy satellites This book analyses the capabilities of military satellites as part of the debate around the encroachment of military technology and purposes into space **The Oxford Handbook of Space Security** P.J. Blount, 2023-09-01 Space security is a complex assemblage of societal risks and benefits that result from space based capabilities and is currently in a period of transformation as innovative processes are rapidly changing the underlying assumptions about stability in the space domain New space based technologies are emerging at an accelerating rate and both established and emerging states are actively and openly pursuing weapons to negate other states space capabilities Many states have set up dedicated military space units in order to preemptively counter such threats In addition a number of major private companies with a transnational presence are also investing heavily in extraterrestrially based technology The Oxford Handbook of Space Security focuses on the interaction between space technology and international and national security processes from an international relations IR theory perspective Saadia M Pekkanen and P J Blount have gathered a

group of key scholars who bring a range of analytical and theoretical IR perspectives to assessing space security The volume theorizes the development and governance of space security and analyzes the specific pressure points currently challenging that regime Further it builds an analytically eclectic understanding of space security infused with the theory and practice of IR and advances analysis of key states and regions as well as specific capabilities Space security is currently in a period of great transition as new technologies are emerging and states openly pursue counterspace capabilities Bringing together scholarship from a group of leading experts this volume explains how these contemporary changes will affect future security in from and through space Applying lessons from international relations theory and practice and drawing from a range of social science subfields the Handbook is a definitive work for scholars who study the topic of space security

Commercial and Military Uses of Outer Space Melissa de Zwart, Stacey Henderson, 2021-02-25 This edited book brings together a diverse range of chapters on space related topics The authors included in this book are drawn from Australia and overseas from academia government industry civil society and the military This book contains chapters that cover topics such as law science archaeology defence policy and more all with a focus on space This edited collection is a timely international and interdisciplinary book which addresses some of the contemporary issues facing activities in space and those attempting to understand use and regulate the space domain This edited book seeks to normalise the role of women as experts in the space sector by not calling attention to the fact that all the authors are women they are all experts in their respective fields who just happen to be women Bringing together these contributions in this book in turn promotes the inclusion of diversity in the space sector This edited collection is an opportunity to influence the development of the space industry in terms of gender diversity and diversity of disciplines and thinking while it is in its formative stage rather than trying to redress imbalances once they are entrenched in the industry

Sustainability of the Exploration and Use of Outer Space Yvonne Karimi-Schmidt, 2024-04-09 This book provides insight into the significance of the law of outer space in promoting order cooperation and peaceful activities in space It emphasizes the advantages of having a legal framework in place to govern space exploration and utilization rather than relying on power and force

Militarizing Outer Space Alexander C.T. Geppert, Daniel Brandau, Tilmann Siebeneichner, 2020-12-02 Militarizing Outer Space explores the dystopian and destructive dimensions of the Space Age and challenges conventional narratives of a bipolar Cold War rivalry Concentrating on weapons warfare and violence this provocative volume examines real and imagined endeavors of arming the skies and conquering the heavens The third and final volume in the groundbreaking European Astroculture trilogy Militarizing Outer Space zooms in on the interplay between security technopolitics and knowledge from the 1920s through

the 1980s Often hailed as the site of heavenly utopias and otherworldly salvation outer space transformed from a promised sanctuary to a present threat where the battles of the future were to be waged Astroculture proved instrumental in fathoming forms and functions of warfare's futures past both on earth and in space The allure of dominating outer space the book shows was neither limited to the early twenty first century nor to current American space force rhetorics
