Heresy in Transition John Christian Laursen, Cary J. Nederman, 2016-04-22 The concept of heresy is deeply rooted in Christian European culture The palpable increase in incidences of heresy in the Middle Ages may be said to directly relate to the Christianity's attempts to define orthodoxy and establish conformity at its centre resulting in the sometimes forceful elimination of Christian sects In the transition from medieval to early modern times however the perception of heresy underwent a profound transformation ultimately leading to its decriminalization and the emergence of a pluralistic religious outlook The essays in this volume offer readers a unique insight into this little understood cultural shift Half of the chapters investigate the manner in which the church and its attendant civil authorities defined and proscribed heresy whilst the other half focus on the means by which early modern writers sought to supersede such definition and proscription The result of these investigations is a multifaceted historical account of the construction and serial reconstruction of one of the key categories of European theological juristic and political thought The contributors explore the role of nationalism and linguistic identity in constructions of heresy its analogies with treason and madness the role of class and status in the responses to heresy In doing so they provide fascinating insights into the roots of the historicization of heresy and the role of this historicization in the emergence of religious pluralism

Early Modern Autobiography Ronald Bedford, Lloyd Davis, Philippa Kelly, 2006 Why and in what ways did late medieval and early modern English people write

about themselves and what was their understanding of how selves were made and discussed This collection goes to the heart of current debate about literature and autobiography addressing the contentious issues of what is meant by early modern autobiographical writing how it was done and what was understood by self representation in a society whose groupings were both elaborate and highly regulated Early Modern Autobiography considers the many ways in which autobiographical selves emerged from the late medieval period through the seventeenth century with the aim of understanding the interaction between those individuals lives and their worlds the ways in which they could be recorded and the contexts in which they are read In addressing this historical arc the volume develops new readings of significant autobiographical works while also suggesting the importance of texts and contexts that have rarely been analyzed in detail enabling the contributors to reflect on and challenge some prevailing ideas about what it means to write autobiographically and about the development of notions of self representation The idea of the self as seen from diverse and fascinating perspectives on sixteenth and seventeenth century life this is what readers can expect from Early Modern Autobiography A beautifully edited collection genuinely far reaching and insightful Early Modern Autobiography makes known to us a great deal about how people saw themselves four hundred years ago Derek Cohen Professor of English McLaughlin College York University Acutely addressing a range of central issues from subjectivity to theatricality to religion these essays will be of great interest to specialists in early modern studies and students of autobiographical writings from all eras Heather Dubrow Tighe Evans Professor and John Bascom Professor Department of English University of Wisconsin The essays in this volume show where archival discoveries memoirs letters account books wills and marginalia can take us in understanding early modern mentalities They document the interdependence of the abstract and the everyday the social constructedness of self awareness local contexts for self recordation and impulses that range from legal purpose to imaginative escape The sixteen chapters open many fascinating new perspectives on identity and personhood in Renaissance England Lena Cowen Orlin Executive Director The Shakespeare Association of America and Professor of English University of Maryland Baltimore County Ronald Bedford is Reader in the School of English Communication and Theatre at the University of New England in Armidale New South Wales and author of The Defence of Truth Herbert of Cherbury and the Seventeenth Century and Dialogues with Convention Readings in Renaissance Poetry The late Lloyd Davis was Reader in the School of English at the University of Queensland and author of Guise and Disguise Rhetoric and Characterization in the English Renaissance 1993 and editor of Sexuality and Gender in the English Renaissance 1998 and Shakespeare Matters History Teaching Performance 2003 Philippa Kelly is a Senior Research Fellow at the University of New South Wales and has published widely in the areas of Shakespeare studies cultural studies feminism and postcolonial studies

slave trade Reading Fictions, 1660-1740 Kate Loveman, 2016-12-05 English society in the late seventeenth and early eighteenth centuries was fascinated by deception and concerns about deceptive narratives had a profound effect on reading practices Kate Loveman's interdisciplinary study explores the ways in which reading habits first developed to deal with suspect political and religious texts were applied to a range of genres and as authors responded to readers' critiques shaped genres Examining responses to authors such as Defoe Swift Richardson and Fielding Loveman investigates reading as a sociable activity She uncovers a lost critical discourse centred on strategies of shamming which involved readers in public displays of reason wit and ironic pretence as they discussed the credibility of oral and written narratives Widely understood by early modern readers and authors the codes of this rhetoric have now been forgotten to the detriment of our perception of the period's literature and politics Loveman's lively book offers a striking new approach to Restoration and eighteenth century literary culture and in particular to understanding the development of the novel Argument and Authority in Early Modern England Conal Condren, 2006-03-17 A radical reappraisal of the character of moral and political theory in early modern England **The Dreadful Word** Kristin A. Olbertson, 2022-03-10 Introduction A politer peace Sensibility Civility Credibility Cacophony Respectability The Theater of Experiment Al Coppola, 2016-08-19 The first book length study of the relationship between science and theater during the long eighteenth century in Britain The Theater of Experiment explores the crucial role of spectacle in the establishment of modern science by analyzing how eighteenth century science was staged in a double sense On the one hand this study analyzes science in performance the way that science and scientists were made a public spectacle in comedies farces and pantomimes for purposes that could range from the satiric to the pedagogic to the hagiographic But this book also considers the way in which these plays laid bare science as performance that is the way that eighteenth century science was itself a kind of performing art subject to regimes of stagecraft that traversed the laboratory the lecture hall the anatomy theater and the public stage Not only did the representation of natural philosophy in eighteenth century plays like Thomas Shadwell's *Virtuoso* Aphra Behn's *The Emperor of the Moon* Susanna Centlivre's *The Basset Table* and John Rich's *Necromancer* or *Harelequin* Doctor Faustus influence contemporary debates over the role that experimental science was to play public life the theater shaped the very form that science itself was to take By disciplining and ultimately helping to legitimate experimental philosophy the eighteenth century stage helped to naturalize an epistemology based on self evident decontextualized facts that might speak for themselves In this the stage and the lab jointly fostered an Enlightenment culture of spectacle that transformed the conditions necessary for the production and dissemination of scientific knowledge Precisely because Enlightenment public science initiatives taking their cue from the public stages came to embrace the stagecraft and spectacle that Restoration natural philosophy sought to repress from the scene of experimental knowledge production eighteenth century science organized itself around not the sober masculine modest witness of experiment but the sentimental feminized eager observer of scientific performance **Literature and Science,**

1660-1834, Part I. Volume 2 Judith Hawley, 2024-10-28 This volume reproduces primary texts which embody the polymathic nature of the literature of science and provides editorial overviews and extensive references to provide a resource for specialized academics and researchers with a broad cultural interest in the long 18th century Heirs of Flesh and Paper Tom Tölle, 2022-03-07 Heirs of Flesh and Paper tells the story of early modern dynastic politics through subjects practical responses to royal illness failing princely reproduction and heirs premature deaths It treats connected dynastic crises between 1699 and 1716 as illustrative for early modern European political regimes in which the rulers corporeality defined politics This political order grappled with the endemic uncertainties induced by dynastic bodies By following the day to day practices of knowledge making in response to the unpredictability of royal health the book shows how the ruling family's mortal coils regularly threatened to destabilize the institutionalized legal fiction of kingship Dynastic politics was not only as a transitory stage of state formation part of elite cooperation or a cultural construct It needs to be approached through everyday practices that put ailing dynastic bodies front and center In a period of intensifying political planning it constituted one of the most important sites for changing the political itself The Politics of Disclosure, 1674-1725 Rebecca Bullard, 2015-10-06 This is a study of the secret history a polemical form of historiography which flourished in England during the late seventeenth and early eighteenth centuries The Reinvention of Populist Rhetoric in The Digital Age Mark Rolfe, 2016-11-23 This highly original work considers the rhetoric of political actors and commentators who identify digital media as the means to a new era of politics and democracy Placing this rhetoric in a historical and intellectual context it provides a compelling explanation of the reinvention and thematic recurrence of democratic discourse The author investigates the populist sources of rhetoric used by digital politics enthusiasts as outsiders inaugurating new eras of democracy with digital media such as Barack Obama and Julian Assange and explores the generations of rhetorical and political history behind them The book places their rhetoric in the context of the permanent tensions between insiders and outsiders between the political class and the populace which are inherent to representative democracy Through a theoretical and conceptual research that is historically grounded and comparative it offers rhetorical analysis of candidates for the 2016 presidential election and discusses digital democracy particularly discussing their origins in American populism and their influence on other countries through Americanization Uniquely it offers a sceptical assessment of epochal claims and a historical rhetorical account of two of the defining figures of twentieth century politics to date and reveals how modern rhetoric is grounded in an older form of anti politics and mobilises tropes that are as old as representative democracy itself

Editing Lives Jesse G. Swan, 2013-12-12 Central to all post Renaissance scholarship textual studies continues to evolve both in its techniques and methods as well as in the illumination it affords all other areas of modern knowledge The life of our fellow human beings and how we know and tell lives is one such area of modern knowledge that is foundationally affected by theories and practices of textual creation transmission and apprehension This collection of new essays and studies by

internationally acclaimed scholars along with a select few who are less acclaimed but of distinct promise provides a view into the contemporary state of scholarship in textual and biographical studies The collection also means to be of especial interest to scholars of the British eighteenth century by concentrating its evidence and argument on topics and subjects important to contemporary eighteenth century studies The volume is inspired by the extensive contributions to the fields by the late O M Brack Jr

Stuart Succession Literature Paulina Kewes, Andrew McRae, 2018-12-06 Moments of royal succession which punctuate the Stuart era 1603 1714 occasioned outpourings of literature Writers including most of the major figures of the seventeenth century from Jonson Daniel and Donne to Marvell Dryden and Behn seized upon these occasions to mark the transition of power to reflect upon the political structures and values of their nation and to present themselves as authors worthy of patronage and recognition This volume of essays explores this important category of early modern writing It contends that succession literature warrants attention as a distinct category appreciated by contemporaries acknowledged by a number of scholars but never investigated in a coherent and methodical manner it helped to shape political reputations and values across the period Benefitting from the unique database of such writing generated by the AHRC funded Stuart Successions Project the volume brings together a distinguished group of authors to address a subject which is of wide and growing interest to students both of history and of literature It illuminates the relation between literature and politics in this pivotal century of English political and cultural history Interdisciplinary in scope the volume will be indispensable to scholars of early modern British literature and history as well as undergraduates and postgraduates in both fields
