Crude Awakenings Steve A. Yetiv, 2010-12-15 The real story of global oil over the past twenty five years is not about the spillover effects of Palestinians fighting Israelis or terrorist attacks on U S forces in Saudi Arabia and Yemen or Iraq's stormy relationship with Kuwait It is not even about periodic small and large scale U S attacks on Iraq Rather the real story is about longer term developments that have changed the international relations of the Middle East politics at the global level and world oil markets These developments have increased oil stability from the Introduction Thirty years after OPEC shattered world markets for oil the Western world remains profoundly dependent on foreign particularly Middle Eastern sources of petroleum U S political rhetoric is suffused with claims about the vulnerability caused by this dependence Hence many political analysts assume that a search for stability of petroleum supplies is an important element of contemporary American foreign policy Steve A Yetiv

argues that common assumptions about oil markets are wrong Although prices remain volatile Yetiv's account portrays a world market in petroleum products far more benign and predictable than the one to which we are accustomed In *Crude Awakenings* he identifies and analyzes real and potential threats to the global energy supply including wars revolutions coups dangerous alliances oil embargoes Islamic radicalism and transnational terrorism However he also shows how some of these threats have been mitigated and how global oil security has been reinforced Freedom of Religion Under Bills of Rights

Paul Babie, Neville Rochow, 2012 The Australian Constitution contains no guarantee of freedom of religion or freedom of conscience Indeed it contains very few provisions dealing with rights in essence it is a Constitution that confines itself mainly to prescribing a framework for federal government setting out the various powers of government and limiting them as between federal and state governments and the three branches of government without attempting to define the rights of citizens except in minor respects Whether Australia should have a national bill of rights has been a controversial issue for quite some time This is despite the fact that Australia has acceded to the ICCPR as well as the First Optional Protocol to the ICCPR thereby accepting an international obligation to bring Australian law into line with the ICCPR an obligation that Australia has not discharged Australia is the only country in the Western world without a national bill of rights 4 The chapters that follow in this book debate the situation in Australia and in various other Western jurisdictions From Foreword by The Hon Sir Anthony Mason AC KBE Human Rights and Courts *The International Politics of the Red Sea* Anoushiravan Ehteshami, Emma C. Murphy, 2013-03-01 This pioneering book is the first comprehensive study of the Red Sea as a sub region of the international system in its own right Examining the international politics of the Red Sea region from the Cold War to the present day it argues that the Red Sea area demonstrates the characteristics of a sub regional system given its increasing economic and social interdependence greater regional integration and flows of resources across it It details how stronger regional powers Egypt Israel and Saudi Arabia which co habit the sub region with much weaker vulnerable and fragile states are seeking to stamp their own authority on this dynamic sub region They have attempted to do so the authors show through extension of their military and economic influence where ever possible while also forging regional partnerships aimed at protecting their interests or to fend off possible encroachment of others The book discusses in great detail the security and military dynamics of the sub region land and maritime borders as well as economic issues including trade migration capital flows and transport It covers developments across the Red Sea and also within all the states of this newly forming sub region

Ballistic Missile Proliferation in Non-Nuclear States Karim El-Baz, Ali Ghanbarpour-Dizboni, 2024-08-14 This book offers an exploration of ballistic missile proliferation in the Middle East and also delves into the geopolitical landscape to unveil a narrative of contemporary Middle Eastern history The central focus of this book is to decipher the pivotal moments when three regional powers of the Middle East Egypt Saudi Arabia and Iran embraced ballistic capabilities as a strategic response to military vulnerabilities The authors contend that the very essence of ballistic proliferation incorporates a tactical

rationale provided by military needs that varies from one state to another and it is upon the assessment of these military needs that the decision to procure ballistic missiles is made. Offering a blend of theoretical insights and primary sources based case studies, this book dissects the decision making processes that spurred these states to choose ballistic missiles despite their inefficiencies in delivering conventional payloads. The absence of an effective air force emerges as a catalyst triggering what the authors term a moment of ballistic consciousness. Spanning three diverse regimes, the work provides a rich historical tapestry and untangles the complexities of political decisions with military implications, providing a fresh perspective on global power dynamics. This narrative sheds light on the intersection of military strategy, geopolitical realities, and the pursuit of ballistic capabilities that shapes the world's security landscape. This book will be of much interest to students of arms control, nuclear proliferation, Middle Eastern politics, and International Relations.

Outsourcing Security Bruce E. Stanley, 2015-07-15 Faced with a decreasing supply of national troops, dwindling defense budgets, and the ever rising demand for boots on the ground in global conflicts and humanitarian emergencies, decision makers are left with little choice but to legalize and legitimize the use of private military contractors (PMCs). *Outsourcing Security* examines the impact that bureaucratic controls and the increasing permissiveness of security environments have had on the U.S. military's growing use of PMCs during the late twentieth and early twenty-first centuries. Bruce E. Stanley examines the relationship between the rise of the private security industry and five potential explanatory variables tied to supply and demand theory in six historical cases, including Operation Desert Storm in 1991, the U.S. intervention in Bosnia in 1995, and Operation Iraqi Freedom in 2003. *Outsourcing Security* is the only work that moves beyond a descriptive account of the rise of PMCs to lay out a precise theory explaining the phenomenon and providing a framework for those considering PMCs in future global interaction.

Global Empowerment of Women Carolyn M. Elliott, 2007-12-12 The empowerment of women is a broadly endorsed strategy for solving a host of difficult problems, from child poverty to gender violence to international development. The seventeen international scholars in this multi-disciplinary volume offer thoughtful critiques of the notion of empowerment based on their studies in twenty countries in all regions of the world. The comparative introduction places concepts of empowerment in the context of models of the market and of community, showing how contradictions in these models, as they are enacted on the ground, provide both spaces and constraints for women. The chapters consider opportunities for women in the context of globalization, resurgent nationalism, and politicized religion; cultures of masculinity and the HIV/AIDS epidemic in Africa. They show how initiatives at national or global levels are transformed by local cultures and power structures, and demonstrate the fruitfulness of tensions between universal values of human rights and contextualized understandings. This landmark multi-

disciplinary collection of original studies by distinguished international feminist scholars will be an essential addition to the fields of Political Science Women's Studies Economics Sociology International Development and Environmental Studies

unparalleled passion and hostility not only among its immediate participants and neighbors but also in the wider international community. The involvement of three principal monotheistic religions makes the conflict a truly universal contestation. As a result, it often contributes to bouts of violence, turmoil, and terrorism in the Middle East and beyond. This second edition of *Historical Dictionary of the Arab-Israeli Conflict* covers the history through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 600 cross-referenced entries, important events, key personalities, official positions of principal states, and the UN and other efforts to find a peaceful settlement. This book is an excellent access point for students, researchers, and anyone wanting to know more about this conflict.

The A to Z of the Arab-Israeli Conflict P. R. Kumaraswamy, 2009-07-24 For over a century, the conflict between the Arabs and Jews has remained the most intractable problem confronting the world. Hardly a day passes that the Arab-Israeli Conflict is not headlined in the media. It has turned the Arabs and Israelis against one another and embittered relations within the two communities while drawing the rest of the world into the circle of disruption. *The A to Z of the Arab-Israeli Conflict* provides factual background through an introductory essay, a chronology, a bibliography, and hundreds of cross-referenced dictionary entries on the more significant persons, places, and events, including the various wars and negotiations. The history, religion, culture, and archeology that this rivalry has sparked between the Arabs and Israelis over the same piece of territory is traced in this book, which offers the essential details using neutral terms and thereby allowing readers to draw conclusions for themselves.

The Nuclear Tipping Point Kurt M. Campbell, Robert J. Einhorn, Mitchell B. Reiss, 2005-06-22 More than half a century after the advent of the nuclear age, the world is approaching a tipping point that will unleash an epidemic of nuclear proliferation. Today, many of the building blocks of a nuclear arsenal—scientific and engineering expertise, precision machine tools, software, design information—are more readily available than ever before. The nuclear pretensions of so-called rogue states and terrorist organizations are much discussed. But how firm is the resolve of those countries that historically have chosen to forswear nuclear weapons? A combination of changes in the international environment could set off a domino effect with countries scrambling to develop nuclear weapons so as not to be left behind or to develop nuclear hedge capacities that would allow them to build nuclear arsenals relatively quickly if necessary. *The Nuclear Tipping Point* examines the factors, both domestic and transnational, that shape nuclear policy. The authors, distinguished scholars and foreign policy practitioners with extensive government experience, develop a framework for understanding why certain countries may originally have decided to renounce nuclear weapons and pinpoint some more recent, country-specific factors that could give them cause to reconsider. Case studies of eight long-term stalwarts of the nonproliferation regime—Egypt, Germany, Japan, Saudi Arabia, South Korea, Syria, Turkey, and Taiwan—flesh out this framework.

and show how even these countries might be pushed over the edge of a nuclear tipping point The authors offer prescriptions that would both prevent such countries from reconsidering their nuclear option and avert proliferation by others The stakes are enormous and success is far from assured To keep the tipping point beyond reach the authors argue the international community will have to act with unity imagination and strength and Washington s leadership will be essential Contributors include Leon Feurth George Wash
