Savage Wars Of Peace England Japan And The Malthusian Trap:

The Savage Wars of Peace A. Macfarlane, 2002-11-19 This book aims to solve the problem of how parts of mankind escaped from an apparently inevitable trap of war famine and disease in the last three hundred years Through a detailed comparative analysis of English and Japanese history it explores such matters as the destruction of war decline of famine importance of certain drinks especially tea the use of human excrement and the effects of housing clothing and bathing on human health It also shows how the English and Japanese controlled fertility through marriage and sexual patterns biological and contraceptive factors abortion and infanticide *Cars* , **Biomedicine, the Family and Human Rights**

Marie-Thérèse Meulders-Klein, Paul Vlaardingerbroek, Ruth Deech, 2002-04-01 This volume examines the impact of advances in genetics and assisted reproduction technologies on family law human rights and the rights of the child including the effects of international treaties on national legislation It surveys the theoretical ethical and legal discussions with regard to biotechnology and family law issues and the search for a balance between safeguarding respect for human rights and fundamental freedoms and the need to ensure freedom of research However biotechnology impinges not only on isolated individuals and their rights but also on unborn children the family as a network of living relationships and the basic structure of any society as well as the foundation of parentage and kinship social organization as a whole and finally mankind itself As the attention of the World turns to cloning this book will contribute to the search for a balance between the rights and freedoms of born and yet to be born human beings and the quest for new technologies *ONE QUARTER OF HUMANITY*

James Z. LEE, Wang. Feng, 2009-06-30 One Quarter of Humanity presents evidence about historical and contemporary Chinese population behavior that overturns much of the received wisdom about the differences between China and the West James Lee and Wang Feng argue that there has been effective regulation of population growth in China through a variety of practices that depressed marital fertility to levels far below European standards and through the widespread practices of infanticide and abortion These practices and other distinctive features of the Chinese demographic and social system they argue led to a different demographic transition in China from the one that took place in the West **The Empire of Tea**

Alan Macfarlane, Iris MacFarlane, 2009-02-24 This cultural political and social history of tea presents a fascinating picture of tea's impact on the lives of millions of people around the world Publishers Weekly From Darjeeling to Lapsang Souchon from India to Japan a fresh concise world encompassing exploration of the way tea has shaped politics culture and the environment throughout history From the fourth century BC in China where it was used as an aid in Buddhist meditation to the Boston Tea Party in 1773 to its present day role as the most consumed substance on the planet the humble Camellia plant has had profound effects on civilization Renowned cultural anthropologist Alan MacFarlane and Iris MacFarlane recount the history of tea from its origin in the eastern Himalayas and explains among other things how tea became the world's most prevalent addiction how tea was used as an instrument of imperial control and how the cultivation of tea drove the industrial

revolution Both an absorbing narrative and a fascinating tour of some of the world's great cultures Japan China India France Britain and others *The Empire of Tea* brings into sharp focus one of the forces that shaped history A good primer on a resonant and endlessly stimulating subject Boston Sunday Globe A fascinating picture of tea's impact on the lives of millions of people around the world Publishers Weekly An absorbing read Kirkus Reviews *Let Us Now Praise Famous Gullies* Paul S. Sutter, 2015-12-15 Providence Canyon State Park also known as Georgia's Little Grand Canyon preserves a network of massive erosion gullies allegedly caused by poor farming practices during the nineteenth century It is a park that protects the scenic results of an environmental disaster While little known today Providence Canyon enjoyed a modicum of fame in the 1930s During that decade local boosters attempted to have Providence Canyon protected as a national park insisting that it was natural At the same time national and international soil experts and other environmental reformers used Providence Canyon as the apotheosis of human and particularly southern land abuse *Let Us Now Praise Famous Gullies* uses the unlikely story of Providence Canyon and the 1930s contest over its origins and meaning to recount the larger history of dramatic human induced soil erosion across the South and to highlight the role that the region and its erosive agricultural history played in the rise of soil science and soil conservation in America More than that though the book is a meditation on the ways in which our persistent mental habit of separating nature from culture has stunted our ability to appreciate places like Providence Canyon and to understand the larger history of American conservation ***Of Poverty and Wealth*** Alan Macfarlane, 2021-12-01 *Of Poverty and Wealth* Eric Hobsbawm Barry Supple and Gareth Stedman Jones is a collection of interviews that is being published as a book for the first time These interviews have been conducted by one of England's leading social anthropologists and historians Professor Alan Macfarlane Filmed over a period of several years the three conversations in this volume are part of the series *Creative Lives and Works* These transcriptions form a part of a larger set of interviews that cut across various disciplines from the social sciences and the sciences to the performing and visual arts The current volume is on three pre eminent economic historians There are many factors that lead to the rise and fall of power in which wealth trade and commerce play a vital role In this collection Eric Hobsbawm takes us through the fundamental and broader concepts of economic history while Barry Supple and Gareth Stedman Jones bring in the more focussed and often less discussed aspects of this branch of history Through these engaging conversations one gets a better understanding of poverty and wealth in the context of history The book will be of enormous value not just to those interested in the subject of Economics History and Comparative Studies but also to the uninitiated because of the lucidity which conversations bring to even otherwise opaque discussions Please note This title is co published with Social Science Press New Delhi Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka *The Unending Frontier* John F. Multilevel Selection Steven C. Hertler, Aurelio José Figueredo, Mateo Peñaherrera-Aguirre, 2020-09-02 This book embeds a novel evolutionary analysis of human group selection within a comprehensive overview of multilevel selection theory a theory wherein evolution proceeds at the level of individual organisms and collectives such as human families tribes states and empires Where previous works on the topic have variously supported multilevel selection with logic theory experimental data or via review of the zoological literature in this book the authors uniquely establish the validity of human group selection as a historical evolutionary process within a multilevel selection framework Select portions of the historical record are examined from a multilevel selectionist perspective such that clashing civilizations decline and fall law custom war genocide ostracism banishment and the like are viewed with the end of understanding their implications for internal cohesion external defense and population demography In doing so its authors advance the potential for further interdisciplinary study in fostering for instance the convergence of history and biology This work will provide fresh insights not only for evolutionists but also for researchers working across the social sciences and humanities

The Climate of Rebellion in the Early Modern Ottoman Empire Sam White, 2011-08-15 The Climate of Rebellion in the Early Modern Ottoman Empire explores the serious and far reaching impacts of Little Ice Age climate fluctuations in Ottoman lands This study demonstrates how imperial systems of provisioning and settlement that defined Ottoman power in the 1500s came unraveled in the face of ecological pressures and extreme cold and drought leading to the outbreak of the destructive Celali Rebellion 1595 1610 This rebellion marked a turning point in Ottoman fortunes as a combination of ongoing Little Ice Age climate events nomad incursions and rural disorder postponed Ottoman recovery over the following century with enduring impacts on the region s population land use and economy
