

## Introduction: Time for a Change

There's no place like Earth. It's the only planet in this solar system where we can breathe the air and walk around without a spacesuit! Our planet has been an orbiting life-support system for hundreds of millions of years.

People, on the other hand, have only been around for about 100,000 years. Yet today there are more of us than any other animal, fish, or bird. And a lot of our daily habits are adding up to big trouble for the planet:

- Our car habit is fouling Earth's air.
- Our throw-away habit is dirtying Earth's water.
- Our expensive habits (like wearing fur coats and ivory jewelry) are threatening Earth's other animals.

But there's something we can all do to save Earth—change our habits.

And changing our habits means taking action against pollution—action that starts small, like sorting garbage and riding bikes. With thousands of people doing it, we'll have a cleaner and healthier planet.

Saving the planet isn't an easy job—it won't happen overnight. It will take time for all of us to decide to change our habits and put a little Earth Action into our lives. But it's happening already,

and it's happening all over the world.

What's Earth Action? It's when parents stop buying apples and apple juice sprayed with an unhealthy chemical called Alar. It's when people vote for politicians who put the planet's health before company or individual profits. And it's when kids start a save-the-planet club and convince their school to recycle paper.

More people than ever are working to make Earth a cleaner, safer place. You can join them. On nearly every page of this book, you'll find at least one way you can help save the planet. Choose a few to start with and put a little Earth Action in your life today!

**Consumed** Andrew Benett,Ann O'Reilly,2025-08-22 As the effects of the global recession linger consumers everywhere are changing their purchasing patterns paying greater attention to what and why they are buying and from whom While many feel rampant spending is hard wired into the modern psyche and that we will be back to our wasteful ways soon enough there are clear indications of a permanent shift in the way we shop Even before the economic downturn consumers definitions of value had begun to change People were becoming more mindful about their purchases and more attuned to the social and environmental implications of their choices To better understand this important evolution and its ramifications for business Andrew Benett and Anne O Reilly launched a groundbreaking study on the New Consumer and the escalating dissatisfaction over hyperconsumerism Here for the first time is an in depth look at the new face of the global consumer showing that A significant majority in the seven markets surveyed are deeply worried about the direction in

which our consumption obsessed society is moving They believe people have become both physically and mentally lazy and that as a society we have lost sight of what truly matters Two thirds believe they would be better off if they lived more simply and a quarter say they would be happier if they owned fewer things Half of Americans surveyed are deriving a sense of satisfaction from reducing their purchases during the downturn and three quarters are feeling good about cutting back on the amount of waste they create A majority of Americans have no intention of going back to their old shopping patterns even when the economy rebounds Now as the consumer voice signals its changed priorities forward thinking companies are responding by rejecting excess and artificiality in favor of products and communications that offer authenticity substance and interconnectedness all values today s more mindful consumer craves In this book the brand experts look at corporations as diverse as Glenmorangie and Wal Mart to see what lessons they can offer to businesses attempting to grow in the postconsumerism era They also spoke with corporate leaders in a variety of industries to learn how they are recasting their businesses and brands in order to prepare for the changes ahead Through cutting edge research and a sharp look at new industry models Consumed provides real direction for marketers and managers
