Watkins,2023-04-11 Consumer capitalism arose with the second industrial revolution the application of continuous mass production to consumer goods during the late nineteenth and early twentieth centuries This book adopts a Veblenian Keynesian viewpoint presenting an evolutionary view of consumption combined with the need to increase demand to match increases in production The book traces the history of consumer capitalism examining the paradox posed by applying continuous mass production to produce armaments for dynastic ambitions versus consumer goods for the masses manifesting itself in the world wars of the twentieth century Multiple paradoxes at the heart of the story address booms leading to busts over producing countries in Asia relying on over consuming countries in the West and the expansion of demand depending on increasingly inventive ways of liquefying assets in light of stagnant incomes The book persuasively argues that these paradoxes result from capitalism s incessant drive to accumulate capital fostering conflict crises and depression The latest paradox results from the impact of continuous mass production on the environment manifesting itself as the Darwinian dilemma The dilemma stems from human beings largely winning the struggle for existence and in the process possibly making the earth uninhabitable at least for humans     **The Economics of Consumer Credit** Giuseppe Bertola,Richard

Disney,Charles Benedict Grant,2006 Cross national analysis of empirical theoretical and policy issues in the consumer credit

industry including household debt credit card usage and bankruptcy

**Chinese Economy** Giorgio Gomel, Daniela Marconi, Ignazio Musu, Beniamino Quintieri, 2012-07-31 This book takes readers on a unique journey across some of the most debated implications of the rise of the Chinese economy on the global scene From the analysis suggestions emerge on how to improve statistical tools to measure performance and to obtain more precise macroeconomic forecasts Moreover it confirms the suspicion that a governance model of firms that does not sufficiently encourage market competition may have significant costs in terms of efficiency for the Chinese production system The analysis of demographic factors and of household savings gives further support to calls for a serious reform effort particularly of the pension and health care systems to utilize households savings more efficiently and equitably Finally the analyses of Chinese and global trade underscore the need for a less superficial consideration of the implications of the Chinese presence in global markets **Generational Accounting** Holger Bonin, 2013-03-14 Among the concepts used to

decades the industrialized countries will experience a demographic transition that is unprecedented in history While the transition s impact on public pension schemes has extensively been examined its implication for private intergenerational transfers has gone almost unnoticed by the literature This study attempts to make up for that gap in the literature It gives a comprehensive overview of private transfer patterns in Germany extends the methodology of generational accounting to include private intergenerational transfers and presents a computable general equilibrium model that for the first time allows to analyze various bequest motives in a unified framework **NBER International Seminar on Macroeconomics ,2006**
