Endangered Species Jan A. Randall,2018-01-18 A detailed exploration of the variety of threats that endangered species are facing around the world whether they are due to human impact or so called natural causes Endangered species is a more complex issue and problem than it may seem on the surface What species are endangered and what is causing them to

become vulnerable to population decline How can essential industries such as farming housing development and manufacturing continue to thrive without harming flora and fauna that are protected Are current efforts adequate or should more be done to protect endangered species And who should be responsible for the substantial costs of working to save endangered species

Endangered Species A Reference Handbook begins with an introduction that addresses major threats and extinctions in history discusses the geographical and cultural contexts in which these incidents happened highlights other key moments along the endangered species timeline and clearly shows why the topic of endangered species matters The following sections examine an unbiased synthesis of classic and contemporary studies that inform the issue of endangered species and outline the most controversial events related to endangered species and the actions that have been taken to address them The book also presents perspective essays by scholars activists and other experts to provide diverse informed opinions on the issue of endangered species and includes a data and documents chapter that applies research finding to provide answers to questions like what species are most likely to become endangered in the future and which practices have historically been the most effective at protecting vulnerable species

Deep Learning Approaches to Text Production Shashi Narayan, Claire Gardent, 2020-03-20 Text production has many applications It is used for instance to generate dialogue turns from dialogue moves verbalise the content of knowledge bases or generate English sentences from rich linguistic representations such as dependency trees or abstract meaning representations Text production is also at work in text to text transformations such as sentence compression sentence fusion paraphrasing sentence or text simplification and text summarisation This book offers an overview of the fundamentals of neural models for text production In particular we elaborate on three main aspects of neural approaches to text production how sequential decoders learn to generate adequate text how encoders learn to produce better input representations and how neural generators account for task specific objectives Indeed each text production task raises a slightly different challenge e g how to take the dialogue context into account when producing a dialogue turn how to detect and merge relevant information when summarising a text or how to produce a well formed text that correctly captures the information contained in some input data in the case of data to text generation We outline the constraints specific to some of these tasks and examine how existing neural models account for them More generally this book considers text to text meaning to text and data to text transformations It aims to provide the audience with a basic knowledge of neural approaches to text production and a roadmap to get them started with the related work The book is mainly targeted at researchers graduate students and industrials interested in text production from different forms of inputs

Appalachian Autumn Marcia Bonta, 2011-12-01 Like her popular Appalachian Spring Marcia Bonta s new book offers a day by day account of the changing world of nature in the mountains of central Pennsylvania This

time she chronicles the beauties of the autumn months as she walks the familiar roads and trails of her 500 acre mountain top farm noting the minute transformations of the season as well as the more dramatic ones But her quiet sojourn in the natural world is shattered by the intrusion of a lumberman who insists upon clear cutting a neighboring property The massive bulldozers and skidders crush every tree and shrub weed and wildflower leaving only rubble in their wake The Bontas become involved in a lawsuit challenging this violation of the land they love and seeking to protect their own property from the effects of the logging Autumn is a bittersweet time Bonta writes a season of good byes when after the flaming leaves fall and start the inevitable process of decay we are left with only the bare bones of nature Fleeing from the whine of chain saws and the crash of falling trees she roams the mountain top watching wild turkeys forage in the field flocks of migrating birds feast on wild grapes does and bucks eye each other in their mating ritual But she can never completely evade the insistent question What is the relationship between humans and nature Does ownership give one the right to do as one pleases with the land and all the flora and fauna living on it Does the natural world exist solely to satisfy mankind's desire for profit The answer is not simple it cannot be drawn in winter's black and white But the issues must be of concern to every thoughtful person Marcia Bonta's Appalachian Autumn offers a new voice in the ongoing debate

[50 Simple Steps to Save the World's Rainforests](#) Kim Henderson, The Green Patriot Working Group, 2012-03-12 Despite the very best conservation and environmental policy making efforts at least 80 000 acres of tropical rainforest disappear each day If action is not taken now experts estimate that the world's rainforests will mostly disappear within 50 years Currently the destruction of tropical forests is responsible for 17 percent of man made carbon emissions more than what comes from all the world's cars airplanes and ships combined Tropical rainforests need our help and that's where 50 Simple Steps to Save the World's Rainforests comes in The future of the world's rainforests lies to a large extent in the collective hands of consumers and how they shop since demand is what fuels the forces driving deforestation agriculture logging and resource extraction Through the 50 step journey you will learn how as a consumer you may unwittingly support rainforest destruction and more importantly precisely how you can make different choices that help save rainforests For example you will learn how your paper use and purchases of rayon clothing affect Indonesian rainforests where Sumatran tigers are critically endangered or how simply eating Brazil nuts helps save the Amazon rainforest You will discover how the cultivation of palm oil a common ingredient in confections baked goods soaps and biofuels is fueling rampant deforestation in Malaysia Indonesia and Papua New Guinea and how you can avoid it 50 Simple Steps to Save the Rainforests is the ultimate primer for anyone wanting to take action to help save this ecosystem which is so critical to the future of mankind
