## **Saving Our Natural Heritage Role Of Science In Managing Australias Ecosystem:**

**Saving Our Natural Heritage?** Craig Copeland, Damian Lewis, 1997-01-01 *An International Perspective on Wetland Rehabilitation* W.J. Streever, 2012-12-06 Bill Streever author of Bringing Back the Wetlands and numerous technical articles about wetland restoration and creation worked for two years to bring together this collection of papers Authors ranging from private landowners to government managers to scientists present regional overviews case studies and discussions of various issues Regional overviews cover areas as small as the Commonwealth of the Northern Mariana Islands to areas as large as Australia and Africa Case studies range from relatively small projects such as rehabilitation of damage caused by wheel ruts in the high arctic to much larger projects such as attempts to rehabilitate thousands of hectares of Northern Territory wetlands in Australia Seedbank ecology economics remote sensing community involvement the role of the wetland consulting industry and other issues are discussed In an effort to synthesize information from around the world Joy Zedler presents a model that allows comparison of projects and may lead to better predictability of project outcomes In *An International Perspective on Wetland Rehabilitation* authors describe planting engineered structures prescribed flooding excavation and other rehabilitation methods from Israel to New Zealand to the Netherlands and elsewhere For the first time one volume offers an impression of the magnitude and diversity of the field of wetland rehabilitation around the globe *Practical Conservation Biology* David Lindenmayer, Mark A. Burgman, 2005 Provides the essential framework for under graduate and post graduate courses in conservation biology and natural resource management by covering the complete array of topics central to these fields Lindenmayer from ANU ACT and Burgman from University of Melbourne Vic *Preserving Rural Australia* A Robertson, R Watts, 1999-01-01 Scientific knowledge alone will not help countries achieve sustainable management of land water and biota Everyone now realises that a partnership is needed between land and water users scientists managers and the community if countries are to achieve the goal of preserving rural resources This book deals with broad issues relating to resource decline and how different groups such as farmers rural town dwellers resource managers and government deal with these issues from social economic and ecological points of view **Carnivore Conservation** John L. Gittleman, 2001-06-28 Carnivores are the focus of intense attention and resources in conservation biology It is often argued that because carnivores are at the top of the food chain if they are protected then other taxa will also be afforded adequate protection Carnivores are also charismatic and compete with humans for dwindling space and environmental resources In the past 10 years theoretical and empirical studies on carnivores have developed very quickly This volume reviews and summarises the current state of the field describes limitations and opportunities for carnivore conservation and offers a conceptual framework for future research and applied management As such it will be of interest to students and researchers of conservation biology mammalogy animal behaviour ecology and evolution **Shades of Green** Christof Mauch, Nathan Stoltzfus, Douglas R. Weiner, 2006-07-24 *Shades of Green* examines the impact of political economic religious

and scientific institutions on environmental activism around the world The book highlights the diversity of national regional and international environmental activism showing that the term environmentalism covers an entire range of perceptions values and interests It demonstrates that each instance of environmental activism is shaped by historically unique circumstances highlighting within each chapter the ideological social and political origins of efforts to protect the environment Discussing issues unique to different parts of the world *Shades of Green* shows that environmentalism around the globe has been strengthened weakened or suppressed by a variety of local national and international concerns politics and social realities

*Conserving Forest Biodiversity* David B. Lindenmayer, Jerry F. Franklin, 2013-04-10 While most efforts at biodiversity conservation have focused primarily on protected areas and reserves the unprotected lands surrounding those area the matrix are equally important to preserving global biodiversity and maintaining forest health In *Conserving Forest Biodiversity* leading forest scientists David B Lindenmayer and Jerry F Franklin argue that the conservation of forest biodiversity requires a comprehensive and multiscaled approach that includes both reserve and nonreserve areas They lay the foundations for such a strategy bringing together the latest scientific information on landscape ecology forestry conservation biology and related disciplines as they examine the importance of the matrix in key areas of ecology such as metapopulation dynamics habitat fragmentation and landscape connectivity general principles for matrix management using natural disturbance regimes to guide human disturbance landscape level and stand level elements of matrix management the role of adaptive management and monitoring social dimensions and tensions in implementing matrix based forest management In addition they present five case studies that illustrate aspects and elements of applied matrix management in forests The case studies cover a wide variety of conservation planning and management issues from North America South America and Australia ranging from relatively intact forest ecosystems to an intensively managed plantation *Conserving Forest Biodiversity* presents strategies for enhancing matrix management that can play a vital role in the development of more effective approaches to maintaining forest biodiversity It examines the key issues and gives practical guidelines for sustained forest management highlighting the critical role of the matrix for scientists managers decisionmakers and other stakeholders involved in efforts to sustain biodiversity and ecosystem processes in forest landscapes
