Saving Wildlife:

Saving Wildlife Rebecca Hunter, 2010 This series looks at some of the environmental issues facing the world today discussing the problems and possible solutions It explores environmental themes at the core of the curriculum Saving Wildlife Donald Letcher Goddard, 1995 Articles essays letters originally pub 1887 1993 endangered species nature conservation **Comprehension Practice, Grade 5** Teacher Created Resources, 2007-06 Includes literary and factual texts a variety of question types graphic organizers Saving America's Countryside Samuel N. Stokes, A. Elizabeth Watson, Shelley S. Mastran, 1997-08-13 A new edition of the 1989 classic that received the American Society for Landscape Architects Honor Award and the Historic Preservation Book Prize This thoroughly revised and updated second edition reports on changes in conservation over the last eight years It includes new case studies more than 50 new illustrations a section on heritage tourism and much more 235 illustrations Saving Nature's Legacy Timothy J. Farnham, 2007-01-01 Biological diversity is considered one of today's most urgent environmental concerns yet the term was first coined only twenty five years ago Why did the concept of biological diversity so quickly capture public attention and emerge as a banner issue for the environmental movement In this book Timothy J Farnham explores for the first time the historical roots of biological diversity tracing the evolution of the term as well as the history of the conservation traditions that contributed to its rapid acceptance and popularity Biological diversity is understood today as consisting of three components species diversity genetic diversity and ecosystem diversity Farnham finds that these three tiers coincided with three earlier disparate conservation traditions that converged when the cause of preserving biological diversity was articulated He tells the stories of these different historical foundations recounts how the term came into the environmental lexicon and shows how the evolution of the idea of biological diversity reflects an evolution of American attitudes toward the natural world Wildlife Conservation Ellen Labrecque, 2017-08-01 Using the new C3 Framework for Social Studies Standards these books explore environmentalism through the lenses of History Geography Civics and Economics In Wildlife Conservation the text and photos look at the history basic philosophies and geography of this environmental issue As they read students will develop questions about the text and use evidence from a variety of sources in order to form conclusions Data focused backmatter is included as well as a bibliography glossary and index **Saving Endangered Animals** Nina Oswald, 2014-12-15 This book will introduce readers to fractions through relatable contexts and clear explanations Straightforward visuals will help students to fully grasp the concept of fractions as being multiple parts of a whole Accessible text and an engaging storyline make fractions easy to understand and apply to everyday life Readers will learn to express and recognize whole number fractions as they learn about endangered animals and conservation This volume satisfies 3 NF A 3c **Wildlife Conservation in China** Richard B. Harris, 2014-12-18 Very little is known about the issue of wildlife conservation within China Even China specialists get a meager ration of stories about pandas giving birth in zoos or poachers in some remote setting being apprehended But what

does the future hold for China's wildlife In this thoughtful work the leading U S expert on wildlife projects in Western China presents a multi faceted assessment of the topic Richard B Harris draws on twenty years of experience working in China and incorporates perspectives ranging from biology through Chinese history and tradition to interpret wildlife conservation issues in a cultural context In non technical language Harris shows that particularly in its vast western sections where most species of wildlife still have a chance to survive China has adopted a strongly preservationist hands off approach to wildlife without confronting the larger and more difficult problem of habitat loss This policy treats wildlife conservation as a strictly technical problem and thus prioritizes captive breeding to meet the demand for animal products while ignoring the manifold cultural social and economic dimensions that truly dictate how wild animals will fare in their interaction with the physical and human environments The author concludes that any successes this policy achieves will be temporary **50 Simple**

Things You Can Do to Save the Earth John Javna, 2008-04-01 Together We Can Make a Difference Today's environmental problems may seem too overwhelming for one person to tackle but you don't have to do it alone Now you have partners 50 of them 50 Simple Things You Can Do to Save the Earth the revolutionary 1990 bestseller is back in a completely revised updated edition and it's just as innovative and groundbreaking as the original The authors have teamed up with 50 of America's top environmental groups including The Natural Resources Defense Council the National Wildlife Federation and Rainforest Action Network Each group has chosen one issue and provided a simple step by step program that will empower you and your family to become citizen activists in the fight to save the Earth It's easy to get started Just pick one Fight global warming one city at a time with the Sierra Club's Cool Cities Campaign Roll up your sleeves and save an endangered species with the Wilderness Society Protect coral reefs and create a marine reserve with Seacology Get your congregation excited about protecting God's creations with Interfaith Power and Light Invite songbirds into your neighborhood with the National Audubon Society All it takes is a little effort When we work together we can work miracles Get started now *Wildlife*

The Goodwin Niering Center for Conservation Biology and Environmental Studies at Connecticut College is a comprehensive interdisciplinary program that builds on one of the nation's leading undergraduate environmental studies programs The Center fosters research education and curriculum development aimed at understanding contemporary ecological challenges One of the major goals of the Goodwin Niering Center is to enhance the understanding of both the College community and the general public with respect to ecological political social and economic factors that affect natural resource use and preservation of natural ecosystems To this end the Center has offered six conferences at which academicians

representatives of federal and state government people who depend on natural resources for their living and individuals from non government environmental organizations were brought together for an in depth interdisciplinary evaluation of important environmental issues On April 6 and 7 2007 the Center presented the Elizabeth Babbott Conant interdisciplinary conference on Saving Biological Diversity Weighing the Protection of Endangered Species vs Entire Ecosystems The Beaver Brook Foundation Audubon Connecticut the state of ce of the National Audubon Society the Connecticut Chapter of The Nature Conservancy Connecticut Forest and Park Association and the Connecticut Sea Grant College Program joined the Center as conference sponsors During this two day conference we learned about conservation and endangered species from a wider range of perspectives Like all of the conferences sponsored by the Goodwin Niering Center this conference was broadly interdisciplinary with presentations by economists political scientists and conservation biologists

Animals Julie Kerr Casper, 2007 Discusses why animals are such an important resource describes the damage being done to them by current practices and introduces things that can be done to protect them

A Guide to a Healthier Planet Erlijn van Genuchten, 2023-09-30 This book focuses on closing the gap between scientific insights on pressing environmental issues that do not often reach the general public and putting that scientific knowledge in the hands of everyday people who can use these insights to take action against climate change pollution and biodiversity loss The goal of this work is to share fascinating facts about nature and sustainability to inspire taking action toward a healthier planet and to provide ideas on how we can take action to solve environmental issues in an informed and easy to understand way The chapters are sourced from the author's work published on medium.com ErlijnG with added content not available on medium.com All chapters are based on open access research articles covering various environmental issues and solutions that are not often disseminated in popular discourse but are nonetheless important for non scientific audiences to understand and become familiar with They allow readers to explore the broad range of concepts and issues and recognize the far reaching consequences and trigger the desire to take action Also each chapter provides concrete ideas of how we as individuals can take action in daily life to make a positive difference related to the issues described The book is a multimodal work as it includes images and videos that accompany the text

Strategies for Environmental Success in an Uncertain Judicial Climate Michael Allan Wolf, 2005 Over the last 30 years we have made great progress in curbing the most obvious pollution largely due to effective enforcement of federal and state environmental statutes Now however there is increasing skepticism of the efficiency and even the constitutionality of our bedrock environmental laws from all branches of the federal government including the courts This book is the result of

lively debate at the conference Alternative Grounds Defending the Environment in an Unwelcome Judicial Climate held on November 11 2004 and co sponsored by the University of Florida s Levin College of Law and the Environmental Law Institute Topics ranged from U S Supreme Court trends in environmental law jurisprudence to innovative federal and state constitutional and statutory arguments that defend environmental protections to federal provisions most vulnerable to attack on federalism takings and separation of powers grounds This thought provoking and insightful collection of essays provides smart realistic solutions to the profound and complex legal challenges facing defenders of our environmental protections With contributions by Richard J Lazarus Sean H Donahue Paul Boudreaux William W Buzbee Robert L Glicksman Alyson C Flournoy Christopher H Schroeder Douglas T Kendall Susan George J B Ruhl Donald W Stever and Mary Jane Angelo *The Routledge Companion to Environmental Ethics* Benjamin Hale, Andrew Light, Lydia Lawhon, 2022-07-29 Written for a wide range of readers in environmental science philosophy and policy oriented programs The Routledge Companion to Environmental Ethics is a landmark comprehensive reference work in this interdisciplinary field Not merely a review of theoretical approaches to the ethics of the environment the Companion focuses on specific environmental problems and other concrete issues Its 65 chapters all appearing in print here for the first time have been organized into the following eleven parts I Animals II Land III Water IV Climate V Energy and Extraction VI Cities VII Agriculture VIII Environmental Transformation IX Policy Frameworks and Response Measures X Regulatory Tools XI Advocacy and Activism The volume not only explains the nuances of important core philosophical positions but also cuts new pathways for the integration of important ethical and policy issues into environmental philosophy It will be of immense help to undergraduate students and other readers coming up to the field for the first time but also serve as a valuable resource for more advanced students as well as researchers who need a trusted resource that also offers fresh policy centered approaches **Agricultural**

We Alone David Western, 2020-11-24 A thoughtful exploration of how humans have endangered the Earth but can pull it back from the brink as told by a renowned conservationist This personal and thoughtful book by renowned Kenya conservationist David Western traces our global conquest from Maasai herders battling droughts in Africa to the technological frontiers of California Western draws on a half century of research in the savannas and his own life s journey to argue that conservation is not a modern invention The success of all societies past and present lies in conservation practices breaking biological barriers and learning to live in large cooperative groups able to sustain a healthy environment Our ecological emancipation from nature enabled us to expand our horizons from conserving food and water for survival to saving whales elephants and our cultural heritage In the Anthropocene our scientific knowledge and modern sensibilities offer hope for combating global warming and creating a planet able to sustain the wealth of life but only if we use our unique cultural capacity of cooperation to plan our future **Against Extinction** William Mark Adams, 2013 Conservation in the 21st

century needs to be different and this book is a good indicator of why Bulletin of British Ecological Society Against Extinction tells the history of wildlife conservation from its roots in the 19th century through the foundation of the Society for the Preservation of the Wild Fauna of the Empire in London in 1903 to the huge and diverse international movement of the present day It vividly portrays conservation s legacy of big game hunting the battles for the establishment of national parks the global importance of species conservation and debates over the sustainable use of and trade in wildlife Bill Adams addresses the big questions and ideas that have driven conservation for the last 100 years How can the diversity of life be maintained as human demands on the Earth expand seemingly without limit How can preservation be reconciled with human rights and the development needs of the poor Is conservation something that can be imposed by a knowledgeable elite or is it something that should emerge naturally from people s free choices These have never been easy questions and they are as important in the 21st century as at any time in the past The author takes us on a lively historical journey in search of the answers
