Modi And The World: (Re) Constructing Indian Foreign Policy
Sinderpal Singh, 2017-02-16

Contrary to prior expectations, Narendra Modi has expended a significant amount of time, energy, and political capital in conducting India's engagement with the outside world since becoming Prime Minister in May 2014. In accordance with wider perceptions about Modi, there were expectations of significant if not radical change in Indian foreign policy under his charge. This sentiment led to a section of Indian strategists and foreign policy watchers conceiving the notion of a Modi Doctrine in Indian foreign policy. This notion of foreign policy doctrines is not new to the analysis of Indian foreign policy. Previous incarnations include the Indira Doctrine of the 1970s, the Gujral Doctrine for a brief period in the late 1990s, and the Manmohan Doctrine in the period before Modi was elected as prime minister. This edited volume attempts to interrogate the extent to which Indian foreign policy under Modi has undergone significant change and the extent to which this manifests itself as a new doctrine in Indian foreign policy. The individual chapters cover key bilateral relationships: the United States, China, Australia, and Pakistan, as well as broader regional relationships: South Asia and the Indian Ocean Region, and specific themes such as economic diplomacy.

Business Aspects of Web Services
Christof Weinhardt, Benjamin Blau, Tobias Conte, Lilia Filipova-Neumann, Thomas Meinel, Wibke Michalk, 2011-11-10

Driven by maturing Web service technologies and the wide acceptance of the service-oriented architecture paradigm, the software industry's traditional business models and strategies have begun to change. Software vendors are turning into service providers. In addition, in the Web service market, a multitude of small and highly specialized providers offer modular services of almost any kind, and economic value is created through the interplay of various distributed service providers that jointly contribute to form individualized and integrated solutions. This trend can be optimally catalyzed by universally accessible service orchestration platforms, service value networks (SVNs), which are the underlying organizational form of the coordination mechanisms presented in this book. Here, the authors focus on providing comprehensive business-oriented insights into today's trends and challenges that stem from the transition to a service-led economy. They investigate current and future Web service business models and provide a framework for Web service value networks. Pricing mechanism basics are introduced and applied to the specific area of SVNs. Strategies for platform providers are analyzed from the viewpoint of a single provider and so are pricing mechanisms in service value networks which are optimal from a network perspective. The extended concept of pricing Web service derivatives is also illustrated. The presentation concludes with a vision of how Web service markets in the future could be structured and what further developments can be expected to happen. This book will be of interest to researchers in business development and practitioners such as managers of SMEs in the service sector as well as computer scientists.
