Services And Uneven Development:

Services and Metropolitan Development Peter W. Daniels, 2002-11 Explores the processes guiding both the development and the spatial impacts of services on the urban system and individual areas and describes the internationalisation of services and the effects of re structuring on urban systems **Uneven Development in the Third World A.** Bhalla, 1996-11-26 The book defines uneven development in terms of development strategies and their outcomes Drawing on case studies from China and India three types of strategy are discussed heavy industrialisation sectoral regional balance and economic liberalisation Also three kinds of outcomes are examined growth of output and productivity income consumption and class inequalities in three spatial dimensions intra regional inter regional and rural urban Furthermore access to and utilisation of technology health and educational services are compared Consumer Services and Economic Development Colin C. Williams, 1997 Consumer Services and Economic Development evaluates the role of consumer services as motors for local economic development in contemporary advanced economies The contributions that specific consumer service industries are making to local economic development are analysed Tourism sports universities retailing and the cultural industries are each examined in turn Following this the roles that the consumer services sector are playing in economic regeneration are investigated in a number of different contexts a global city several contrasting urban areas and a rural locality In each case whether consumer services have taken a lead or supportive role in local economic development is surveyed and their effectiveness in promoting economic regeneration is evaluated This book dispels the common myth that consumer services are residual activities dependent upon other economic sectors for their vitality and viability Providing a comprehensive overview and evaluation of the contributions of the consumer services sector to economic development this book reveals the need for a fundamental reconceptualization of both the function of services in particular and economic development theory and practice more generally Service Industries in Regional Development William J. Coffey, James John McRae, 1989 This document presents a broad empirical picture of the national regional and urban structure of the Canadian economy It identifies the factors which may be causing the relative shift towards employment in service industries and occupations and shows that the lack of actual data on interregional flows of service outputs effectively precludes the empirical testing of regional general equilibrium models involving service industries It concludes by bringing forth the regional policy implications embedded in the conceptual and empirical work on service industries **Services and Economic Development in the Asia-Pacific** J.W. Harrington, 2016-04-01 Until the 1990s industrialization was the dominant development paradigm for the Asia Pacific region Since then advanced services finance business or producer services information and creative services have become deeply embedded in the processes of economic growth and change in the region This rapid tertiary expansion is fundamentally restructuring national and regional economies and urban form in line with the introduction of advanced production systems national modernization programmes and the globalization

strategies of governments Services are being actively deployed as instruments of metropolitan reconfiguration and land use change This book explores various aspects of the relationship between service industries and economic development in Japan South Korea China Taiwan Singapore India Australia and New Zealand It provides new sector oriented and regional and national perspectives on services and development **Service Worlds** John Bryson, Peter Daniels, Barney Warf, 2013-04-15

As the twenty first century begins significant changes are occurring in the way that services and goods are produced and consumed One of the key drivers of this change is information and communications technology ICT It has transformed the role of space and time in patterns of economic development in the rise of globalization and in the scale and structure of organizations ICT has therefore accelerated the process of continual change and evolution that is the hallmark of both the capitalist economy and of organizations Giving a student friendly account of the diversity of theoretical perspectives this outstanding book aids understanding the evolving economic geography of advanced capitalist economies A series of detailed firm and employees case studies from Europe North America and the Asia Pacific are used to inform useful theoretical case studies which also investigate the significance of increased blurring of the lines between services and manufacturing functions in the production and consumption process Divided Province Greg Albo, Bryan M. Evans, 2019-02-28

No government jurisdiction in Canada has so radically transformed its public policies over the past decades as Ontario and yet the province has also maintained a striking degree of political stability in its party system Since the 1990s neoliberalism has been the point of reference in constructing policy agendas for all of Ontario's political parties It has guided the strategy for governance of the dominant Liberal Party since 2003 even as it divides the province between workers and employers north and south rural and urban and racialized minorities and the majority population With a focus on the governments of Mike Harris Dalton McGuinty and Kathleen Wynne *Divided Province* brings together leading researchers to dissect the province's public policies since the 1990s Presenting original state of the art research the book demonstrates that although the Conservative government of Mike Harris implemented the sharpest and most profound shift towards the establishment of a neoliberal regime in the province the subsequent Liberal governments consolidated that neoliberal turn The essays in this volume explore the consequences of this ideological turn across a spectrum of policies including health education poverty energy employment manufacturing and how it has impacted workers women First Nations and other distinct communities The first book to offer a comprehensive critical account of neoliberalism in Ontario *Divided Province* overturns conventional readings of the province's politics and suggests that building a more democratic and egalitarian alternative to the current orthodoxy requires nothing less than a radical rupture from existing policies and political alliances Without such a decisive break political space may well open up again for the populist right *Services and the Knowledge-Based Economy* Mark Boden, Ian Miles, 2019-07-23
