Proceedings RMRS. , 1998 *Self-Serving Public Leadership and Governance* Obinna Ubani-Ebere, 2022-12-19 Leadership matters in everything Shared humanity is at risk of paralysis if the society lacks trustable transparent and accountable leadership for the well being of the society A nation is nothing but a perishable commodity if it lacks leadership foresight or vision and continually stands on a blind spot of political social and economic development Government is an asset if it has utility or values that impact citizens positively and improve their well

being or livelihood In contrast the government is a total liability or lacks utility or values if its actions impede unity progress and development or undermine citizens well being Greed is the common denominator of public corruption Moreover corruption is a consequence of self serving leadership and governance in African countries demolishing hopes aspirations and ingenuity Thus public corruption in African countries is the great conspiracy against innocent and poor citizens by the politicians elites and religious aristocrats causing obstacles to development Consequently there is a high possibility of political economic and social failures or marginalization of the poor when a nation s political governance is besieged by sit tight leadership syndrome self serving leaders greedy mindsets and corrupt leaders Here are the two critical questions Can African countries escape paralysis meltdowns or extreme poverty if the government is controlled by self serving public leaders who focus on themselves while ignoring the challenges of the larger society Can African countries survive the mediocrity of governance and frequent devastations due to the menace of religion tribalism and corruption in government public leadership and governance

Dean,2023-01-03 This book exposes a migration of business practices players and norms into philanthropy that strains the regulatory regime sustaining public trust in elite generosity through accountability and transparency and proposes legal reforms and private solutions to restore it Practices players and norms native to the business sector have migrated into philanthropy shattering longstanding barriers between commerce and charity Philanthropies organized as limited liability companies donor advised funds sponsored by

investment company giants and strategic corporate philanthropy programs aligning charitable giving by multinationals with their business objectives paint a startling new picture of elite giving In For Profit Philanthropy Dana Brakman Reiser and Steven A Dean reveal that philanthropy law has long operated as strategic compromise binding ordinary Americans and elites together in a common purpose At its center stands the private foundation The authors show how the foundation neatly combines donor autonomy with a regulatory framework to elevate the public s voice This framework compels foundations to spend a small but meaningful portion of the assets their elite donors have pledged to the public each year Prophylactic restrictions separate foundations from their funders business and political interests And foundations must disclose more about the sources and uses of their assets than any other business or charity The philanthropic innovations increasingly espoused by America s most privileged individuals and powerful companies prioritize donor autonomy and privacy casting aside the foundation and the tools it provides elites to demonstrate their good faith By threatening to displace impactful charity with hollow virtue signaling these actions also jeopardize the public s faith in the generosity of those at the top Private ordering targeted regulation or a new strategic bargain could strike a modern balance preserving the benefits of the compromise between the modest and the mighty For Profit Philanthropy offers a detailed roadmap to show how it can be accomplished
