that fueled its global expansion Finally the book examines the industrialization and mass commercialization of chocolate in the 19th and 20th centuries We explore the technological innovations that led to the creation of solid chocolate bars and other confectionery products the rise of iconic chocolate brands and the globalization of chocolate consumption The book will also critically analyze contemporary issues within the chocolate industry including fair trade practices sustainability concerns and the ongoing challenges faced by cocoa farmers in developing countries Drawing on historical documents anthropological studies and economic analyses this book offers a comprehensive and interdisciplinary account of chocolate s global trajectory The history of chocolate touches upon fields such as anthropology examining cultural practices economics analyzing trade and consumption patterns and environmental studies considering the impact of cocoa production on ecosystems Chocolate A Global History takes a non sensationalist fact based approach aiming to provide readers with a nuanced and historically grounded understanding of chocolate s intricate past and presents the material in a clear and engaging manner The target audience includes students of history food studies and anthropology as well as anyone curious about the rich and complex history behind this ubiquitous treat While the book strives for a comprehensive overview its scope is primarily focused on the historical and cultural dimensions of chocolate with less emphasis on the scientific aspects of cocoa cultivation and chocolate production Ultimately Chocolate A Global History encourages readers to consider the social economic and environmental implications of their everyday consumption habits prompting them to appreciate the complex web of human interactions that bring chocolate from the cocoa bean to the finished product The book acknowledges ongoing debates surrounding ethical sourcing and sustainable practices within the chocolate industry presenting diverse perspectives and encouraging critical engagement with these issues The History of Global Climate Governance Joveeta Gupta, 2014-02-06 What has happened globally on the climate change issue How have countries positions differed over time and why How are problems and politics developing on an increasingly globalised planet and can we find a solution This book explores these questions and more explaining the key underlying issues of the conflicts between international blocs The negotiation history is systematically presented in five phases demonstrating the evolution of decision making The book discusses the coalitions actors and potential role of the judiciary as well as human rights issues in addressing the climate change problem It argues for a methodical solution through global law and constitutionalism which could provide the quantum jump needed in addressing the problem of climate governance This fascinating and accessible account will be a key resource for policymakers and NGOs and also for researchers and graduate students in climate policy geopolitics climate change environmental policy and law and international relations The Tapestry of Time: An Expedition Through Western **History** Pasquale De Marco, 2025-03-17 Embark on an extraordinary journey through Western history in this captivating narrative that unveils the interconnectedness of human experiences across time and space From ancient civilizations to modern challenges this book takes you on an expedition that illuminates the past informs the present and inspires hope for

The Whole Economy Catriona Macleod, Alexandra Shepard, Maria Ågren, 2023-06-15 Advocating a gender inclusive approach to the history of work this book both counts and accounts for women s as well as men s economic activity

Showcasing novel conceptual methodological and empirical perspectives it highlights the transformative potential of including women s work in wider assessments of continuity and change in economic performance Focusing on the period of European history 1500 1800 that generated unprecedented growth in the northwest which in turn was linked to the global redistribution of resources and upon which industrialisation depended the book spans key arenas in which women produced change households care agriculture rural manufacture urban markets migration and war The analysis refutes the stubborn contention of mainstream economic history that we can generalise about economic performance by focusing solely on the work of adult men and demonstrates that women were active agents in the early modern economy rather than passively affected by changes wrought upon them Life Course, Work, and Labour in Global History Josef Ehmer, Carola Lentz, 2023-09-18 This multidisciplinary volume offers unique perspectives across the globe and throughout the centuries on the complexity of the nexus between work and the life course For industrialized regions from Germany and Western Europe to China and Japan it questions the widespread notion of an overall growing working life course instability since the 1970s For unindustrialized or industrializing regions from West Africa to state socialist East Central Europe as well as for transnational and transcontinental labour migrations it shows the enormous influence of the extended family and wider kin on individual pathways into and out of work For early modern Europe India and China and up to twentieth century state socialism and to current welfare states it stresses and concretizes the crucial impact of age and gender for both societal labour relations and individual work related decision making With all chapters based on original research the volume reflects a close cooperation between historians anthropologists and sociologists Its multidisciplinary approach finds expression in its methodological plurality reaching from archival research and sophisticated statistical analyses to biographical interviews and participant observation This mix allows to grasp the interaction between societal change and individual agency
