Archibald Motley Jr. and Racial Reinvention Phoebe Wolfskill, 2017-08-10 An essential African American artist of his era Archibald Motley Jr created paintings of black Chicago that aligned him with the revisionist aims of the New Negro Renaissance Yet Motley s approach to constructing a New Negro a dignified figure both accomplished and worthy of respect reflected the challenges faced by African American artists working on the project of racial reinvention and uplift Phoebe Wolfskill demonstrates how Motley s art embodied the tenuous nature of the Black Renaissance and the wide range of ideas that structured it Focusing on key works in Motley s oeuvre Wolfskill reveals the artist s complexity and the variety of influences that informed his work Motley s paintings suggest that the racist problematic image of the Old Negro was not a relic of the past but an influence that pervaded the Black Renaissance Exploring Motley in relation to works by notable black and non

black contemporaries Wolfskill reinterprets Motley's oeuvre as part of a broad effort to define American cultural identity through race class gender religion and regional affiliation

James McNeill Whistler and France Suzanne Singletary, 2016-11-18 James McNeill Whistler and France A Dialogue in Paint Poetry and Music is the first full length and in depth study to position this painter within the overall trajectory of French modernism during the second half of the nineteenth century and to view the artist as integral to the aesthetic projects of its most original contributors Suzanne M Singletary maintains that Whistler was in a unique situation as an insider within the emerging French avant garde thereby in an enviable position to both absorb and transform the innovations of others and that until now his widespread influence as a catalyst among his colleagues has been neither investigated nor appreciated Singletary contends that Whistler's importance rivals that of Manet whose multi layered and often unexpected interconnections with Whistler are the focus of one chapter In addition Whistler's pivotal role in linking the legacies of Baudelaire Delacroix Gautier Wagner and other mid century innovators to the later French Symbolists has previously been largely ignored Courbet Degas Monet and Seurat complete the roster of French artists whose dialogue with Whistler is highlighted

A Theory of the Tache in Nineteenth-Century Painting Stein Sj?ad, 2017-07-05 Without question the tache blot patch stain is a central and recurring motif in nineteenth century modernist painting Manet's and the Impressionists rejection of academic finish produced a surface where the strokes of paint were presented directly as patches or blots then indirectly as legible signs C nne Seurat and Signac painted exclusively with patches or dots Through a series of close readings this book looks at the tache as one of the most important features in nineteenth century modernism The tache is a potential meeting point between text and image and a pure trace of the artist's body Even though each manifestation of tacheism generates its own specific cultural effects this book represents the first time a scholar has looked at tacheism as a hidden continuum within modern art With a methodological framework drawn from the semiotics of text and image the author introduces a much needed fine tuning to the classic terms index symbol and icon The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition The sign crossing theory opens onto the whole terrain of interaction between visual art art criticism literature philosophy and psychology

Modern Art & the Remaking of Human Disposition
Emmelyn Butterfield-Rosen, 2021-11-09 How artists at the turn of the twentieth century broke with traditional ways of posing the bodies of human figures to reflect modern understandings of human consciousness With this book Emmelyn Butterfield Rosen brings a new formal and conceptual rubric to the study of turn of the century modernism transforming our understanding of the era s canonical works Butterfield Rosen analyzes a hitherto unexamined formal phenomenon in European art how artists departed from conventions for posing the human figure that had long been standard In the decades around 1900 artists working in different countries and across different media began to present human figures in strictly frontal lateral and dorsal postures The effect both archaic and modern broke with the centuries old tradition of rendering bodies in torsion with poses designed to simulate the human being s physical volume and capacity for autonomous thought and movement This formal departure destabilized prevailing visual codes for signifying the existence of the inner life of the human subject Exploring major works by Georges Seurat Gustav Klimt and the dancer and choreographer Vaslav Nijinsky replete with new archival discoveries *Modern Art and the Remaking of Human Disposition* combines intensive formal analysis with inquiries into the history of psychology and evolutionary biology In doing so it shows how modern understandings of human consciousness and the relation of mind to body were materialized in art through a new vocabulary of postures and poses
