Technology in American Education 1650-1900 Charnel Anderson, 1962 Bulletin United States. Office of Education, 1962 Trying Biology Adam R. Shapiro, 2013-05-21 In *Trying Biology* Adam R Shapiro convincingly dispels many conventional assumptions about the 1925 Scopes monkey trial Most view it as an event driven primarily by a conflict between science and religion Countering this Shapiro shows the importance of timing the Scopes trial occurred at a crucial moment in the history of biology textbook publishing education reform in Tennessee and progressive school reform across the country He places the trial in this broad context alongside American Protestant antievolution sentiment and in doing so sheds new light on the trial and the historical relationship of science and religion in America For the first time we see how religious objections to evolution became a prevailing concern to the American textbook industry even before the Scopes trial began Shapiro explores both the development of biology textbooks leading up to the trial and the ways in which the textbook industry created new books and presented them as responses to the trial Today the controversy continues over textbook warning labels making Shapiro's study particularly as it plays out in one of America's most famous trials an original contribution to a timely discussion **Schoolbook Nation** Joseph Moreau, 2010-02-22 A superior book Many readers will be surprised to see that today's arguments about history education follow the culture wars that go back to almost the beginning of the republic Moreau's writing is engaging with brilliant flashes of insight as well as balance and wit Gary B Nash Director of the National Center for History in the Schools Taking Frances FitzGerald's textbook study *America Revised* as a point of departure Joseph Moreau in *Schoolbook Nation* challenges FitzGerald's premise that the 1960s were the beginning of the end of the glory days of American history education Moreau recounts how in the late twentieth century cultural commentators such as historian Arthur Schlesinger Jr and politician Newt Gingrich preached that a new identity crisis had shaken American history in the sixties and that the grand unified view of our past had given way to various interest groups who dismantled the old national narrative while demanding a more inclusive curriculum for their children Moreau discovered however that American history while grand has never been unified Delving into more than 100 history books from the last 150 years the author reveals that the efforts of pressure groups to influence the history curriculum are nearly as old as the mustiest textbook For those who would influence textbooks and teaching Protestant elites in the 1870s Irish Americans in the 1920s and conservative politicians today the sky has always been falling according to Moreau *Schoolbook Nation* offers a history lesson of its own when the story of the past is written or rewritten truth is often a victim With its comprehensive treatment of the subjects of honesty and politics in the teaching of history this is an essential book on the side of truth in a complex debate *Textbooks in School and Society* Arthur Woodward, David L. Elliot, Kathleen Carter Nagel, 2013-08-21 Textbooks have been standard schoolroom fixtures for as long as most living citizens of this country can remember Many turn of the century students were introduced to reading through the moralistic McGuffey Readers and struggled through the

rather drab and colorless pages of volumes on history geography and civics In contrast today s textbooks contain not only narrative content accompanied by colorful photographs and graphics but also section and chapter exercises that are extended through the use of worksheets and other materials Moreover the textbook and its related student materials are packaged together with teacher s editions and tests in grade level sets that amount to content area programs rather than mere texts
