**Ending Medicine's Chronic Dysfunction** Lawrence L. Weed, Lincoln Weed, 2022-06-01 This book describes an overlooked solution to a long standing problem in health care The problem is an informational supply chain that is unnecessarily dependent on the minds of doctors for assembling patient data and medical knowledge in clinical decision making That supply chain function is more than the human mind can deliver Yet dependence on the mind is built into the traditional role of doctors who are educated and licensed to rely heavily on personal knowledge and judgment The culture of medicine has long been in denial of this problem even now that health information technology is increasingly used and even as artificial intelligence AI tools are emerging AI will play an important role but it is not a solution The solution instead begins with traditional software techniques designed to integrate novel functionality for clinical decision support and electronic health record EHR tools That functionality implements high standards of care for managing health information This book describes that functionality in some detail This description is intended in part to be a starting point for developers in the open source software community who have an opportunity to begin developing an integrated cloud based version of the tools described working with interested clinicians patients and others The tools grew out of work beginning more than six decades ago when this book's lead author deceased originated problem lists and structured notes in medical records The electronic tools he later developed led him to reconceive education and licensure for doctors and other health professionals which are also part of the solution this book describes

**The Fallacy of Mother's Wisdom** Michael Myslobodsky, 2004 Health psychology is an offer of help an effort to understand how biological behavioral and social factors influence health and illness Although its claim of a share of health care territory was never loud it has become one of the fast growing sub specialties it has now outstripped other divisions of psychology in terms of excitement in the public eye And yet a new occupation was built on somewhat unrealistic idealized assumptions the title of this book was therefore chosen to emphasize the fact that an extensive critique of those assumptions is missing Consequently there has never been a consensus as to what should be studied first what to include in and what should be omitted from the health psychology syllabus This book proposes arbitrary boundaries for a discourse on health psychology The array of subjects is based on two major themes the foundation of health psychology and the range of disorders where psychological knowledge might benefit the sick and the question of whether or not health psychology has a systematic and pragmatic structure so as to qualify as a profession

*Public Expectations and Physicians' Responsibilities* John Crellin, 2018-10-08 This guide for practice managers in a question and answer format explains accounting procedures and describes GMS health authority and other sources of income The book covers payroll pension personnel and complaints matters and advises on optimizing income for the practice

Modern Death Haider Warraich, 2017-02-07 There is no more universal truth in life than death No matter who you are it is certain that one day you will die but the mechanics and understanding of that experience will differ greatly in today's modern age Dr Haider Warraich is a young and brilliant new voice in the conversation about death and dying started by Dr Sherwin Nuland and Atul Gawande Dr Warraich takes a broader look at how we die today from the cellular level up to the very definition of death itself The most basic aspects of dying the whys wheres whens and hows are almost nothing like what they were mere decades ago Beyond its ecology epidemiology and economics the very ethos of death has changed Modern Death Dr Warraich's debut book will explore the rituals and language of dying that have developed in the last century and how modern technology has not only changed the hows whens and wheres of death but the what of death Delving into the vast body of research on the evolving nature of death Modern Death will provide readers with an enriched understanding of how death differs from the past what our ancestors got right and how trends and events have transformed this most final of human experiences

**A Journey** John S Campbell MD, 2006-06 All of us repeatedly grieve heal and reinvent ourselves throughout our lives Being aware of and active in this inherent aspect of our existence I believe to be a less painful and more satisfying way of living than blindly struggling with or resisting these natural processes John S Campbell M D author of A Journey Creative Grieving and Healing We all die he seems to be telling us What is far more important is that we live a meaningful life before that time comes We all need to dig deep to find our own wisdom so we may understand what John is telling us Nikki DeFrain M S and John DeFrain Ph D from their Foreword

On Loss and Losing Melvyn L. Fein, 2017-09-08 All people suffer instances of personal loss that cause distress All too often their discomfort is treated as a medical issue requiring treatment usually through medication Melvyn L Fein argues for a broader understanding of loss and losing that offers another approach which he characterizes as resocialization Indeed how a person thinks feels and acts may all need to be reorganized if personal distress is to be overcome Fein urges that we distinguish between the loss of something we once possessed and losing something that never came to fruition Thus it is possible never to achieve vital social roles social statuses and or personal bonds despite our individual efforts While some of these losses are not necessarily problematic others are extremely painful Unfortunately rather than investigate the source of this discomfort distraught individuals frequently seek refuge in simplistic solutions As a consequence one of the reasons the medical model remains dominant is that the alternative is imperfectly understood Fein presents a compelling case for a sociological interpretation of personal distress Although he acknowledges that some personal suffering derives from biological sources and that mental illnesses can spill over to cause social dysfunctions he argues that it is important to recognize the social causes of human suffering In thereby recognizing the limitations of the human condition most of us can do better than blindly accept an inherited dedication to the medical model On Loss and Losing offers a legitimate option without denying the reality of human suffering

**We Cry Out** John DeFrain PH D, John S. Campbell, Susan Dahl MS, 2006 How does a developmental disability affect an

individual throughout the course of life What impact does the disability have on the individual s family What strengths do families use to cope with these disabilities What do they do that works And what doesn t work These are the kinds of questions we have been asking individuals and families in our research over the past 15 years This book was written to report their stories and to honor these people who have shared their lives and their cries from the heart with us It is both a positive book and a realistic book full of love and grief and tenderness and anger and kindness and sorrow and courage It is as real as the people who gave us the gift of their lives
