Sewing Sculpture Charleen Kinser, 1977-01-01 **Sculpture and the Vitrine** John C. Welchman, 2017-07-05 Vitrines and glass cabinets are familiar apparatuses that have in large part defined modern modes of display and visibility both within and beyond the museum. They separate objects from their contexts, group them with other objects both similar and dissimilar, and often serve to reinforce their intrinsic or aesthetic values. The vitrine has much in common with the picture frame, the plinth, and the gallery, but it has not yet received the kind of detailed art historical and theoretical discussion that has been brought to these other modes of formal display. The twelve contributions to this volume examine some of the points of origin of the vitrine and the various relations it brokers with sculpture, first in the Wunderkammer and cabinet of curiosities and then in dialog with the development of glazed architecture beginning with Paxton's Crystal Palace, 1851. The collection offers close discussions of the role of the vitrine and shop window in the rise of commodity culture and their apposition with Constructivist design in the work of Frederick Kiesler, as well as original readings of the use of vitrines in Surrealism and Fluxus and in work by Joseph Beuys, Paul Thek, Claes Oldenburg, and his collaborators Jeff Koons, Mike Kelley, Dan Graham, Vito Acconci, Damien Hirst, and Josephine Meckseper, among others. Sculpture and the Vitrine also raises key questions about the nature and implications of vitrinous space, including its fronts onto desire and the spectacle, transparency and legibility, and onto ideas and practices associated with the archive, collecting, preserving, and ordering.

Handcrafts Barbara Brabec, 1982 **Art Lesson Handbook** Violet Working, Russell Working, 2013 This book was written as an aid for newly trained art teachers, art students in college, and home instruction teachers in planning, organizing, conducting, and evaluating instructional activities for elementary, middle, and senior high school students. Hobbyists might find this book beneficial in guiding them in actualizing their interests in art. Within the 282-page book are 63 individual lesson plans, along with 151 illustration pages. Chapter 27 focuses on the art of pre-school children. Student evaluation, art history, managing student behavior, obtaining art supplies, a high school course of study, art-related job opportunities, and reading recommendations are topical areas included in the appendices.
