Sex Differences and Similarities in Communication Daniel J. Canary, Kathryn Dindia, 2009-03-04 Sex Differences and Similarities in Communication offers a thorough exploration of sex differences in how men and women communicate set within the context of sex similarities offering a balanced examination of the topic The contents of this distinctive volume frame the conversation regarding the extent to which sex differences are found in social behavior and emphasize different theoretical perspectives on the topic Chapter contributors examine how sex differences and similarities can be seen in various verbal and nonverbal communicative behaviors across contexts and focus on communication behavior in romantic relationships The work included here represents recent research on the topic across various disciplines including communication social psychology sociology linguistics and organizational behavior by scholars well known for their work in this area In this second edition some chapters present new perspectives on sex gender and communication others present substantially revised versions of earlier chapters All chapters have a stronger theoretical orientation and are based on a wider range of empirical data than those in the first edition Readers in communication social psychology relationships and related fields will find much of interest in this second edition The volume will serve as a text for students in advanced coursework as well as a reference for practitioners interested in research based conclusions regarding sex differences in communicative behavior [Sex and Gender Differences in Personal Relationships](#) Daniel J. Canary, Tara M.

Emmers-Sommer, Sandra Faulkner, 1998-10-16 Challenging a commonly held assumption that men and women hail from different psychological and social planets this illuminating work reexamines what the empirical research really shows about how the sexes communicate in close relationships The volume demonstrates that stereotypical beliefs about men and women fail to predict their actual interaction behavior and highlights evidence of similarities as well as differences between the two groups Setting forth an integrative theory of gender differences the authors propose that communication behavior in different activities is the means by which sex and gender role expectations are created and sustained This volume is suitable for students scholars and researchers in communication social psychology marriage and family studies and gender studies as well as clinicians working with individuals couples and families **Explore the Concept of Gender and Explain the**

Roles of Different Forms of Communication Within Gender Marie Tolkemit, 2011-08 Essay from the year 2010 in the subject Gender Studies grade 1 7 University of Newcastle upon Tyne Communication and Culture language English abstract Lots of researchers define sex as a biological categorization classifying people as male or female based on their sex organs Basow 1992 Eckert Mc Connell Ginet 2003 and interpret gender as the social forming of the biological sex Eckert Mc Connell Ginet 2003 Butler agrees that gender is the cultural meaning of the sexed body but points out that the sexed body must not match with the biological sex What this means is that the category women can contain people with a male and a female body it is the same with the classification men For Butler sex or the sexed body is a cultural defined category of gender Butler

1990 There is lots of research in the field of gender differences in language use This essay looked at varieties between the genders in verbal and nonverbal communication with the aim to find out which variables characterize the language use of each gender In the field of talkativeness the researchers got opposite results therefore nothing can be said about which gender has a larger amount of the conversation Looking at the other points of comparison between the genders it could be detected that woman use more affiliative speech which includes the use of different stylistic devices to avoid making a clear statements Besides the observation of their visual behaviour showed that women use their view for orientation and as a source for information e g about their communication partner Furthermore they use eye contact for getting a feedback about their own behaviour from their communication partner feeling uncomfortable when they can t see their opposite In addition women are more involved use more expressions and feel easily embarrassed Overall these results indicate unambiguously that women have a submissive communication style Men on the contrary use affiliative sp

Different but Equal Kay Payne,2001-02-28 This study presents a theoretical and practical discussion of the changes that have occurred between men and women and how the sexes relate to one another from social political and ethical perspectives Not only do men and women reflect different gender roles through communication but they are also impacted by communication about gender especially from the media Gender differences in communication have gained political importance due to the increasingly relevant issues of sexual harassment and political correctness These social and political changes have influenced our value systems and have given the study of gendered communication an ethical importance Payne argues that religious ideology is an important aspect of gendered development and that biological psychological social and cultural phenomena also affect sex roles This volume will appeal to scholars and students in the communications disciplines as well as psychologists and sociologists Organized around three major themes the construction of the gendered self the differences between men and women as they relate to one another through language power and nonverbal communication and the effects of gendered communication in leadership and the media this work covers much ground on the topic of communication between the sexes

Gender Differences in Congressional Speeches Dragana Lenard, 2023-11-25 This book studies gender differences in language used in the 113th United States Congress January 2013 January 2015 The corpus was composed of all uninterrupted speeches of 100 words or more which amounted to 672 speeches by the female and 2 983 by the male politicians The speeches were analysed to determine language categories used by the politicians including word count grammatical categories different topics and punctuation categories to study the differences in language use by the male and the female politicians They were also used in examining some intragroup differences and correlations between variables

Several major gender differences emerged. The female politicians were shown to be more formal, critical, and task focused, while the male politicians were more socially oriented and elaborative, occupying the floor more than the female politicians. While the female politicians worked on establishing themselves as independent politicians, the male politicians embraced their collective identities. Also, the female politicians focused on raising the awareness of different health issues and providing support for patients and their families, while the male politicians focused on the consequences and possible solutions to the problems. The analysis includes implications for political discourse and gender disparities within that discourse and will be of interest to researchers in both politics and political science and in gender and diversity. **Praeger Guide to the**

Psychology of Gender Michele A. Paludi, 2004-11-30. When we examine the field of gender psychology closely, we note that much of what the popular media tells us about women and men does not hold up to research scrutiny. This handbook helps to replace media stereotypes and myths with realities and shows us that there are more similarities between the sexes than differences. The contributors to this handbook have a highly practical and readable approach that will prompt readers to examine their self-awareness and social tolerance to biases against women and men in our social institutions such as schools and workplaces. They also reveal that the increased participation in courses and reading of literature on gender has improved gender role attitudes and behavior, causing both sexes to treat each other with more respect and dignity. The contributors to this volume focus on gender role development and multicultural issues throughout the lifecycle. They also emphasize the empowerment of both sexes. The gender-related topics in this handbook include: Teacher socialization of girls and boys; Women's and men's verbal and nonverbal communication skills; Women's and men's voting patterns; Sexual violence; The gender wage gap; Women's and men's friendships and sexual relationships; Parents' communication of masculinity and femininity to their children. *Men and Women in Interaction* Elizabeth Aries, 1996-02-29. For many years, the dominant focus in gender relations has been the differences between men and women. Authors such as Deborah Tannen, *You Just Don't Understand*, and John Gray, *Men are from Mars, Women are from Venus*, have argued that there are deep-seated and enduring differences between male and female personalities, styles, even languages. Elizabeth Aries sees the issue as more complex and dependent on several variables among them: the person's status, role, goals, conversational partners, and the characteristics of the situational context. Aries discusses why we emphasize the differences between the sexes, the ways in which these are exaggerated, and how we may be perpetuating the very stereotypes we wish to abandon. For psychologists and researchers of gender and communication, this book will illuminate recent studies in gender relations. For general readers, it will offer a stimulating counterpoint to prevailing views.
