Sex And Gender In Paleopathological Perspective:

Sex and Gender in Paleopathological Perspective Anne L. Grauer, Patricia Stuart-Macadam, 1998-12-10 This book explores ramifications of sex and gender on ancient and modern human diseases Exploring Sex and Gender in Bioarchaeology Sabrina C. Agarwal, Julie K. Wesp, 2017-04-01 This volume brings together the latest approaches in bioarchaeology in the study of sex and gender Archaeologists have long used skeletal remains to identify gender Contemporary bioarchaeologists however have begun to challenge the theoretical and methodological basis for sex assignment from the skeleton Simultaneously they have started to consider the cultural construction of the gendered body and gender roles recognizing the body as uniquely fashioned from the interaction of biological social and environmental factors As the contributors to this volume reveal combining skeletal data with contextual information can provide a richer understanding of life in the past **The Oxford Handbook of Women and Gender in Medieval Europe** Judith M. Bennett, Ruth Mazo Karras, 2013-08-22 Provides a comprehensive overview of the gender rules encountered in Europe in the period between approximately 500 and 1500 C E **Medical Pluralism in the Andes** Joan Koss-Chiino, Thomas L. Leatherman, Christine Greenway, 2003 Capturing the intricacies of health practice within the fascinating context of Andean social history cultural tradition community and folklore this is a remarkable and intimate chronicle of Andean culture and everyday life **Archaeology** Mark Q Sutton, 2015-07-17 Illuminating the world of archaeology Archaeology conveys the excitement of archaeological discovery and explains how archaeologists think as they scientifically find analyze and interpret evidence The main objective of this text is to provide an introduction to the broad and fascinating world of archaeology from the scientific perspective Discussions on the theoretical aspects of archaeology as well as the practical applications of what is learned about the past have been updated and expanded upon in this fourth edition Learning Goals Upon completing this book readers will be able to Discuss the theoretical aspects of archaeology Apply what has been learned about the past Identify the various perspectives archaeologists have **Paleonutrition** Mark Q. Sutton, Kristin D. Sobolik, Jill K. Gardner, 2010-04-15 Urgeschichte Ern hrung Nahrung Anthropologie Methode Theorie Ethnoarch ologie Social Bioarchaeology Sabrina C. Agarwal, Bonnie A. Glencross, 2011-02-14 Illustrates new methodological directions in analyzing human social and biological variation Offers a wide array of research on past populations around the globe Explains the central features of bioarchaeological research by key researchers and established experts around the world *Human Biologists in the Archives* D. Ann Herring, Alan C. Swedlund, 2002-12-05 Many physical anthropologists study populations using data that come primarily from the historical record For this volume s authors the classic anthropological field is not the glamour of an exotic locale but the sometimes tedium of the dusty back rooms of libraries archives and museum collections This book tells of the way in which archival data inform anthropological questions about human biology and health The authors present a diverse array of human biological evidence from a variety of sources including the archaeological record

medical collections church records contemporary health and growth data and genetic information from the descendants of historical populations The papers demonstrate how the analysis of historical documents expands the horizons of research in human biology extends the longitudinal analysis of microevolutionary and social processes into the present and enhances our understanding of the human condition The Bioarchaeology of Urbanization Tracy K. Betsinger, Sharon N.

DeWitte, 2020-11-05 Urbanization has long been a focus of bioarchaeological research but what is missing from the literature is an exploration of the geographic and temporal range of human biological demographic and sociocultural responses to this major shift in settlement pattern Urbanization is characterized by increased population size and density and is frequently assumed to produce negative biological effects However the relationship between urbanization and human health requires careful examination given the heterogeneity that exists within and between urban contexts Studies of contemporary urbanization have found both positive and negative outcomes which likely have parallels in past human societies This volume is unique as there is no current bioarchaeological book addressing urbanization despite various studies of urbanization having been conducted Collectively this volume provides a more holistic understanding of the relationships between urbanization and various aspects of human population health The insight gained from this volume will provide not only a better understanding of urbanization in our past but it will also have potential implications for those studying urbanization in contemporary communities **Bioarchaeology of East Asia** Kate Pechenkina, Marc Oxenham, 2025-04-01 A collection of research on migration diet and health in the past across a culturally complex region Bioarchaeology of East Asia integrates studies on migration diet and diverse aspects of health through the study of human skeletal collections in a region that developed varying forms of agriculture East Asia's complex population movements and cultural practices provide biological markers that allow for the testing of multiple hypotheses about interactions in past communities Exploring the interplay between humans and their environments this volume considers millet agriculture mobile pastoralism with limited cereal farming and rice farming in combination with reliance on marine resources Many of these rare subsistence strategies are more or less exclusive to East Asia These advanced contributions will significantly boost collaborative work among bioarchaeologists and other scientists working in the region A volume in the series Bioarchaeological Interpretations of the Human Past Local Regional and Global Perspectives edited by Clark Spencer Larsen A Companion to Roman Britain

Malcolm Todd, 2008-04-15 This major survey of the history and culture of Roman Britain spans the period from the first century BC to the fifth century AD Major survey of the history and culture of Roman Britain Brings together specialists to provide an overview of recent debates about this period Exceptionally broad coverage embracing political economic cultural and religious life Focuses on changes in Roman Britain from the first century BC to the fifth century AD Includes pioneering studies of the human population and animal resources of the island **Technique and Application in Dental**

Anthropology Joel D. Irish, Greg C. Nelson, 2008-02-07 Bringing together a variety of accomplished dental researchers this

book covers a range of topics germane to the study of human and other primate teeth. The chapters encompass work on individuals to samples ranging from prehistoric to modern times. The focus throughout the book is the methodology required for the study of modern dental anthropology comprising the scientific methods in use today ranging from simple observation to advanced computer based analyses which can be utilized by the reader in their own dental research. Originating from the 20th anniversary meeting of the Dental Anthropology Association this is a valuable reference source for graduate students, academic researchers and professionals in the social and life sciences as well as clinicians.

Forensic Science and Humanitarian Action Roberto C. Parra, Sara C. Zapico, Douglas H. Ubelaker, 2020-01-28. Widens traditional concepts of forensic science to include humanitarian social and cultural aspects. Using the preservation of the dignity of the deceased as its foundation, *Forensic Science and Humanitarian Action: Interacting with the Dead and the Living* is a unique examination of the applications of humanitarian forensic science. Spanning two comprehensive volumes, the text is sufficiently detailed for forensic practitioners yet accessible enough for non-specialists and discusses both the latest technologies and real world interactions. Arranged into five sections, this book addresses the management of the dead across five major areas in humanitarian forensic science. Volume One presents the first three of these areas: History, Theory, Practice and Legal Foundation. Basic Forensic Information to Trace Missing Persons and Stable Isotopes. Forensics Topics covered include Protection of The Missing and the Dead Under International Law, Social, Cultural and Religious Factors in Humanitarian Forensic Science, Posthumous Dignity and the Importance in Returning Remains of the Deceased, The New Disappeared Migration and Forensic Science, Stable Isotope Analysis in Forensic Anthropology. Volume Two covers two further areas of interest: DNA Analysis and the Forensic Identification Process. It concludes with a comprehensive set of case studies focused on identifying the deceased and finding missing persons from around the globe including Forensic Human Identification from an Australian Perspective, Skeletal Remains and Identification Processing at the FBI, Migrant Deaths along the Texas-Mexico Border, Humanitarian Work in Cyprus by The Committee on Missing Persons, CMP, Volc n De Fuego Eruption, Natural Disaster Response from Guatemala. Drawing upon a wide range of contributions from respected academics working in the field, *Forensic Science and Humanitarian Action* is a unique reference for forensic practitioners, communities of humanitarian workers, human rights defenders and government and non-governmental officials.

The Body as Material Culture Joanna R. Sofaer, 2006-02-16. Bodies intrigue us. They promise windows into the past that other archaeological finds cannot by bringing us literally face to face with history. Yet the body is also highly contested. Archaeological bodies are studied through two contrasting perspectives that sit on different sides of a disciplinary divide. On one hand lie science based osteoarchaeological approaches. On the other lie understandings derived from recent developments in social theory that increasingly view the body as a social construction. Through a close examination of disciplinary practice, Joanna Sofaer highlights the tensions and possibilities offered by one particular kind of archaeological body: the human skeleton, with particular regard to the study of

gender and age Using a range of examples she argues for reassessment of the role of the skeletal body in archaeological practice and develops a theoretical framework for bioarchaeology based on the materiality and historicity of human remains

Bioarchaeology and Dietary Reconstruction across Late Antiquity and the Middle Ages in Tuscany, Central Italy Giulia Riccomi, 2021-04-01 This volume presents the first multidisciplinary bioarchaeological analysis to reconstruct life conditions in ancient Tuscany between Late Antiquity and the Middle Ages This was done through the examination of stress markers including adult stature periosteal reaction cranial porosities linear enamel hypoplasia and paleodietary reconstruction

Bodies and Lives in Ancient America Debra L. Martin, Anna J. Osterholtz, 2015-10-30 Bodies and Lives in Ancient America offers a broad overview of what it was like to live and die throughout North America before European contact Using a unique life history approach the book moves from pregnancy and birth through to senescence Drawing on biological data gathered from human remains as well as cultural and environmental data derived from archaeological investigations the authors provide students with a wealth of information on health and other aspects of life that leave changes on the skeletal system Rich case studies throughout demonstrate the temporal cultural and environmental variability across the continent prior to colonial times The authors also examine how different groups faced a variety of challenges in their lives including climate change and violence and the effects this had on their health The book concludes by considering the relevance of what ancient bones reveal for people today Written in an engaging style with complex paleopathology data synthesized and clearly presented Bodies and Lives in Ancient America is an accessible introduction to the state of health across prehistoric North America

Life and Death in the Gombe Chimpanzees Claire A. Kirchhoff, 2019-06-29 This book addresses how skeletons can inform us about behavior by describing skeletal lesions in the Gombe chimpanzees relating them to known life histories whenever possible and analyzing demographic patterns in the sample This is of particular interest to both primatologists and skeletal analysts who have benefited from published data on a smaller earlier skeletal sample from Gombe The Gombe skeletal collection is the largest collection of wild chimpanzees with known life histories in existence and this work significantly expands the skeletal sample from this long term research site 49 chimpanzees The book explores topics of general interest to skeletal analysts such as demographic patterns which injuries leave signs on the skeleton and rates of healing and discusses both qualitative and quantitative analysis of the patterning of lesions The book presents the data in a narrative style similar to that employed in Dr Goodall's seminal work The Chimpanzees of Gombe Readers already familiar with the Gombe chimpanzees are likely to appreciate summaries of life events correlated to observable skeletal features The book is especially relevant at this time to remind primate conservationists of the importance of the isolated chimpanzee population at Gombe National Park as well as the availability of the skeletons for study both within the park itself as well as at the University of Minnesota

The Backbone of Europe Richard H. Steckel, Clark Spencer Larsen, Charlotte A. Roberts, Joerg Baten, 2019 Represents the largest recorded dataset based on human skeletal remains

from archaeological sites across the continent of Europe

The Routledge Handbook of Feminist Anthropology Pamela L. Geller, 2024-12-23 *The Routledge Handbook of Feminist Anthropology* is a comprehensive inter and intradisciplinary survey of the field of feminist anthropology. It has at its core a focus on raising consciousness and communicating information about gender inequities, suffering and precarity, as well as furthering a praxis informed by intersectionality, decolonial intent and compassion. Divided into three clear parts and comprising 34 chapters by an international team of contributors, the Handbook addresses topics in the following key areas: resisting violence, communicating creatively, labor migration and displacement, health and disease, reproduction, intersectionality, decolonial work. The collection assesses the field at an interesting moment in time, one defined by social justice and populist movements gone global, once and future pandemics, extreme environmental disasters and neoliberalism interrupted. How do gender, sex and sexuality intersect with these phenomena? In answer, contributors to this volume put a heterogeneous anthropological approach in place; they advance interdisciplinary conversations as well as renew a commitment to intradisciplinary dialogue. *The Routledge Handbook of Feminist Anthropology* is essential reading for students, researchers and instructors in anthropology and will also be of interest to those in related disciplines such as gender studies, queer studies, economics, biomedicine, political science, sociology, geography and science and technology studies.

A Companion to Paleopathology Anne L. Grauer, 2016-01-19 *A Companion to Paleopathology* offers a comprehensive overview of this rapidly growing sub-field of physical anthropology. Presents a broad overview of the field of paleopathology, integrating theoretical and methodological approaches to understand biological and disease processes throughout human history. Demonstrates how paleopathology sheds light on the past through the analysis of human and non-human skeletal materials, mummified remains and preserved tissue. Integrates scientific advances in multiple fields that contribute to the understanding of ancient and historic diseases such as epidemiology, histology, radiology, parasitology, dentistry and molecular biology, as well as archaeological, archival and historical research. Highlights cultural processes that have an impact on the evolution of illness, death and dying in human populations, including subsistence strategies, human environmental adaptations, the effects of malnutrition, differential access to resources and interpersonal and intercultural violence.
