The Other Half of Gender Ian Bannon, Maria Correia, 2006-01-01 This book is an attempt to bring the gender and development debate full circle from a much needed focus on empowering women to a more comprehensive gender framework that considers gender as a system that affects both women and men The chapters in this book explore definitions of masculinity and male identities in a variety of social contexts drawing from experiences in Latin America the Caribbean and sub Saharan Africa It draws on a slowly emerging realization that attaining the vision of gender equality will be difficult if not impossible without changing the ways in which masculinities are defined and acted upon Although changing male gender norms will be a difficult and slow process we must begin by understanding how versions of masculinities are defined and acted upon One Blood Elisa Janine Sobo, 1993-07-01 One Blood offers a wealth of ethnographic material skillfully using traditional Jamaican images and expressions to present a coherent and systematic depiction of the Jamaican body of how it works and of how health is maintained Sobo explains some of the more complex issues of medical anthropology in a

clear and accessible fashion and shows how gender and kinship tensions are expressed through culturally constructed syndromes The book explores the ways in which the body serves as a medium for the expression of ideas about the social and moral order Childhood socializations and ideas about gender relations kinship social obligations sorcery and deceit are investigated in association with beliefs about nutrition procreation sexuality cleanliness bodily flow and sickness
