Turner, 2014-08-01 The year of 1980 marked a pivotal turning point in the American political landscape the electoral victory of presidential candidate Ronald Reagan the beginnings of the public hysteria and eventual legislative dismantling of affirmative action and other civil rights initiatives the dawn of the ruthless reign of neo conservatism and in some ways serving as the glue the ascent of neo liberalism as the prevailing ideology and standard logic of viewing and ordering the world Some thirty five years later it is almost difficult to remember a world and more precisely a moment in United States history when these things were not so dominant When thinking about the lasting impact of that moment David Harvey writes Future historians may well look upon the years 1978 1980 as a revolutionary turning point in the world s social and economic history revolutionary impulses seemingly spread and reverberated to remake the world around us in a totally different image In short this was an instance of profound transformation it was the dawn of the counterrevolution By no means immune to the changes in the larger political landscape Black activists and intellectuals also felt the ground moving beneath their feet in 1980 as many would gradually shift from an all out advance towards liberation to a posture concerned with what James Turner described as the preservation of the modest gains made by African Americans over the last decade The previous decade witnessed an obvious waning in the Black liberation movement a slew of high profile manhunts arrests court cases and outright criminalizing of radical activists the unearthing of Cointelpro the blooming of the liberation movement in Southern Africa a taxing debate around various articulations of Marxism and Black nationalism the full swing of feminism and a full decade of Africana Studies which also meant institutionalized space to foster such discussions It was these changing times that provided the context for the important gathering of Black activists and intellectuals in Ithaca New York during September 1980 at the Africana Studies and Research Center at Cornell and the content for this book Bound together by the dual purposes of both assessing the road traveled and preparing for the journey ahead the ensemble in attendance gathered to ponder the Next Decade as the conference theme spelled out plainly A quick glance at the conference s list of attendees demonstrates the extraordinary sphere of activity that was the Africana Studies and Research Center at Cornell Participants and attendees at this historic meeting included Toni Cade Bambara Lerone Bennett Johnella Butler John Henrik Clarke Gayla Cook Louis Farrakhan Hoyt Fuller Ewart Guinier Vincent Harding Robert Harris Stephen Henderson Robert Johnson George Kent George Lamming Tilden Lemelle Bernard Magubane Manning Marable William Nelson William Sales Michael Thelwell Bettye Collier Thomas Eleanor Traylor Ivan Van Sertima Ronald Walters Shirley Weber Sylvia Wynter Howard Dodson William Strickland and two of the visual artists featured in this book David Bradford and Bertrand Phillips This book is both a contribution to the historiography of the Black African Studies movement and an intellectual treasure representing the ideas and visions of many of the best minds at a crucial juncture in the African world **Book Prices** Edward N. The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater

number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential **Literary New Orleans** Judy Long,1999 An anthology of fiction and nonfiction about New Orleans **The Dictionary Catalog of the Vivian G.
