Discoveries: Francis Bacon Christophe Domino, 1997-02 Francis Bacon perhaps the last of the great painters of the human figure portrayed the world as a place of theatrical drama in which the body took center stage sensuous and terrible A lifelong student of color form and brushwork he created an art at once classical and modern ordered and chaotic in which human emotions and passions are imbedded within the harsh realities of the flesh Who was Bacon What in his life gave rise to his grand guignol vision of the world Through photographs interviews the artist s own statements and a multitude of paintings including six gatefolds this book offers a rich portrait of a modern master *Francis Bacon* Bernard

Blistene, 2020-01-14 A radically new perspective on Francis Bacon s art analyzing the ways in which literature inspired the artist s work Published to accompany a major Francis Bacon retrospective in Paris which will travel to the Fine Arts Museum Houston Francis Bacon analyzes Bacon s works from 1971 onward in light of his relationship to literature Bacon always vigorously opposed overanalysis of his paintings preferring to interpret them in purely illustrative or symbolic terms he admitted however that literature was a powerful stimulus to his imagination The artist was inspired by the images conjured up by certain texts Aeschylus s phrase the reek of human blood smiles out at me particularly haunted Bacon while his 1978 work *Painting* refers to T S Eliot s seminal poem *The Waste Land* An inventory of Bacon s personal library has identified more than 1 300 books ranging from Georges Bataille and Joseph Conrad to Friedrich Nietzsche and Michel Leiris Including twelve of Bacon s renowned triptychs this lavish publication features eleven gatefolds and some sixty paintings created by Bacon between 1971 and his death in 1992 Reproduced here with analyses of Bacon s paintings in the light of some of his most admired authors these specially commissioned texts reveal new ways of understanding some of the most powerful works in the modern canon *Serial Images* Jennifer Dyer, Jennifer Dyer Harnish, 2011 This book argues that in the works of Degas Mondrian Bacon Schiele and Warhol serial iteration articulates a process of free constructive becoming which they interpret in different ways Not only does the serially iterative structure of the images show that activity and novelty are primary concerns but it involves the viewer in the activity presented in the images For these reasons serial iteration is fundamentally connected both to modernist aspects of the work and to other concerns such as the structure of subjectivity and the movement of history Serially iterative structure opens up the meaning of these five artists images by relating them to concerns in contemporary art and thought
