Realism And Anti Realism In The Philosophy Of Science Beijing International Conference 199:

Global Epistemologies and Philosophies of Science David Ludwig, Inkeri Koskinen, Zinhle Mncube, Luana Poliseli, Luis Reyes-Galindo, 2021-07-29 In bringing together a global community of philosophers *Global Epistemologies and Philosophies of Science* develops novel perspectives on epistemology and philosophy of science by demonstrating how frameworks from academic philosophy e.g. standpoint theory, social epistemology, feminist philosophy of science and related fields e.g. decolonial studies, transdisciplinarity, global history of science can contribute to critical engagement with global dimensions of knowledge and science. Global challenges such as climate change, food production and infectious diseases raise complex questions about scientific knowledge production and its interactions with local knowledge systems and social realities. As academic philosophy provides relatively little reflection on global negotiations of knowledge, many pressing scientific and societal issues remain disconnected from core debates in epistemology and philosophy of science. This book is an invitation to broaden agendas of academic philosophy by presenting epistemology and philosophy of science as globally engaged fields that address heterogeneous forms of knowledge production and their interactions with local livelihoods, practices and worldviews. This integrative ambition makes the book equally relevant for philosophers and interdisciplinary scholars who are concerned with methodological and political challenges at the intersection of science and society.

The Vienna Circle and Religion Esther Ramharter, 2022-03-08 This book is the first systematic and historical account of the Vienna Circle that deals with the relation of logical empiricists with religion as well as theology. Given the standard image of the Vienna Circle as a strong anti-metaphysical group and non-religious philosophical and intellectual movement, this book draws a surprising conclusion: namely that several members of the famous Moritz Schlick Circle e.g. the left wing with Rudolf Carnap, Otto Neurath, Philipp Frank, Edgar Zilsel, but also Schlick himself, dealt with the dualisms of faith, belief and knowledge, religion and science, despite or because of their non-cognitivist commitment to the values of Enlightenment. One remarkable exception was the philosopher and Rabbi Joseph Schachter who wrote explicitly on religion and philosophy after the linguistic turn. The book also covers another puzzling figure, the famous logician Kurt Gödel, who wrote on theology and the ontological proof of God in his so far unpublished notebooks. The book opens up new perspectives on the Vienna Circle with its internal philosophical and political pluralism and is of value to philosophers, historians and anybody who is interested in the relation between science and religion.

Constructivism and the Metaphysics of Qualitative Research John Paley, 2024-09-30 This book challenges the widespread assumption that a necessary preliminary to qualitative research is the formulation of ontological and epistemological beliefs. It argues that the metaphysical claims which supposedly underpin different approaches to social research do not make sense. Literally. Sentences such as 'There is a single objective reality' and 'There are multiple constructed realities' fail to make information-providing statements. They do not refer or describe. Despite appearances, they say nothing about reality or realities at a fundamental level, so they cannot be used to justify ground or

align with methodological decisions The necessary preliminary turns out not to be necessary at all and we can dispense with not just paradigms but metaphysical underpinnings in general whether structured as paradigms or not Drawing on Wittgenstein's later philosophy Carnap's metametaphysics and contemporary linguistics the book suggests that the metaphysical claims of qualitative texts can be reinterpreted as performative Ontological and epistemological beliefs are resolutions and proposals recommendations for the use of language They form part of a creed by means of which researchers enact the joining of an academic community Written in Paley's trademark clear accessible and conversational style the book points to a revolution in our understanding of the relation between metaphysics and social research It will be essential reading for anyone interested in qualitative research and its philosophical foundations

philosophy **Critical Scientific Realism** Ilkka Niiniluoto, 1999-12-09 Ilkka Niiniluoto comes to the rescue of scientific realism showing that reports of its death have been greatly exaggerated Philosophical realism holds that the aim of a particular discourse is to make true statements about its subject matter Niiniluoto surveys the different varieties of realism in ontology semantics epistemology theory construction and methodology He then sets out his own original version and defends it against competing theories in the philosophy of science Niiniluoto's critical scientific realism is founded upon the notion of truth as correspondence between language and reality and characterizes scientific progress in terms of increasing truthlikeness This makes it possible not only to take seriously but also to make precise the troublesome idea that scientific theories typically are false but nevertheless close to the truth **Realism and Anti-Realism** Stuart Brock, Edwin Mares, 2007-01-01 Stuart Brock and Edwin Mares offer a clear introduction to different realist and anti realist positions and arguments in five key domains science ethics mathematics modality and fictional objects Realism and Anti Realism focuses on the core concept of realism taking the perspective that for each domain considered there are facts or entities distinctive to that domain whose existence and nature is in some important sense objective and mind independent For each of the five areas the authors examine the various styles of argument in support of and against realism and anti realism showing how different positions and arguments arise evaluating their success and drawing some general conclusions about the assorted strategies They provide in depth explorations of error theory fictionalism non cognitivism relativism and response dependence which they consider to be the most important positions in opposition to realism
