Reasonable Rationing International Experience Of Priority Setting In Health Care:

EBOOK: Reasonable Rationing Chris Ham, Robert Glenn, 2003-05-16 Reasonable Rationing is must reading for those interested in how to connect theory about fair rationing processes to country level practices The five case studies reveal a deep tension between political pressures to accomodate interest group demands and ethically motivated efforts to improve both information and institutional procedures for setting fair limits to care The authors frame the issues insightfully Professor Norman Daniels Harvard School of Public Health How are different countries setting priorities for health care What role does information and evidence on cost and effectiveness play How are institutions contributing to priority setting What are the lessons for policy makers Priority setting in health care is an issue of increasing importance Choices about the use of health care budgets are inescapable and difficult A number of countries have sought to strengthen their approach to priority setting by drawing on research based evidence on the cost and effectiveness of different treatments This book brings together leading experts in the field to summarize and analyse the experience of priority setting in five countries Canada The Netherlands New Zealand Norway and the United Kingdom Drawing on literature from a range of disciplines it makes a significant contribution to the debate on the role of information and institutions in priority setting Reasonable Rationing has been written with a broad readership in mind It will be of interest to policy makers health care professionals and health service managers as well as students of health and social policy at advanced undergraduate and postgraduate levels

Reasonable Rationing Ham, Chris, Glenn, Robert, 2003-05-01 Health care rationing is a reality in much of the world and priority setting is an issue of increasing importance Choices about the use of health care budgets are inescapable and difficult This study look at priority setting in the health services of several countries **Rationing in Health Care** Iestyn Williams, Helen Dickinson, Suzanne Robinson, 2012 A clearly written and well structured textbook providing an introduction to decision making and priority setting this title brings together theories practice and evidence from a wide range of disciplines

Trust Matters in Health Care Michael Calnan, Rosemary Rowe, 2008-08-16 Does trust still matter in health care and who does it matter to Have trust relations changed in the New NHS What does trust mean to patients clinicians and managers In the NHS trust has traditionally played an important part in the relationships between its three key actors the state health care practitioners and patients However in recent years the environments in which these relationships operate have been subject to considerable change as the NHS has been modernised Patients are now expected to play a more active role both in self managing their illness and in choice of care provider and clinicians are expected to work in teams and in partnership with managers This unique book explores the importance of trust how it is lost and won and the extent to which trust relationships in health care may have changed The book combines theoretical and empirical analysis while also examining the role of policy Calnan and Rowe analyse data collected from interviews with patients health care professionals and managers in primary care and acute care settings Among the issues covered are The importance of trust to their

relationships What constitutes high and low trust behaviour The changing nature of trust relations between patients clinicians and managers How trust can be built and sustained How interpersonal trust affects institutional trust Trust Matters in Health Care is key reading for policy makers health care professionals and managers in the public and private sector and a useful resource for educators and students within health and social care and management studies

Cultures For Performance In Health Care Mannion, Russell, Davies, Huw, Marshall, Martin, 2004-10-01 What is organizational culture Do organizational cultures influence the performance of health care organizations Are organizational cultures capable of being managed to beneficial effect Recent legislation in the United Kingdom has led to significant reforms within the health care system Clinical quality safety and performance have been the focus for improvement alongside systematic changes involving decision making power being devolved to patients and frontline staff However as this book shows improvements in performance are intrinsically linked to cultural changes within health care settings Using theories from a wide range of disciplines including economics management and organization studies policy studies and the health sciences this book sets out definitions of cultures and performance in particular the specific characteristics that help or hinder performance Case studies of high and low performing hospital trusts and primary care trusts are used to explore the links between culture and performance These studies provide examples of strategies to create beneficial high performance cultures that may be used by other managers Moreover implications for future policies and research are outlined Cultures for Performance in Health Care is essential reading for those with an interest in health care management and health policy including students researchers policy makers and health care professionals

Prioritization in Medicine Eckhard Nagel, Michael Lauerer, 2015-10-30 The gap between a rising demand for health care services on the one side and scarce resources on the other is leading to a growing pressure on decision making processes Hence prioritization in medicine has become an increasingly important issue for assuring stability of health systems and improving the capability of health care The present volume addresses normative dimensions of methodological and theoretical approaches the legal basis behind priority setting as well as international experiences concerning the normative framework and the process of priority setting It also examines specific criteria for prioritization and discusses economic evaluations Contributing authors from a broad range of scientific disciplines discuss prioritization within an international dialogue

Constructive Conversations About Health Marshall Marinker, Fritjof Capra, 2018-08-15 Current health policy is required to respond to a constantly changing social and political environment characterised particularly in Europe by ageing populations increased migration and growing inequalities in health and services With health systems under increasing strain there is a sense that we need to seek new means of determining health policy Much political debate focuses on managerial issues such as the levels of health funding and the setting and missing of targets Meanwhile our moral imperatives our values and principles go relatively unexamined What are these values Can we agree their validity and salience How do we manage the paradox of competing goods Can we

find new ways of talking about and resolving our conflicting values and competing priorities in order to create sound appropriate and just health policies for the 21st Century Written by leading health policy makers and academics from many countries Constructive Conversations about Health examines in depth the underlying values and principles of health policy and posits a more enlightened public and political discourse The book will be invaluable for those involved in health policy making and governance politicians healthcare managers researchers ethicists health and social affairs media health rights and patient participation groups The literature on health policy is vast On offer are models of health services economic theory management theory disquisitions on ethical principles social analyses literally thousands of publications In a globalised and electronically networked world this literature has already generated its own particular language a policy jargon replete with terms that look deceptively familiar terms that will be much in evidence in what now follows terms whose meanings require our closest attention Marshall Marinker *Comparative Health Policy In The Asia Pacific* Gauld, Robin, 2004-12-01 Dr Gauld s collection of case studies is informative and accessible I would recommend it as a central text for a course in comparative health systems Political Studies Review Based upon research from eight countries in the Asia Pacific Australia China Hong Kong Japan New Zealand Singapore South Korea Taiwan this book analyses and compares their differing health policies Key issues the book probes include The ways that health care is financed and delivered across the region The historical and institutional arrangements that impact upon health policy and health care How the health systems differ between the countries under study How policymakers and service providers deal with unlimited demand and limited funding and issues such as service coverage and quality How pharmaceuticals and population health strategies are managed What the roles of the state and various other players such as the private sector and professional associations are in the making of health policy and delivery of health care The challenges that lie ahead for health care and health policy in the region Comparative Health Policy in the Asia Pacific is key reading for students researchers and policy makers with an interest in health policy It is relevant to those studying medicine and health studies anthropology history sociology public policy politics and Asian studies **Trends in EU Health Care Systems** Winfried de Gooijer, 2007-03-20 For decades the nations of the European Union wrote the book on universal health coverage Recent economic developments however have created problems ranging from widening inequities of care to growing numbers of uninsured a progression expertly described by Win de Gooijer in Trends in EU Health Care Systems De Gooijer s dual background as an economist and the CEO of Dutch health care corporations together with his broad international experience give him a unique understanding of his subject He traces world economic currents that have affected quality of and access to health care throughout the EU trends that took years to develop but are coming to rapid fruition Comparative illustrations from Europe and the US show national interests at odds with global ones as governments transfer social responsibilities to market driven agencies Included in his discussion Expansion versus reform a forty year analysis of Europe s health care systems Why governments cannot

completely control the always evolving dynamics of health care Ethical and medical issues arising from the continent s changing politics Predictions on future directions in EU health care how much change is possible how much is necessary Some may find De Gooijer s ideas startling and the book is bound to be the subject of controversy But it is critical reading for health care managers and policymakers politicians and insurers advanced students of public health in short anyone looking to Europe for the next phase of this far reaching evolution This book is a very important contribution to the debate about the future direction of health policy in Europe It captures the economic and social trends that underpin health systems with a keen and objective eye and poses some very challenging questions about the future It will not be a comfortable read for politicians but it is a book that must be read Brian Edwards President of the European Hospital and Health Care Federation HOPE The concept of subsidiarity is prohibitive to a sound discussion of health care systems on a European level Economic principles dominate the debate and their consequences for health care are hardly understood The author bridges the gap between economic and health care developments and wrote a book that is essential reading for policy makers and health care managers who really care Rob Koning Past President of the European Health Management Association EHMA The future development of European health policy should not be an exclusively political affair Hospital managers should also be actively involved particularly as regards the design and organization of present and future European hospitals For this purpose this book is a useful and well founded manual It not only clarifies the dangers but also points to the challenges and possible alternative policy options Therefore this book should be in the boardroom of each and every European hospital Willy Heuschen Secretary General of the European Association of Hospital Managers EAHM Win de Gooijer brings immense clarity to a complex issue In this book he draws major and new conclusions and raises many challenging questions We hope this book will draw the attention it deserves G rard Vincent President International Hospital Federation

The New Health Policy Gauld, Robin, 2009-06-01 This book analyzes the issues that form the nucleus of the emerging new health policy agenda Robin Gauld brings together in one volume a comprehensive picture of the health policy challenges facing contemporary developed world health systems as well as the strategies for tackling these The book highlights the importance to policy makers of each subject overviews research into it and discusses policy responses in Britain New Zealand and the United States The New Health Policy is essential reading for all students of health policy and health care along with policy makers and health care professionals Book Jacket
