The Political Economy Of International Organizations Roland Vaubel, Thomas D Willett, 2019-10-16 The idea for this volume was conceived by Frederick Praeger founder of Westview Press who asked Roland Vaubel if he would put together a collection of chapters on the public choice approach to the study of international organizations Vaubel felt it would be useful to have a coeditor from the United States and Thomas D Willett enthusiastically agreed to take on these duties The Political Economy of Russia Neil Robinson, 2012-07-13 This timely book explores Russia's political development since the collapse of the USSR and how inextricably it has been bound up with economic change Tracing the evolution of Russia's political economy leading scholars consider how it may continue to develop going forward They assess the historical legacies of the Soviet period showing how despite policies implemented after the USSR dissolved in 1991 there are ongoing bitter battles over property and state revenues over land and over welfare The book puts these domestic issues in international and comparative perspective by considering Russia's position in the global economy and its growing role as a major energy producer Focusing especially on the nature and future of Russian capitalism the contributors weigh the political problems that confront Russia in its ongoing struggle to modernize and develop its economy Contributions by Andrew Barnes Paul T Christensen Linda J Cook Gerald M Easter Neil Robinson Richard Sakwa and Stephen K Wegren The Political Economy of Change Norman T. Uphoff, Warren F. Ilchman, 2018-04-17 Ilchman and Uphoff believe that political science has failed in the past to meet its own standards of rigor and cogency and does not meet standards of usefulness and relevance set by others The Political Economy of Change attempts to remedy these shortcomings by expanding the limits of social science analysis to deal with problems of allocation and productivity in all spheres of public choice not just the economic sphere The Political Economy of International Capital Mobility M. Watson, 2007-07-03 Matthew Watson draws a distinction between the spatial and the functional mobility of capital allowing fresh insights into existing work on the subject whilst repoliticizing the very idea of capital being in motion The dynamics of capital mobility and the patterns of risk exposure are illustrated through four detailed global case studies New Regionalism and the European Union Alex Warleigh-Lack, Nick Robinson, Ben Rosamond, 2011-06-01 The debates on regionalism have been polarized between European Union EU scholars and non EU scholars with the assumption being that regionalism within the EU and other regions of the world are quite distinct with little to be learnt from dialogue with each other This book challenges such assumptions and calls for a genuine debate between scholars of regionalism This book demonstrates that more can and needs to be learned about regional integration all over the world through comparison and reflection on specific regional trends Beginning with a theoretically driven introduction leading experts in the field are brought together to offer a series of case studies on regional integration within Latin America Africa Asia North America and Europe In Part III the authors investigate the links between the EU and selected other

regional organisations and processes exploring the dynamics through which these interregional relations are developing and the implications they have for the study of contemporary regionalism regionalisation both inside and beyond the continent of Europe The conclusions set out a challenging research agenda for comparative studies in the field Addressing one of the under explored aspects of EU studies the EU s coexistence with other pan continental regional organisations in the European continent this book will be of interest to students and scholars of regionalism IPE European Studies and international politics

example on modern debates *The Political Economy of the Dutch Republic* Oscar Gelderblom, 2016-02-24 In the first half of the seventeenth century the Dutch Republic emerged as one of Europe's leading maritime powers. The political and military leadership of this small country was based on large scale borrowing from an increasingly wealthy middle class of merchants, manufacturers and regents. This volume presents the first comprehensive account of the political economy of the Dutch republic from the sixteenth to the early nineteenth century. Building on earlier scholarship and extensive new evidence, it tackles two main issues: the effect of political revolution on property rights and public finance, and the ability of the nation to renegotiate issues of taxation and government borrowing in changing political circumstances. The essays in this volume chart the Republic's rise during the seventeenth century and its subsequent decline as other European nations adopted the Dutch financial model, and warfare bankrupted the state in the eighteenth century. By following the United Provinces's financial ability to respond to the changing national and international circumstances across a three hundred year period, much can be learned not only about the Dutch experience but the wider European implications as well. **New State Spaces** Neil Brenner, 2004-09-10 In this synthetic interdisciplinary work, Neil Brenner develops a new interpretation of the transformation of statehood under contemporary globalizing capitalism. Whereas most analysts of the emergent post-Westphalian world order have focused on supranational and national institutional realignments, *New State Spaces* shows that strategic subnational spaces such as cities and city regions represent essential arenas in which states are being transformed. Brenner traces the transformation of urban governance in western Europe during the last four decades and, on this basis, argues that inherited geographies of state power are being fundamentally rescaled. Through a combination of theory, construction, historical analysis, and cross-national case studies of urban policy change, *New State Spaces* provides an innovative analysis of the new formations of state power that are currently emerging. This is a mature and sophisticated analysis by a major young scholar. Popular Culture and Political Economic Thought Thomas Strychacz, 2023-01-30 We live in an era of economic fabling where often fantastic representations of economic life in popular culture sit uncomfortably alongside a neoliberal capitalist fairy tale that the Earth's resources can continue to be exploited into an indefinite future. *Popular Culture and Political Economic Thought: Fables of Commonwealth* examines a variety of animated movies, TV shows, written fictions, adventure travelogues, and Paleo archeologies and diets to suggest that popular culture poses a multiform challenge to the failing theories and practices of neoclassical economics. This book contends that it does so most successfully by implementing older formations of political economic thought, stages theory, bioeconomics, and a robust discourse on commonwealth. An era of eco-crisis demands a new economics. It therefore also requires a new appraisal of the popular imaginary and its potential for leveraging alternative conceptions of economic and political relations. This book begins that conversation. **European Political Economy** Lucia Quaglia, Manuela Moschella, Aneta Spendzharova, 2024 Combining the key theoretical and empirical approaches of political economy and EU scholarship, this textbook is key reading for studying

The Political Economy of Hungarian Authoritarian Populism Samuel Rogers,2024-08-30 This book emphasises the importance of state business relations and external capital for structuring and strengthening authoritarian populism in Hungary It argues these

capitalist relations are crucial to understanding the economic aspects of this ideology which has developed in the country since 2010 The book investigates both internal and external legs of the Hungarian political economy First how a politically loyal national capital owning class has subsumed domestic business Second the government s operationalisation of new inward transnational capital inflows especially from China and Russia to finance large scale infrastructure projects which complement extant investment particularly from Germany Together these developments have strengthened the hegemonic nature of Hungarian Authoritarian Populism helping the government to continued electoral success This model of governance is attractive to similar ideological expressions in the region and beyond who look for an example to emulate The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
