Religion And Regime:

Religion and Regimes Mehran Tamadonfar, Ted G. Jelen, 2013-11-26 This work is a collection of essays that describe and analyze religion and regime relations in various nations in the contemporary world The contributors examine patterns of interaction between religious actors and national governments that include separation support and opposition In general the contributors find that most countries have a majority or plurality religious tradition which will seek a privileged position in public life The nature of the relationship between such traditions and national policy is largely determined by the nature of opposition A pattern of quasi establishment is most common in settings in which opposition to a dominant religious tradition is explicitly religious However in some instances the dominant tradition is associated with a discredited prior regime in which a pattern of legal separation is most common Conversely in some nations a dominant religion is for historical reasons strong associated with national identity Such regimes are often characterized by a lazy monopoly in which the public influence of religion is reduced

Religion and Regimes Mehran Tamadonfar, Ted G. Jelen, 2014 Religion and Regimes Support Separation and Opposition emphasizes the changing political role of religion in various nations of the world The approach is based on market models of religion and connects the style of religious politics in a given nation to the nature of competition among dominant religious traditions and their alternatives

Faith in Numbers Michael Hoffman, 2021-01-18 Why does religion sometimes increase support for democracy and sometimes do just the opposite In Faith in Numbers political scientist Michael Hoffman presents a theory of religion group interest and democracy Focusing on communal religion he demonstrates that the effect of communal prayer on support for democracy depends on the interests of the religious group in question For members of groups who would benefit from democracy communal prayer increases support for democratic institutions for citizens whose groups would lose privileges in the event of democratic reforms the opposite effect is present Using a variety of data sources Hoffman illustrates these claims in multiple contexts He places particular emphasis on his study of Lebanon and Iraq two countries in which sectarian divisions have played a major role in political development by utilizing both existing and original surveys By examining religious and political preferences among both Muslims and non Muslims in several religiously diverse settings Faith in Numbers shows that theological explanations of religion and democracy are inadequate Rather it demonstrates that religious identities and sectarian interests play a major part in determining regime preferences and illustrates how Islam in particular can be mobilized for both pro and anti democratic purposes It finds that Muslim religious practice is not necessarily anti democratic in fact in a number of settings practicing Muslims are considerably more supportive of democracy than their secular counterparts Theological differences alone do not determine whether members of religious groups tend to support or oppose democracy rather their participation in communal worship motivates them to view democracy through a sectarian lens

Africa and the Decolonisation of State-Religion Policies

John Osogo Ambani, 2021-05-25 This book argues that a view has taken root in Africa which equates state secularism to the aggressive removal of religion from the public sphere or even state ambivalence towards religious affairs This view arises from a misguided interpretation of the practice of state secularism particularly in France Turkey and the US which understanding is ill suited for the sub Sahara Africa's state religion because the region boasts of at least three major religious traditions African religion Islam and Christianity and blanket condemnation of public manifestation of religion or ambivalence towards it may offend the natural flourishing of this trinity and more The contribution holds that most applications of state secularism in Kenya Nigeria and Uganda favour the Christian faith which during its tumultuous experiences in Europe survived the enlightenment the reformation and like experiences socialised to co exist with what are now called secular states Additionally due to the long history of Christendoms in Europe Christian principles penetrated the colonial legal systems that were bequeathed to Africa at independence and the sustenance of the colonial legacy means that the Abrahamic faith has an upper hand in the state religion relations contest The obvious loser is African religion which has suffered major onslaughts since the colonial days

Religion and Authoritarianism

Karrie J. Koesel, 2014-02-24 This book provides a rare window into the micropolitics of contemporary authoritarian rule through a comparison of religious state relations in Russia and China two countries with long histories of religious repression and even longer experiences with authoritarian politics Drawing on extensive fieldwork in multiple sites in these countries this book explores what religious and political authority want from one another how they negotiate the terms of their relationship and how cooperative or conflicting their interactions are This comparison reveals that while tensions exist between the two sides

there is also ample room for mutually beneficial interaction Religious communities and their authoritarian overseers are cooperating around the core issue of politics namely the struggle for money power and prestige and becoming unexpected allies in the process *Politics, Religion and Gender* Sieglinde Rosenberger, Birgit Sauer, 2013-07-03 Heated debates about Muslim women's veiling practices have regularly attracted the attention of European policymakers over the last decade The headscarf has been both vehemently contested by national and or regional governments political parties and public intellectuals and passionately defended by veil wearing women and their supporters Systematically applying a comparative perspective this book addresses the question of why the headscarf tantalises and causes such controversy over issues about religious pluralism secularism neutrality of the state gender oppression citizenship migration and multiculturalism Seeking also to establish why the issue has become part of the disciplinary practices of some European countries but not of others this work brings together an important collection of interpretative research regarding the current debates on the veil in Europe offering an interdisciplinary scope and European wide setting Brought together through a common research methodology the contributors focus on the different religious political and cultural meanings of the veiling issue across eight countries and develop a comparative explanation of veiling regimes This work will be of great interest to students and scholars of religion politics gender studies and multiculturalism
