Religion In The History Of The Medieval West:

Religion in the History of the Medieval West John Van Engen, 2023-05-31 These ten essays by John Van Engen situate religion in the history of medieval Western Europe as an unavoidable presence in everyday life as a conceptual framework for social and political life as a force integral to its historical dynamics Four of the essays are bibliographical and retrospective in nature reviewing the field broadly but also pointing toward a more dialectical approach to understanding the interaction of religion and society in the European middle ages Other studies deal with large topics usually subsumed under the abstract term Christianization They grapple with learned sources as well as those associated with popular religion and show what can be gained from an imaginative use of all that lawyers and theologians said about religion in their society The essays finally look for the quality and dynamic of change even inventiveness released by religious action and conviction in medieval European society

Church and People in the Medieval West, 900-1200 Sarah Hamilton, 2015-08-12 During the middle ages belief in God was the single more important principle for every person and the all powerful church was the most important institution It is impossible to understand the medieval world without understanding the religious vision of the time and this new textbook offers an approach which explores the meaning of this in day to day life as well as the theory behind it Church and People in the Medieval West gets to the root of belief in the Middle Ages covering topics including pastoral reform popular religion monasticism heresy and much more throughout the central middle ages from 900 1200 Suitable for undergraduate courses in medieval history and those returning to or approaching the subject for the first time

Sin: Essays on the Moral Tradition in the Western Middle Ages Richard Newhauser, 2023-07-28 Richard Newhauser examines here aspects of the moral tradition of medieval thought specifically the construction of the seven deadly sins their offspring and related schematizations of immorality in the Latin West The emphasis in these studies is on the malleability of moral categories their relationship to changes in medieval culture and the creativity and sensitivity of the thinkers who made use of the concepts of sinfulness in the Middle Ages The first section examines the contexts in which the seven deadly sins or nine accessory sins are found in medieval Latin English and German texts and in particular the genre of the treatise on vices and virtues as the major vehicle in which concepts of immorality were examined and presented to a variety of audiences for meditative or pastoral purposes The second section deals with one of the more interesting of the seven deadly sins avarice in its penitential literary apocalyptic and institutional contexts as its definition changed slowly with developing commercial experiences in medieval Europe In the last section the breadth of the concept of a sinful curiosity is examined and its historical development is delineated in the thought of Augustine of Hippo and the early Cistercians

God and History in the Early Medieval West Robert A. H. Evans, 2025-08-01 While virtually all early medieval historians wrote about God they did not do so in the same way Rather than taking their comments about God

at face value then as has been the case in much work on medieval history writing they are deserving of closer scrutiny with implications not simply for how we understand the key narrative sources for early medieval history but also the cultures in which they originated Seeking to fill this historiographical gap this book explores through the prolific writing of historians in the Carolingian Empire how historians in early medieval societies thought about God and what this meant for themselves and their audiences It argues that although Carolingian historians wrote about God's agency with tremendous literary subtlety while reflecting complex theological ideas and attempting to intervene into challenging political realities in many respects they also broke with the example of early Christian historians from Late Antiquity which demonstrates that writing about God was neither a uniform nor inevitable part of early medieval history writing As well as yielding new insights into the nature of these crucial primary sources this analysis helps to provide an overdue examination of the complex relationship between religion and history writing in early medieval societies The book demonstrates that comments about God cannot be reduced to mere political propaganda or even moralistic encouragements for early medieval Christians to lead better lives Instead it argues that these historians sought to communicate a robust theology of divine activity which was relevant and useful for those involved in the often threatening world of Carolingian public life

Rome and Religion in the Medieval World Valerie L. Garver, Owen M. Phelan, 2016-04-08 *Rome and Religion in the Medieval World* provides a panoramic and interdisciplinary exploration of Rome and religious culture The studies build upon or engage Thomas F X Noble's interest in Rome especially his landmark contributions to the origins of the Papal States and early medieval image controversies Scholars from a variety of disciplines offer new viewpoints on key issues and questions relating to medieval religious cultural and intellectual history Each study explores different dimensions of Rome and religion including medieval art theology material culture politics education law and religious practice Drawing upon a wide range of sources including manuscripts relics historical and normative texts theological tracts and poetry the authors illuminate the complexities of medieval Christianity especially as practiced in the city of Rome itself and elsewhere in Europe when influenced by the idea of Rome Some trace early medieval legacies to the early modern period when Protestant and Catholic theologians used early medieval religious texts to define and debate forms of Roman Christianity The essays highlight and deepen scholarly appreciation of Rome in the rich and varied religious culture of the medieval world

Religion and Society in the Medieval West, 600-1200 Henry Mayr-Harting, 2010 The papers reprinted here all have to do with the very varied ways in which religion made an impact upon or was intertwined with political and social life They span the period from 600 to 1200 with particular points of focus on early Anglo Saxon England Charlemagne the Ottonian empire and 12th century England In these articles the Oxford historian Henry Mayr Harting explores the religion of secular rulers the religion or relative lack of it of bishops and churches the religion of custodians at shrines or of recluses or artists as well as religious phenomena such as angelic apparitions conversion or apocalypticism
