Religious Challenge To The State:

State and Politics in Religious Peacebuilding Tale Steen-Johnsen, 2016-11-16 In this book Tale Steen Johnsen explains how religious peacebuilders are limited by both formal and more subtle political strategies aimed at regulating civil society. Political authorities have a vested interest in keeping social and religious movements under control which limits the opportunities religious leaders have to diminish violent conflicts between religious groups. This volume offers empirical examples of these connections in Ethiopia, Kenya, Zanzibar, and Tanzania. It is a valuable resource for both scholars and development practitioners interested in how politics and religion become conflated when religious actors engage to build peace.

Global Rebellion Mark Juergensmeyer, 2008-05-16 A new religious activism has seized the imaginations of political rebels around the world. In providing a road map through this complex terrain, the author bases his discussion on interviews with militant activists and case studies of rebellious movements.

Religion, Modernity, and Politics in Hegel Thomas A. Lewis, 2011-07-28 This study analyzes Hegel's philosophy of religion in relation to ongoing debates about the relation between religion and politics as well as the history of their conceptualization in the modern West. Lewis argues that recent non-traditional, more Kantian interpretations of Hegel's project open up a new understanding of his treatment of religion.

Institutional Origins of Islamist Political Mobilization Quinn Mecham, 2017-02-01 Muslim countries experience wide variation in levels of Islamist political mobilization, including such political activities as protest, voting, and violence. *Institutional Origins of Islamist Political Mobilization* provides a theory of the institutional origins of Islamist politics, focusing on the development of religious common knowledge, religious entrepreneurship, and coordinating focal points as critical to the success of Islamist activism. Examining Islamist politics in more than 50 countries over four decades, the book illustrates that Islamist political activism varies a great deal, appearing in specific types of institutional contexts. Detailed case studies of Turkey, Algeria, and Senegal demonstrate how diverse contexts yield different types of Islamist politics across the Muslim world.

Encyclopedia of Education Law Charles J. Russo, 2008-06-27 CHOICE Outstanding Academic Title for 2009 A welcome addition to any public or academic library, this set would also be of use in a law library where educational law might need to be explored and reviewed at a more basic level than other legal texts. Sara Rofofsky, Marcus, Queensborough Community Coll, Bayside, NY. Smaller educational legal summaries exist, and a couple of texts deal with Supreme Court cases about education, but this set provides a unique combination of general educational legal issues and case-specific information. It should be a welcome addition to academic and large public libraries. Also available as an ebook. Booklist. Transnational Religion And Fading States Susanne H Rudolph, 2018-02-07 Focusing on the dilution of state sovereignty this book examines how the crossing of state boundaries by religious movements leads to the formation of transnational civil society Challenging the assertion that future conflict will be of the clash of civilization variety it looks to the micro origins of conflicts which are as likely to arise between states sharing a religion as between those divided by it and more likely to arise within rather than across state boundaries Thus the chapters reveal the dual potential of religious movements as sources of peace and security as well as of violent conflict Featuring an East West North South approach the volume avoids the conventional and often ethnocentric segregation of the experience of other regions from the European and American Contributors draw examples from a variety of civilizations and world religions They contrast self generated movements from below such as Protestant sectarianism in Latin America or Sufi Islam in Africa with centralized forms of organization and patterns of diffusion from above such as state certified religion in China Together the chapters illustrate how religion as bearer of the politics of meaning has filled the lacuna left by the decline of ideology creating a novel transnational space for world politics

The Emancipation of Europe's Muslims Jonathan Laurence,2011-12-19 The Emancipation of Europe s Muslims traces how governments across Western Europe have responded to the growing presence of Muslim immigrants in their countries over the past fifty years Drawing on hundreds of in depth interviews with government officials and religious leaders in France Germany Italy the Netherlands the United Kingdom Morocco and Turkey Jonathan Laurence challenges the widespread notion that Europe s Muslim minorities represent a threat to liberal democracy He documents how European governments in the 1970s and 1980s excluded Islam from domestic institutions instead inviting foreign powers like Saudi Arabia Algeria and Turkey to oversee the practice of Islam among immigrants in European host societies But since the 1990s amid rising integration problems and fears about terrorism governments have aggressively stepped up efforts to reach out to their Muslim communities and incorporate them into the institutional political and cultural fabrics of European democracy The Emancipation of Europe s Muslims places these efforts particularly the government led creation of Islamic councils within a broader theoretical context and gleans insights from government interactions with groups such as trade unions and Jewish communities at previous critical junctures in European state building By examining how state mosque relations in Europe are linked to the ongoing struggle for religious and political authority in the Muslim majority world Laurence sheds light on the geopolitical implications of a religious minority s transition from outsiders to citizens This book offers a much needed reassessment that foresees the continuing integration of Muslims into European civil society and politics in the coming decades

Religion and Democratizations Jeffrey Haynes,2013-09-13 This book examines key debates on religion and democratization from three main perspectives Religious traditions have core elements which are more or less conducive to democratization and democracy Religious traditions may be multi vocal but at any moment there may be dominant voices more or less receptive to and encouraging of democratization Religious actors rarely if ever determine democratization outcomes However they may in various ways and with a range of outcomes be of significance for democratization The contributions are divided into two sections 1 Religion democratization and democracy and 2 Secularization democratization and democracy Overall they examine the three assertions in the bullet points above The book

s starting point is that in general around the world religions have left their assigned place in the private sphere This means they have in many cases become recognisably politically active in various ways and with assorted outcomes This re emergence from political marginality dates back until at least the 1980s At that time the US sociologist Jose Casanova noted that what was new and became news was the widespread and simultaneous refusal of religions to be restricted to the private sphere This involved a remodelling and re assumption of public roles by religion which theories of secularisation had long condemned to social and political marginalisation This book was published as a special issue of Democratization
