Religious Influences On Health And Well Being In The Elderly:

Religious Influences on Health and Well-Being in the Elderly K. Warner Schaie, PhD, Neal Krause, PhD, Alan Booth, PhD, 2004-06-15 What makes the book's approach so captivating is that each chapter is written by a different researcher in the study of religion and health. These researchers are responsible for significant portions of the existing literature and methodologies found in this field today. The versatility of the book warrants special mention. It is effective as a survey of work that has already been done on this topic. At the same time it serves as a wellspring of ideas for new research. This work makes a valuable contribution to the present understanding of research on religion and health. It also serves as a road map to help chart directions for future endeavors in the field. **Sociology of Religion** This volume focuses on the ways in which religious institutions, religious practices, and religious organizations impact the health and well-being of older persons. Topics examined include the conceptualization and measurement of religion in late life, the relationship between religious coping and possible stress reduction, the role of forgiveness as an alternate mediator, how social class, gender, and race can influence the specific effect of religion, and religious institutions in a diverse aging society. Contributors include L. Chatters, K. Ferraro, L. K. George, E. Idler, S. McFadden, and K. Meador.

Methods in Religion, Spirituality & Aging James W. Ellor, 2013-10-18 Since the 1971 White House Conference on Aging in the United States, the need to move from religiosity into new areas such as Spiritual Assessment and Spirituality has emerged. This movement has picked up momentum among scholars, particularly in terms of research in the area of Spirituality. While spirituality as a term is employed in many new studies, this term continues to defy the quest for a single definition and method. This book is divided into three sections. In the first, the authors reflect on the philosophical and theological issues presented by these terms from a variety of both cognate and practical methodological approaches. The second section offers insights from the major professions of sociology, psychology, public health, nursing, and social work. The final section offers insight and assistance to researchers and authors on specific religious traditions. This book will be important for anyone working to develop such practical tools as spiritual assessment forms to those who engage in more formal scholarly investigation.

Managing Geriatric Health Services Alice McDonnell, 2013 *Managing Geriatric Health Services* provides an overview of the many disciplines related to geriatric health administration, as well as specialty topics in long-term care. Ideal for students studying geriatric health services administration, as well as active professionals currently working in the field, *Managing Geriatric Health Services* thoroughly examines core topics such as administration, nursing, and rehabilitative therapies. It also covers specialty topics including spirituality, dementia, quality assurance, oral history, and ethical issues. This text examines the various jobs within the continuum of care from an administrative and management standpoint and also looks at the various roles or disciplines within long-term care and the specific challenges to each. With contributions from experienced professionals in the field, this book includes an entire section of interdisciplinary case study examples and reflection exercises. Individual chapters include learning objectives, key terms, chapter-specific case

studies and chapter summaries Key Features Discussion questions in each chapter engage the reader in learning and understanding the topics presented Interdisciplinary case studies allow the reader to see the practical application of the concepts presented Chapters are supported by current research from prominent experts in the field A unique chapter on Oral Histories explores the aging process and the value of reminiscing Instructor Resources PowerPoint LECTURE Slides Test Bank

Handbook of the Psychology of Aging James E. Birren, K Warner Schaie, 2011-04-27 Handbook of the Psychology of Aging 6e provides a comprehensive summary and evaluation of recent research on the psychological aspects of aging The 22 chapters are organized into four divisions Concepts Theories and Methods in the Psychology of Aging Biological and Social Influences on Aging Behavioral Processes and Aging and Complex Behavioral Concepts and Processes in Aging The 6th edition of the Handbook is considerably changed from the previous edition Half of the chapters are on new topics and the remaining half are on returning subjects that are entirely new presentations by different authors of new material Some of the exciting new topics include Contributions of Cognitive Neuroscience to Understanding Behavior and Aging Everyday Problem Solving and Decision Making Autobiographical Memory and Religion and Health Late in Life The Handbook will be of use to researchers and professional practitioners working with the aged It is also suitable for use as a textbook for graduate and advanced undergraduate courses on the psychology of aging The Handbook of the Psychology of Aging Sixth Edition is part of the Handbooks on Aging series including Handbook of the Biology of Aging and Handbook of Aging and the Social Sciences also in their 6th editions

Religion in Aging and Health Jeffrey S. Levin, 1993-10-20 How does religion influence one's aging and health Religion in Aging and Health brings together key scholars and scientists from several fields to advance epidemiologic and gerontological research into the role of religion in physical and mental health psychological well being and other psychosocial and health outcomes The first part of the volume contains four chapters that provide a theoretical context for this field and addresses such issues as hope forgiveness the psychodynamics of faith and belief and coping The second part seeks to advance the methodological sophistication of research in this area and emphasizes measurement and design issues and the study of religion aging and health among African Americans With contributions from such distinguished people as Harold G Koenig David B Larson Robert Joseph Taylor and Dan G Blazer Religion in Aging and Health is essential reading for all those interested in gerontology psychology sociology nursing and health and social work There is an extensive literature documenting the salutary effect of religion on human health and well being Yet this literature is largely ignored in mainstream medicine and social science The essays in this book take stock of the empirical studies reflect on the reasons why they have had such little impact and provide direction for future reflection and research Journal of Nervous and Mental Disease Levin's book lives up to its subtitle It is a solid castigation of researchers who have long ignored the role of religion in late life mental health Anyone doing quantitative research on religion or health or aging can benefit from this book's suggestions Author and subject indexes finish off this well edited book Clinical Gerontologist This volume is supported by

thorough sets of references and by perceptive suggestions for further study and research The time is right for a creative partnership between practical theology and social gerontology to further this debate Church of England Newspaper The book's stated purpose is to provide theoretical and methodological resources to support a growing body of research on the interactions among religion aging and health Overall the book makes a substantial contribution toward its goal In addition it makes a significant contribution by reviewing substantive knowledge in a number of areas related to the central topics The material is readable and jargon is kept to a minimum Robert C Atchley Director Scripps Gerontology Center Oxford Ohio These essays show that when it is conceptualized more carefully and measured with greater precision religiosity may be a surprisingly powerful predictor of health status and general life satisfaction especially among the aging George W Patterson in Religious Studies Review

The SAGE Handbook of Social Gerontology Dale Dannefer, 2010-09-14 This volume reflects the emergence of ageing as a global concern including chapters by international scholars from Asia Australasia Europe and North America It provides a comprehensive overview of key trends and issues in the field drawing upon the full range of social science disciplines The Handbook is organized into five parts each exploring different aspects of research into social aspects of ageing Disciplinary overviews summaries of findings from key disciplinary areas within social gerontology Social relationships and social differences topics include social inequality gender and ageing the role of religion inter generational ties social networks and friendships in later life Individual characteristics and change in later life chapters in this section examine different aspects of individual aging including self and identity cognitive processes and biosocial interactions and their impact on physical and psychological aging Comparative perspectives and cultural innovations topics in this section include ageing and development ageing in a global context migration and cross cultural perspectives on grandparenthood Policy issues The final section examines some of the main policy concerns affecting older people across the world Topics include developments in social policy long term care technology and older people end of life issues work and retirement crime and older people and the politics of old age This will be essential reading for all students researchers and policy makers concerned with the major issues influencing the lives of older people across the globe

Social Structures and Aging Individuals K. Warner Schaie, Ronald P. Abeles, 2008-07-02 A useful reference book Readers will find themselves returning to chapters again and again PsycCritiques This is the 20th and final volume in the Societal Impact on Aging series It focuses on what has been learned over the span of the previous volumes regarding the continuing challenges for older persons in a rapidly changing society and tries to forecast what may be the next set of issues to lie at the intersection of social structures and the individual aging process The editors therefore invited major organizers of and contributors to the 19 earlier volumes to review both the accomplishments and omissions of their efforts discuss some timely new topics and provide guidelines for future research and theoretical explanations The book is divided into five broad topics health and wellbeing including the role of religion personality and cognition the impact of changes in technology and the work place

issues of socio cultural change and historical context and the familial and societal contexts of aging *New Frontiers in Resilient Aging* Prem S. Fry, Corey L. M. Keyes, 2010-07-29 A typically pessimistic view of aging is that it leads to a steady decline in physical and mental abilities In this volume leading gerontologists and geriatric researchers explore the immense potential of older adults to overcome the challenges of old age and pursue active lives with renewed vitality The contributors believe that resilience capacities diminishing with old age is a misconception and argue that individuals may successfully capitalize on their existing resources skills and cognitive processes in order to achieve new learning continuing growth and enhanced life satisfaction By identifying useful psychological resources such as social connectedness personal engagement and commitment openness to new experiences social support and sustained cognitive activity the authors present a balanced picture of resilient aging Older adults while coping with adversity and losses can be helped to maintain a complementary focus on psychological strengths positive emotions and regenerative capacities to achieve continued growth and healthy longevity **Historical Influences on Lives and Aging** K. Warner Schaie, PhD, Glen Elder, PhD, 2005-06-27 This book focuses on the ways in which the life course of individuals is affected by the historical contexts in which they live Editors Schaie and Elder along with over twenty five contributors explore how historical events of varying degrees such as immigration war age ethnicity and socioeconomic status can affect the immediate and long term life course *Principles and Practice of Geriatric Psychiatry* Marc E. Agronin, Gabe J. Maletta, 2012-03-28 Many elderly patients suffer from psychiatric conditions that result from or are made worse by existing medical conditions This new edition integrates clinical expertise needed to evaluate and treat psychiatric medical and neurologic disorders in the older patient Both scientific foundations of and clinical approaches to psychiatric disease are discussed by a range of experts who rely on evidence based clinical guidelines and outcomes data Most chapters include case studies that illuminate the approaches to diagnosis and treatment The book's five sections include basic principles of evaluation and treatment for specific disorders appendices offer further insight into pharmacotherapy and neuroanatomic foundation of psychiatric diseases *Handbook of Religion and Social Institutions* Helen Rose Ebaugh, 2007-10-23 Handbook for Religion and Social Institutions is written for sociologists who study a variety of sub disciplines and are interested in recent studies and theoretical approaches that relate religious variables to their particular area of interest The handbook focuses on several major themes Social Institutions such as Politics Economics Education Health and Social Welfare Family and the Life Cycle Inequality Social Control Culture Religion as a Social Institution and in a Global Perspective This handbook will be of interest to social scientists including sociologists anthropologists political scientists and other researchers whose study brings them in contact with the study of religion and its impact on social institutions *Handbook of the Psychology of Aging* K Warner Schaie, Sherry L. Willis, 2010-12-21 The Handbook of the Psychology of Aging Seventh Edition provides a basic reference source on the behavioral processes of aging for researchers graduate students and professionals It also provides perspectives on the behavioral science of aging for

researchers and professionals from other disciplines The book is organized into four parts Part 1 reviews key methodological and analytical issues in aging research It examines some of the major historical influences that might provide explanatory mechanisms for a better understanding of cohort and period differences in psychological aging processes Part 2 includes chapters that discuss the basics and nuances of executive function the history of the morphometric research on normal brain aging and the neural changes that occur in the brain with aging Part 3 deals with the social and health aspects of aging It covers the beliefs that individuals have about how much they can control various outcomes in their life the impact of stress on health and aging and the interrelationships between health disparities social class and aging Part 4 discusses the emotional aspects of aging family caregiving and mental disorders and legal capacities in older adults Contains all the main areas of psychological gerontological research in one volume Entire section on neuroscience and aging Begins with a section on theory and methods Edited by one of the father of gerontology Schaie and contributors represent top scholars in gerontology

The Encyclopedia of Aging Linda S. Noelker, PhD, Kenneth Rockwood, MD, FRCPC, Richard L. Sprott, Ph.D., 2006-03-17 A COMPREHENSIVE RESOURCE ON GERONTOLOGY AND GERIATRICS Since its inception in 1987 The Encyclopedia of Aging has proven to be the definitive resource for scholars and students across the burgeoning and increasingly interdisciplinary fields of gerontology and geriatrics Like its three esteemed predecessors the fourth edition contains concise readable explorations of hundreds of terms concepts and issues related to the lives of older adults as well as timely coverage of the many new programs and services for the elderly Updated under the distinguished stewardship of editor in chief Richard Schulz to reflect the infusion of new information across the scientific disciplines this new edition brings readers up to the moment significant advances in biology physiology genetics medicine psychology nursing social services sociology economics technology and political science While retaining the format and standard of excellence that marked the first three editions the fourth edition encompasses a wealth of new information from the social and health sciences It contains the most current bibliography of an expanding literature an exhaustive index and extensive cross references This much anticipated update of the field s most authoritative resource will take its place as an indispensable reference for specialists and non specialists across a broad range of disciplines that now comprise the field of aging

SPRINGER SERVING THE HEALTHCARE AND HELPING PROFESSIONS FOR MORE THAN 55 YEARS [Aging, Spirituality, and Religion](#) Melvin Kimble, Susan H. McFadden, 2002-12-01 Volume II picks up where Volume I left off with practical advice and tools for ministry with the aging in a variety of settings Gerontological and theological perspectives undergird the practical guidance and a final section treats of the unique ethical issues involved in ministry with the aging

Self-Care in the Elderly Fatemeh Bahramnezhad, 2025-09-26 This comprehensive book provides a practical and evidence based approach to promoting self care in the elderly Covering all essential domains physical mental social and spiritual it presents a well rounded framework for supporting older adults in maintaining their health and quality of life Each

chapter features practical recommendations for older adults and their caregivers along with clinical case examples to enhance comprehension The content is supported by the latest findings from reliable scientific sources peer reviewed journals and clinical guidelines Importantly this book also highlights the growing role of technology and telehealth in elderly care offering innovative yet accessible strategies to improve service delivery Written in clear and simple language this book is ideal for healthcare professionals caregivers students and anyone working in home care or nursing home settings

Social Structures, Aging, and Self-Regulation in the Elderly K. Warner Schaie, PhD, Laura L. Carstensen, PhD, 2006-07-06 This collection considers ways in which societal contexts influence aging by influencing self regulatory processes No one doubts that the social contexts in which individuals develop exert strong influence on life trajectories Those born into environments that provide high quality education supportive social relations and economic assets do better in old age than those born into environments bereft of such resources The extent of this influence however is only beginning to be revealed Recent research shows that life experiences influence basic brain structures e g the effect of musical training on neural organization and functions e g inflammatory processes and that social embeddedness may even protect against Alzheimer s disease Similarly education increasingly appears to have a real effect on neural integrity Thus societal contexts may not simply open or close doors for individuals but may influence self regulatory processes at the most basic levels of functioning Although social structures are generally seen as the independent variables that affect individual aging it is also possible to think of a lifetime development of self regulatory processes leading to behaviors in old age that can have impact on and modify societal structures Two parts of this book consider self regulation as the dependent variable asking how social contexts influence cognitive emotional and self regulatory processes The third part reverses the question treating self regulation as the independent variable and retirement and physical health as dependent variables In this part consideration is given to how the effectiveness of self regulation influences physical and economic outcomes in old age **Aging and**

Diversity Chandra M. Mehrotra, Lisa S. Wagner, Chandra Mehrotra, 2013-03-07 This new edition has been completely rewritten and includes chapters that address key topics in diversity and aging research methods psychological aging health beliefs behaviors and services health disparities informal and formal care for older persons work and retirement religious affiliation and spirituality and death dying and bereavement Taking a broad view of diversity Mehrotra and Wagner discuss elements of diversity such as gender race or ethnicity religious affiliation social class rural urban community location and sexual orientation Including these elements allows them to convey some of the rich complexities of our diverse culture complexities that provide both challenges to meet the needs of diverse population and opportunities to learn how to live in a pluralistic society Throughout the book Mehrotra and Wagner present up to date knowledge and scholarship in a way that engages readers in active learning Rather than simply transmitting information the authors place ongoing emphasis on developing readers knowledge and skills fostering higher order thinking and encouraging exploration of personal values and

attitudes Distinctive features of the book include Opening vignettes for each chapter that present a sampling of how the issues to be discussed apply to diverse elders Active learning experiences that invite readers to interview diverse elders conduct internet searches and give an analysis of a case study Quizzes at the end of the chapters help readers ascertain the extent to which they have learned the material the key for each quiz includes details about correct and incorrect responses so that additional learning can occur Aging and Diversity Online boxes interspersed throughout the book provide internet resources that readers may use to find new research and publications Suggested readings and audiovisual resources given at the end of each chapter serve as a guide to additional information on topics covered in the chapter This approach of presenting the material will help the readers understand and apply key concepts and principles in ways that will not only improve the lives of older people they serve but will also enhance their own aging experience

God, Faith, and Health

Jeff Levin, 2007-07-20 In this groundbreaking book Dr Jeff Levin explores the latest compelling evidence of the connection between health and an array of spiritual beliefs and practices including prayer attending religious services meditation and faith in God Drawing on his own and other published studies Dr Levin shows how religion's emphasis on healthy behaviors and supportive relationships influences one's overall health and how the optimism and hopefulness of those who profess faith promote the body's healing responses Filled with dramatic personal stories God Faith and Health will alter the way you think about your body and your faith and will show you the path to improving your own health through spiritual practice Jeff Levin writes with incredible clarity style and passion This book is a must read for anyone interested in the religion health connection especially those wondering if such a connection exists at all Harold G Koenig M D Associate Professor of Psychiatry and Medicine Duke University Medical Center and author of The Healing Power of Faith Beautifully written and packed with compelling scientific evidence for the spirituality health connection With the precision of a scientist the courage of a true pioneer and the artistry of a storyteller Levin reminds us of what we can no longer afford to ignore that our spiritual life matters mightily to our health and well being at every level Janet F Quinn Ph D R N Associate Professor University of Colorado School of Nursing
